"When I started the restoration of my Oldsmobile it quickly became apparent I was going to need at least one of everything. And after looking around it was clear that the one place to get all of these parts was OPGI. They have everything I needed to restore my car right. And they were a pleasure to work with every step of the way. Thanks, OPGI !!!!!"

- William Marquardt Hanson, MA
1970 Oldsmobile Cutlass

40 YEARS OF EXCELLENCE

SINCE 1982
THE PREMIER MANUFACTURER OF OLDSMOBILE, CUTLASS, 4-4-2, F-85 PARTS

ON THE COVER:
Stephan Konecko's 1970 442-W30 Convertible. Whenever Stephan takes a spin in his convertible he is always asked for pictures of his masterpiece. It's powered by an LSX engine producing 582HP, built by Golen Engines out of Hudson, NH. The transmission is a 4L60E 4-speed automatic electronically controlled. The Oldsmobile is finished in a beautiful Matador Red and has a Parchment White interior.

OUR 'CUSTOMER FIRST' APPROACH...

There are many options out there, but when you shop OPGI, there is a huge difference in the level of service before, during and after the sale. Our integrity, expertise, and attention to detail are unrivaled in the industry.

IN-STOCK SELECTION, UNMATCHED IN THE INDUSTRY

Whether it is a faithfully reproduced factory part, an aftermarket add-on, or a high-performance item, we offer a broader In-Stock inventory selection than any other competitor.

EXCEPTIONAL SERVICE & SUPPORT

Here at OPGI, we aren't content to just sell you on our product line and service. Our team is dedicated to resolving the technical issues that can arise from installation to performance. We are there for you every step of the way.

MANUFACTURING PREMIUM RESTORATION PARTS SINCE 1982

40 YEARS OF EXCELLENCE

For 40 years we've provided the classic car enthusiast with exceptional quality restoration, aftermarket and high performance parts. We take great pride to ensure that every part and accessory we stock and sell are of the highest quality standards. It's how we have built our reputation. Our vision remains: To provide you with the absolute best quality and service anywhere, period. Our goal is that your OPGI buying experience is remarkable in every way!

PREMIUM BRAND PERFORMANCE BY ORIGINAL PARTS GROUP

LENSES

RESTOPARTS® lenses are manufactured to exact GM specifications to ensure a perfect fit and appearance. Each lens features factory-correct color, details, trim and GUIDE markings where applicable.

MOLDINGS

RESTOPARTS® stainless steel and anodized aluminum moldings are formed to factory specifications and polished to a brilliant finish. Of course, we test fit all parts on our own vehicles first, ensuring an exact fit.

MANUFACTURED RESTOPARTS BY ORIGINAL PARTS GROUP

STAMPINGS

RESTOPARTS® non-corrosive and high resistance stampings are precision manufactured on new tool and die surface forms to ensure dimensional accuracy and a consistent surface finish.

DIE CASTINGS / CHROME

RESTOPARTS® case-hardened steel tooling and die-casting process ensure parts are stamped to perfection and exceed original GM specifications for overall quality.

BUSINESS OF THE YEAR

Original Parts Group had the honor of accepting ARMO's coveted Business of the Year award twice at the SEMA Show. This award is presented to the company that has demonstrated exceptional service, integrity and business ethics, as well as made a commendable contribution to the restoration industry.

Original Parts Group also received General Motors "Best Restored GM Vehicle" award at SEMA four out of six years – for vehicles restored entirely with OPGI restoration parts.

MORE WAYS TO SAVE

Fast, FREE Shipping
Free Standard Ground Shipping on orders over $299 shipped within the continental U.S. Excludes oversize and overweight items. See page 336 for details.

Volume Discounts
Orders that exceed $499 qualify for a 5% discount, and orders that exceed $999 qualify for a 10% discount. See page 338 for details

Frequent Buyer Rewards
If you have ever made a purchase or requested a catalog in your name, you are already enrolled in our Frequent Buyer Rewards program. By placing orders for parts, you'll be well on your way to earning future discounts.

45-Day Guarantee
We want you to be completely satisfied with the parts you receive. Items purchased from OPGI may be returned within 45 days from date of purchase for any reason. Simply return the item in its original, unused condition along with its original packaging. See page 338 for details.

Kit Swap Savings
Need an interior kit, but not every item in the kit? Mix and match, or even delete items, and you'll still get the full kit discount.

Ratings & Reviews
Your opinion is important to not only us, but to everyone who visits our website as well. Make your voice heard. Post a comment, ask a question, or look at what others are saying about the parts we offer at opgi.com.

Price Match Guarantee
Original Parts Group, Inc. will match any competitor's current advertised retail price for an identical product. Simply provide us with a copy of the competitor's current advertised price from a catalog, ad, or website. The price match guarantee is available at the time the order is placed and is available for in-stock merchandise only.

Award Winning
Several OPGI vehicles have won the GM/SEMA Award for Best Restored Vehicle over the many other show vehicles at the Specialty Equipment Marketing Association (SEMA) industry convention held each year in Las Vegas, NV.

See our policies on pages 336-338 for complete details of our value added programs. Prices and shipping rates are subject to change without notice. Printed April 2022, all prices current at the time of printing, please check opgi.com or call during normal business hours for our most current pricing and the most up-to-date information.

ICON REFERENCES

Premium reproductions manufactured by RESTOPARTS®

Our latest in-house PERFORMANCE brand.

We have added many new products for 2022, from interior parts to quality steel reproductions and everything in between. Just look for the NEW symbol!

As Original Parts Group continues to grow year after year, we can take advantage of special volume pricing on hundreds of parts that manufacturers offer companies of our size. This means that we can offer the same high quality parts but at a substantial discount for you, our customer.

Every time you see this symbol, it indicates that we have assembled a complete kit of those products for your convenience. But there's more: most kits in this catalog are attractively discounted from our regular prices.

Free Standard Ground Shipping on this item within the continental U.S.

Our "Made in the USA" icon speaks for itself... American-manufactured products, of course!

When you see this GM logo, you are assured that the parts you are purchasing are Genuine General Motors parts.

In this catalog, the GM Restoration Parts logo indicates that a product is officially licensed to Original Parts Group Incorporated by General Motors.

Please take note of the following abbreviations:

ABBREVIATIONS USED THROUGHOUT THIS CATALOG:

AT/AUTO = Automatic transmission
BCKT = Bucket seat
CC = Commercial chassis
CI = Cubic inches
CPE = Coupe
CYL = Cylinder (6 or 8)
DR = Door (as in 2- or 4-doors)
HP = High-performance
HT = Hard top
LH = Left, Driver's side of vehicle
OEM = Original Equipment Manufacturer (usually General Motors)
OM = Original Manufacturer
PS = Power steering
REPRO = Aftermarket reproduction designed to original GM part specification
RH = Right, Passenger side of vehicle
RR = Rear
SB = Small-block engine
STD = Standard (non high-performance)

OPGI'S AWARD WINNING MULTI-STAGE INTERIOR KITS

What makes our interiors so special? From the start, we made sure our reproduction interior products were 100% factory accurate. We worked with many of the premier interior manufacturing companies, actively participating in research and development, ensuring only the highest quality components for our customers. The tools and dies that created factory look-alike patterns for seat upholstery, door panels, headliners, dash pads and molded carpet are considered to be the finest quality and most original to this day!

Year after year, our complete interiors have been featured in our GM A-Body vehicles at the SEMA show, which is attended by well over 100,000 automotive industry professionals annually. We have taken the "Best Restored GM Vehicle" award numerous times at SEMA, winning this over hundreds of other cars at the show. Not only is this the industry's ultimate compliment, it confirms our commitment to excellence.

Multi-Stage Interior Kits deliver all the parts you need in one bundle at the best possible price. Whether you chose the "base" Stage I Kit, or opt for the progressively more comprehensive Stage II, III or IV Kits, you'll save plenty of time and money with these bundled packages. Every Multi-Stage Kit represents the biggest major savings on a wide range of our most in-demand interior components.

NEED AN INTERIOR KIT, BUT NOT EVERYTHING IN THE KIT?

Mix and match, or even delete items, and still enjoy the great kit savings!

Kit Swap SAVINGS™

Here's an example:
Let's say you want a Stage III Interior Kit, but don't need everything that comes with it, need a different color combination than what's offered, or would like a few other items not offered in the kit. We'll let you mix and match as you see fit, plus you'll still get the full kit discount.

- Change out items and retain the kit discount on the remaining products. For example, get premium Essex Carpet instead of the standard 80/20.

- Delete items off the kit that you don't need, or add items to a kit. We'll still honor the discount on the remaining items.

- Once you've decided what you need, give us a call and we'll assist you.

This Kit Swap is a special service that we have implemented to serve you. To take advantage of Kit Swap Savings, the final Kit components you buy must retain a portion of the original kit price. Call for details.

Four kits to choose from, now you can quickly scan the components in each level of interior kit.

STAGE I

Each Stage I kit contains the most visible components necessary to create a dramatic showroom new difference. A tremendous value!

STAGE II

Complete the finer details of your interior restoration. Includes everything in the Stage I kit plus many typically worn-out small detail items like door lock knobs, armrest pads and bases! See chart for complete description.

STAGE III

Each Stage III kit features a large selection of detail items. Includes everything in the Stage II kit plus a dash pad and additional insulation. Convertible application kits include the top, pads, rear window, well liner and boot.

STAGE IV

Truly the greatest value. This comprehensive kit contains just about everything you'll need for your interior restoration. Each Stage IV kit is larger in scope than the others and is packed with a huge array of products designed to get you well on your way to a show-winning interior!

Complete Carpet Restoration Kit

Original Style Molded Carpet: In 2005, "Raylon" was developed as a replacement for traditional 80/20 loop carpets used in all GM 1960s & early 1970s cars. Each set is heat-pressed & precisely molded into an original, high-quality Cutlass floor pan die—to insure a perfect fit, then with precisely reproduced plastic heel-pad for superior fit & finish. With original style 1/2" thick jute bonded to the underside for your convenience. **Premium Essex Carpet:** "Essex-style" sets use the same 22-ounce cut pile carpet as Mercedes & other high-end cars. They include original style machine-bonded plastic heel pads in factory location with correct molded plastic dimmer switch grommet & shipped complete with 1/2"-thick jute backing bonded to the carpet. Heat-pressed & molded to an original GM A-Body floor pan die.

THIS MONEY-SAVING KIT INCLUDES:

(1) Premium-molded carpet: 80/20 Raylon or Essex, (1) Under carpet soundproof set, (2) Sill/step plates with "Body by Fisher" emblem - ribbed (1964-72) or waffle (1973-77), (8) Sill plate screws

1961-77 CARPET
SATISFACTION GUARANTEED!

1961-77 Premium Essex Carpet

These luxurious, heavyweight, "Essex-style" carpet sets use the same 22-ounce cut pile carpet as Mercedes & other high-end cars. These complete carpet sets (front & rear) include original style machine-bonded plastic heel pads in the factory location with correct-molded plastic dimmer switch grommet and already have the jute backing bonded to the carpet. Heat-pressed and molded to an accurate floor pan die, these premium luxury carpets are simple to install & have a "pop-in" fit. There are a variety of colors that coordinate with our upholstery & door panel kits for the ultimate in plush automotive interiors. These thick, deep pile carpet kits have that luxury car feel & look for all Oldsmobile Cutlass models.

- **Factory Correct Heel Pad:** Why compromise? Get superior Raylon along with the absolute 100% correct heel pad dielectrically welded like the factory original!
- **Enhanced Abrasion:** 80/20 Raylon will not fuzz, pill, beard or shed fiber on the surface.
- **Superior Color Fastness:** 80/20 Raylon meets current OEM standards for floor coverings.
- **1-Year Warranty:** Manufacturer is offering a one-year, no fade warranty against discoloration from sunlight exposure.

MADE IN THE USA

1961-77 Original Style Molded Carpet

In 2005, "Raylon" was developed as a replacement for the traditional 80/20 loop carpets used in all GM cars of the 1960s & early 1970s. Dorsett Industries, founded in 1961, is the oldest carpet manufacturer still in existence, who originally produced the factory OE 80/20 rayon & nylon blend loop carpet from 1961 through the muscle car boom years. Coupled with OPGI's premier & preferred supplier, Auto Custom Carpets, each set is heat-pressed & precisely molded into an original, high quality Cutlass floor pan die - to ensure a perfect fit, then of course machine bonded with the most precisely reproduced plastic heel-pad in the industry (size, color key & durability) for a superior fit & finish. Shipped complete with original style 1/2" thick jute bonded to the underside.

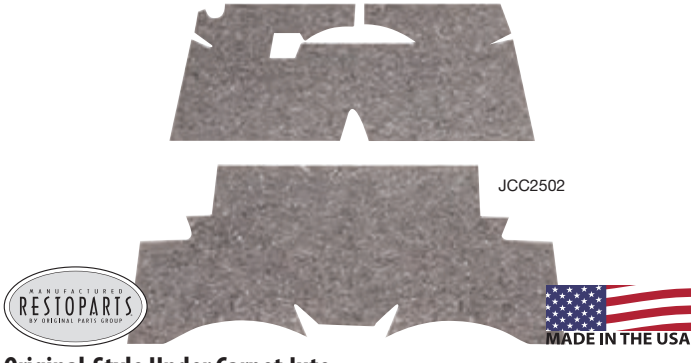
ORIGINAL-FORMED CARPET JUTE
Machine-stamped and perfectly matched to our carpet sets.



JCC2502

MANUFACTURED RESTOPARTS BY ORIGINAL PARTS GROUP

MADE IN THE USA

Original-Style Under Carpet Jute

For extra protection and greater comfort, your carpet installation will be enhanced by adding additional jute backing between the floor pan and the molded carpet. Doubling up the jute provides a plush cushion and heightens the amount of protection from elements such as road noise. Also helpful in insulating the temperature to stay cool in summer and warm in winter.

REDUCE HEAT & ROAD NOISE

HSM2010

HushMat

MADE IN THE USA

1961-77 Silencer Megabond

Absorb & eliminate high frequency airborne noise that enters the vehicle by using Silencer Megabond sound deadener from Hushmat. Using light weight and self-adhesive material, Hushmat Silencer Megabond will not only eliminate those annoying road noises, but also reduce the heat that comes from the engine, headers, exhaust and catalytic converters. Similar to the application of foam on the ceiling and walls of a recording studio, the Silencer Megabond sound deadener performs the same function for the interior of your vehicle and is guaranteed to make a difference in your driving experience.

MADE IN THE USA

Hushmat Ultra

When driving your vehicle do you feel the heat coming through the firewall, floor and tunnel? Do you hear road noise and vibration that prevents you from having a conversation inside your vehicle? Then reduce that engine, exhaust drone, road noise, vibration and reduce the heat that comes from the engine, headers, exhaust or catalytic converters with the light weight Hushmat Ultra! Hushmat's proprietary USA manufactured visco-elastic chemistry dissipates this heat insulating your interior causing less load on your A/C system. Hushmat Ultra is available from OPGI in several different kits and sizes to cover certain sections of your vehicle or the entire vehicle. Sheet sets are available in black or silver, while custom sets available in silver only.

MADE IN THE USA

CH32783

Heat/Sound Suppressors

The Suppressor is ideal when both sound and radiant heat control is needed. In addition to the polyethylene film, the foil surface provides direct protection from radiant heat up to 2000 Deg F and direct temperatures up to 300 Deg F. Great for areas like interior firewalls, floorboards, or doors. The Suppressor is also 7 mil in thickness, contains a high temperature adhesive backing, and is easy to trim & fit.

Part#	Desc.	UOM	Price
CH32781	12" x 12"	pair	23.99
CH34839	12" x 33-1/2-ft.	each	269.99
CH32782	24" x 36"	each	35.99
CH32783	36" x 60"	each	68.99
CH34840	36" x 33-1/2-ft.	each	419.99

Super Sonic Suppressor Mat

This high quality mat offers superior sound damping control to reduce road noise, rattles, engine noise, and any other noises that are bothersome. The high density polyethylene film with an aluminum foil composite is abrasion and tear resistant. The gray film provides structural integrity and strength, allowing the material to bend, move, and return to shape even under tension forces. The product is 70 mil in thickness, contains a high temperature adhesive backing, and is easy to trim and fit. The rubberized compound is applied with the high temperature adhesive to absorb all those out of control noises.

Part#	Desc.	UOM	Price
CH32784	12" x 12", 2pc.	pair	28.99
CH34841	12" x 33-1/2-ft.	each	289.99

THE BEST IN HEAT AND SOUND INSULATION

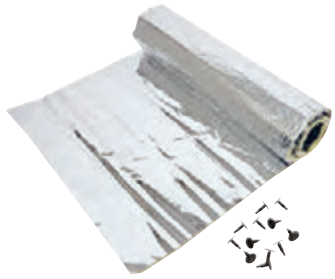
Lightweight and durable

MADE IN THE USA

Thermo Guard Insulation

Thermo Guard FR offers the best in heat and sound insulation. This lightweight, durable shield does everything: reduces sound, absorbs vibration, protects from radiant heat up to 1500 degrees and provides an extra layer of insulating padding. This product features 100% synthetic fiber felt that provides sound and comfort control and a high-tech foil heat barrier that blocks more than 90% of radiant heat. Being only 1/4" thick, Thermo Guard FR provides a very high level of performance with minimal thickness. Thermo Guard FR is very easy to apply - it can be trimmed to fit anywhere. Great for use in trucks, RVs, buses, cars, aircraft and homes. Available in two sizes with one or two foil sides. May be applied with Thermo-Tec's Heavy Duty Spray Adhesive for a long lasting install.

Part#	Desc.	UOM	Price
CH32772	48" x 72", one sided	each	59.99
CH32773	48" x 72", two sided	each	82.99
CH32774	24" x 48", one sided	each	32.99

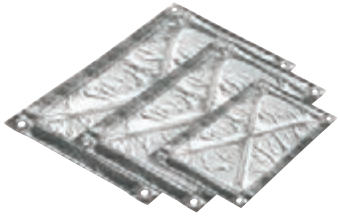


MADE IN THE USA

Cool-It Mat Insulation

Use the Cool-It Mat to battle excessive heat & noise that penetrate the driver compartment through the firewalls and floorboards. It is also perfect in doors, under hoods, and above transmission housings. The Cool-It Mat is composed of resin-bonded silica blanketing insulation sandwiched between a Mylar facing on one side and a foil facing on the other. The highly-reflective Mylar reflects heat up to 2000° Fahrenheit away from surfaces, while the foil side is orientated away from the heat source to conduct any penetrating heat across its surface thus providing the ultimate in heat protection. The silica blanketing is a dual-density composite and is the main sound insulator. It is easy to trim and can be applied with the push-in fasteners provided or any weather strip adhesive.

Part#	Desc.	UOM	Price
CH32770	24" x 48"	each	39.99
CH34838	24" x 50-ft.	each	454.99
CH32771	48" x 48"	each	79.99



MADE IN THE USA

Ultra-Lite Insulating Mats

The Ultra-Lite Insulating Mat was designed with the racer in mind. The new Heat Terminator is made of the highest-quality insulating materials available today. The material is made of a highly-textured aluminum composite surface on one side, with a high-temp silica felt center and a durable Mylar composite facing. The Heat Terminator uses Thermal Conduction Technology (TCT), developed by Thermo-Tec, and is available in six popular sizes.

HIGHLY HEAT REFLECTIVE

Adhesive backed and flame retardant

MADE IN THE USA

1961-77 Seam Tape

Seam Tape consists of a two layer, highly reflective foil with a special acrylic adhesive system. This flame retardant tape is highly puncture proof, tear resistant and features superior adhesion even under the most extreme conditions.

Part#	Desc.	UOM	Price
CH32750	2" x 30-ft.	each	23.99

NOTE: Not for use on exhaust components.

MADE IN THE USA

Adhesive-Backed Heat Barriers

The Adhesive Backed Heat Barrier can be used in a variety of applications to protect painted surfaces, plastic parts or any component from the damaging effects of radiant heat. Manufactured from woven silica with a flexible aluminized finish, the highly reflective surface of the material is capable of withstanding radiant temperatures up to 2000°F. The adhesive backing is able to withstand direct continuous temperatures up to 300°F.

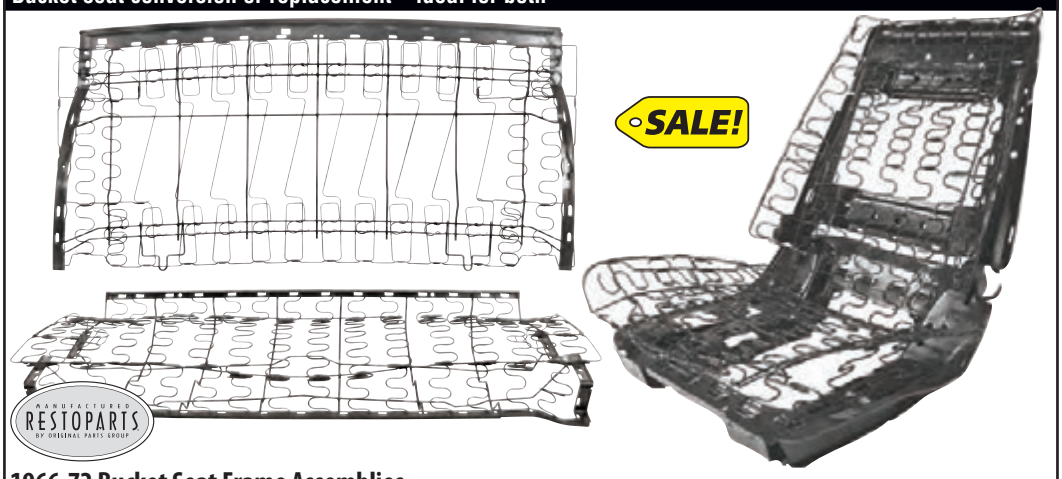
FULL ASSEMBLY IS IDENTICAL TO THE ORIGINALS!

Bucket seat conversion or replacement—ideal for both



1966-72 Bucket Seat Frame Assemblies

Whether replacing factory parts or converting to bucket seats, these new seat frames are the perfect solution. Identical to original factory frames, each seat is manufactured from heavy-duty steel and includes the springs for both back and bottom sections. Available for both driver and passenger side applications.

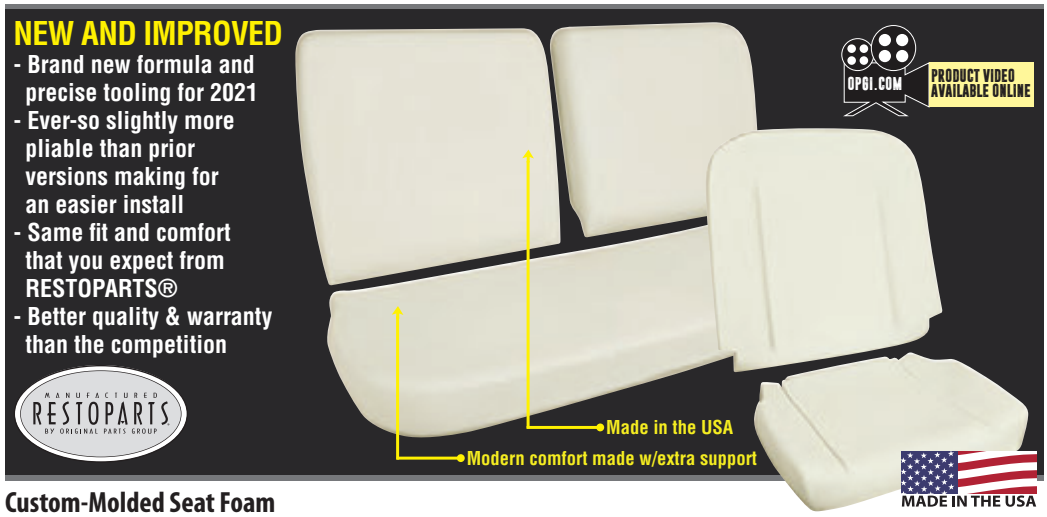
NEW AND IMPROVED

- Brand new formula and precise tooling for 2021
- Ever-so slightly more pliable than prior versions making for an easier install
- Same fit and comfort that you expect from RESTOPARTS®
- Better quality & warranty than the competition



Custom-Molded Seat Foam

We now offer both bench and bucket seat foam. If your existing seats have lost all or just some of their original shape, new seat upholstery will not make up for old, worn-out foam. Recapture the "factory-fresh" look and feel with this accurately reproduced seat foam set.

MORE COLORS AVAILABLE - 24/7 OPGI.COM OR TOLL-FREE 800.243.8355

1964-65

1964 Seville grain vinyl seat covers feature dielectrically formed pleats like the factory originals. In 1965, GM switched to Madrid grain vinyl for use in their A-Body cars. Guaranteed to match the GM originals down to the last detail, including the correctly weighted vinyl and authentically reproduced embossing. Automotive-grade vinyl assures you that you're getting the best quality anywhere!

1966-67

Features identically reproduced, double-stitched, insert pleats. However, it's not just what's on the surface that counts. Our 1966-67 GM A-Body sets also include the fabric-backed foam rubber necessary for the original "showroom" look. Factory Madrid grain vinyl is used throughout— Your satisfaction is guaranteed.

1968-69

1968 sets feature vertical insert pleats, while our 1969 seat sets feature the vertical "waffle" pattern, identical to the factory originals. Reproduced and manufactured with heavyweight Madrid grain vinyl. Each set is professionally sewn with the correctly patterned inserts; an important detail is the use of the correct color and proper thread weight in the production of these sets.

1970-72

These finely reproduced seat sets features the vertical dual "waffle" pattern insert for 1970 and rich Elk grain inserts for 1970-72, resembling hundreds of tiny. These are the most correctly reproduced sets for 1970-72 A-Bodies available anywhere. Heavyweight Madrid grain vinyl is used throughout. Don't settle for less, there is a difference. We guarantee your complete satisfaction.

'64-72 ORIGINAL-STYLE

SHOW-QUALITY

Distinctive Industries has been manufacturing interior products for the American muscle car since 1969. We still manufacture our products right here in America with the same passion and attention to detail that was used when these cars were new. The dielectric (heat sealed) detail on Distinctive Industries seat covers features unsurpassed detail and is true to the original GM patterns. Attention to detail, final assembly quality, correctness and durability are built into every product we manufacture, and the product truly is "Better by Design".

sparco MOTORSPORTS RACING AND ACCESSORIES

QRT Performance Seats

NEW!

The QRT Performance seat uses the same FIA approved race shell as the QRT-R race seat but is covered in Italian Leather and Alcantara and are handstitched in the Sparco OEM factory in Torino Italy. The QRT Performance has a unique CAD design that features a lower seating position that can fit a larger/taller driver with the exterior dimensions that can fit into smaller cockpits as well as 30% weight savings over other seats. The QRT Performance can hold the driver during extreme lateral forces, but is also comfortable for long road trips. The QRT Performance seat is FIA Approved.

COLORS AVAILABLE:
Black, black w/gray, black w/red or red

CH34308

EACH $1,499.99 PAIR $2,791.99

R333 Street Series Seats

NEW!

Drawing on our decades of racing history, Sparco has created an extensive line of street car seats that offer the ultimate in comfort and performance. Our ergonomic designs help cradle and protect the driver against even the most demanding lateral forces. The R333 is an ultra-modern street seat that offers excellent support and a revolutionary, futuristic style. Made from high-quality OEM style Brighton fabric, the R333 features detailed cut outs to reduce weight and offer an eye catching design and for added comfort, the R333 features a split thigh cushion.

COLORS AVAILABLE:
Black, black w/gray or black w/red

CH34309

EACH $575.99 PAIR $1,051.99

GT Street Series Seats

NEW!

The Sparco GT seat was designed for sport comfort. It features redesigned bolsters for greater support and new padding configurations for improved comfort. This seat features a removable headrest and the seat back can be reclined using the double adjuster lever. The outer bolsters are covered in durable synthetic leather and center is covered in soft touch micro suede for comfort. GT seats are compatible with 4-point harnesses.

CH34310

EACH $475.99 PAIR $903.99

R100 Street Series Seats

NEW!

Sparco has created an extensive line of street car seats that offer the ultimate in comfort and performance. Ergonomic designs help cradle and protect the driver against even the most demanding lateral forces. The R100 is Sparco's latest incarnation of groundbreaking steel-model seats. Features redesigned bolsters for greater support and new padding configurations for improved comfort. This seat can be reclined using the double adjuster lever. Made from a durable fabric, the R100 is available in single tone or duo-tone styles. Duo-tone styles feature contrasting side accenting and stitching to match any interior.

COLORS AVAILABLE: Black, black w/black

CH34311

EACH $331.99 PAIR $662.99

NEW! Seat Mounts

MADE IN THE USA

Sparco Seat Bases utilize the factory seat mounts on your vehicle's floor and provide a flat surface for mounting your Sparco seat.
All seat bases are vehicle specific and provide a 100% bolt-in installation.
The Street Series Sparco seat base for Street Performance seats is constructed with 3/16" thick steel to provide a strong flex-free mount and designed to work with the Seat Slider Track.
In addition to the mounting holes provided for standard bolt-on installation, the Sparco base has a wide metal platform to allow custom mounting if a slider is not utilized (drilling required).
This direct installation is an option for race vehicles where the lowest seat position is desired. Each base is powder coated in a black wrinkle finish and sold individually for one seat

'67-72 CUTLASS

CH24816

1967-72 Seat Belt Retractor Covers

These molded ABS plastic retractor covers are identical to the original equipment and feature the correct grain pattern for authenticity. Covers are available for a variety of applications based on the stamped named on the original equipment. Sold per pair. Available in black only – paint-to-match.

Part#	Year	Desc.	UOM	Price
CH24816	67-70	RCF - 300 (5.1x2.8x2.4)	pair	49.99
CH28012	68-72	Robbins 6715 (3.7x2x2.2)...	pair	59.99
CH28011	69-72	RCF - 400 (4.5x3.5x3.5)	pair	52.99

NOTE: Part #'s CH28011 and CH28012 are only correct for early 1972 models without the warning buzzer. These are not correct replacements for the large style cover.

'68-69 CUTLASS

1968-69 Seat Belt Retractor Knob

This reproduction black plastic knob covers the exposed red end of the seat belt retractor. A small part, but essential for the "factory-fresh" look.

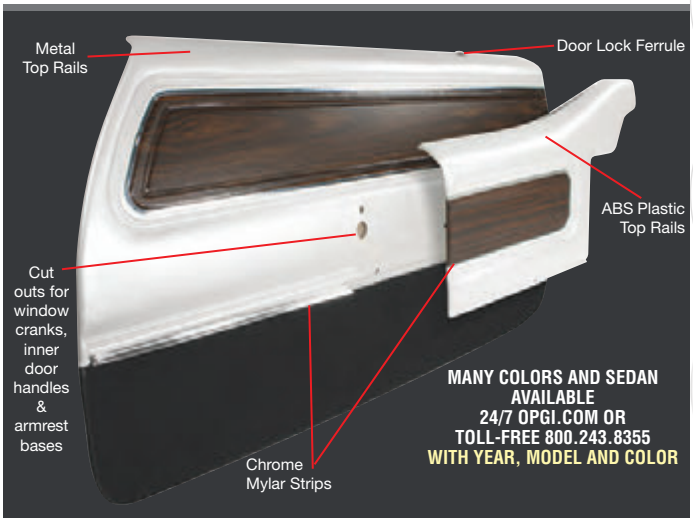
ASSEMBLED DOOR PANELS

SIMPLIFY YOUR INSTALLATION!



Our pre-assembled door panels are ready to install right out of the box. Each panel is professionally assembled with moldings, seals, bezels and top rails where applicable. Panels are available from multiple manufacturers in your choice of original interior colors. Remember to order our exact reproduction water shields to protect your panels and extend their lifespan. Each shield is die-cut to factory specifications using authentic "wax-like" paper, and features the correctly located holes for door and window cranks.

SHOW-QUALITY

Distinctive Industries has been manufacturing interior products for the American muscle car since 1969. We still manufacture our products right here in America with the same passion and attention to detail that was used when these cars were new. The dielectric (heat sealed) detail on Distinctive Industries seat covers features unsurpassed detail and is true to the original GM patterns. Attention to detail, final assembly quality, correctness and durability are built into every product we manufacture, and the product truly is "Better by Design".

Pre-Cut Door & Inner Quarter Panel Sound Deadener & Insulation Kits

Flatline Barriers pre-cut kits provide the sound solution you've been looking for. Manufactured from dense butyl rubber and backed with a silver foil lining, these insulation and sound damping kits eliminate noise and vibration, creating a more enjoyable driving experience. Whether you need a shield from unwanted heat, a way to prevent unwanted noise from your roof, doors or trunk, or enhance the acoustics of your new sound system, these kits get the job done. Pre-punches accessory holes and sticky adhesive backing make installation hassle-free. Each product meets federal safety standards for flammability.

METICULOUSLY REPRODUCED TO FACTORY SPECIFICATIONS

Features genuine Oldsmobile rocket logo

1967-75 Oldsmobile Sun Visor Vanity Mirror

This vanity mirror is an exact reproduction of an original accessory available to all 1967-75 Oldsmobile owners. The mirror face features an etched Oldsmobile rocket logo and installs to the passenger side sun visor using the supplied detailed instructions.

Part#	Year	Desc.	UOM	Price

Sun Visor Vanity Mirror

The passenger side sun visor vanity mirror was an option for many GM vehicles. This quality reproduction measures 7" x 3-1/4" and has push-in snap buttons on back that are spaced 4-7/8" apart. Snap button receivers are not included and therefore this mirror is for visors with existing vanity mirror only. Since GM had several different styles of this mirror, appearance may differ from original.

Part#	Year	Desc.	UOM	Price

NOTE: Does not include snap button receivers

CREATES A SMOOTH TRANSITION FROM LIGHT TO DARK

Easily connects to your existing dome light

Deluxe Dome Light Dimmer Kit

Using the same technology as today's luxury vehicles, this easy-to-install kit allows your dome light to stay on for several seconds before it fades out, rather than simply shutting off and going dark. Complete with installation instructions, the dimmer kit can be installed to perform several duties to suit your needs, such as slowly brightening when doors open and extended light delay when power is off.

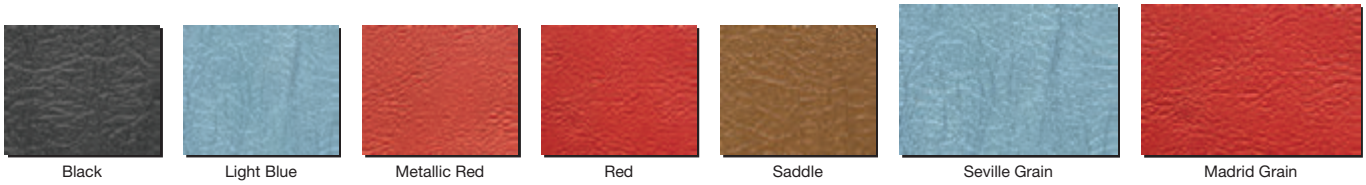
THE VERY BEST ON THE MARKET!

There is simply no comparison between RESTOPARTS® premium brand dash pads and others.

Dash Pad

Glove Box Door



Black | Light Blue | Metallic Red | Red | Saddle | Seville Grain | Madrid Grain

MORE COLORS AVAILABLE 24/7 OPGI.COM OR CALL US TOLL-FREE 800.243.8355 WITH YOUR YEAR, MAKE, MODEL AND CHOICE OF COLOR

1964-67 Original Style Dash Pad & Glove Box Door Kits

RESTOPARTS® brand remains the 'Rolls Royce' of dash pads. In the past few years, inferior pads have come to the market, and although pricing is similar, there are significant differences in quality, fit, and finish. A major difference is that RESTOPARTS® pads are produced the right way utilizing a steel inner core (like the GM factory originals), which ensures an exact, consistent fit every time, unlike competitor versions that cut corners using cheap fiberglass cores. Using fiberglass is less expensive, but it is often inconsistent so by nature will vary in fitment and quality.

OPGI.COM PRODUCT VIDEO AVAILABLE ONLINE

- RESTOPARTS® Dash Pads are produced the right way using carefully researched Madrid grains and textures as General Motors did back in the day.
- RESTOPARTS® pads include companion mounting hardware as well, while others do not.
- RESTOPARTS® dash pads carry an extended 12 month warranty, while others do not.
- RESTOPARTS® dash pads feature a factory correct steel inner core, while competitor versions use an inconsistent fiberglass core.
- RESTOPARTS® dash pads feature an extended 12 month warranty, and you can be sure that we stand firmly behind the quality, fit and appearance.

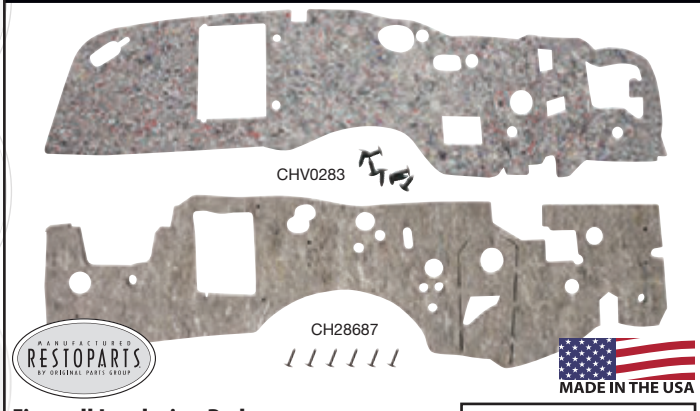
FLAWLESS CRAFTSMANSHIP

This jute-backed, heat-resistant pad comes complete with a stamped rubber backing. Identical to the factory originals in fit and function



Firewall Insulation Pad

This pad runs the length of the firewall in the interior and behind the dash. This will help eliminate much of the engine noise caused by dried-out existing insulation. The pad features heavy-duty jute insulation with a stamped rubber underside for a snug fit. Guaranteed by OPGI to be the best the market has to offer. Includes correct mounting grommets.

1969-72 Wood Grain Dash Inserts
These correctly reproduced wood grain dash kits have inserts that cover the instrument cluster, radio and the glove box in the correct vinyl overlay laminated to steel. 1968 is the exception as it uses a real walnut insert with a mahogany finish. They are available for all models with and without cruise control and even radio delete for 1970-72.

AUTOMETER HIGH-PERFORMANCE GAUGES

AutoMeter products come from a long line of racing history. When engines were becoming more powerful, in turn, they revved faster, created more heat, and demanded more out of the vehicle. Factory instruments were unable to keep up with the need of the racers. In 1957, AutoMeter was founded on the fastest, most accurate tachometer ever designed. Able to keep with the revs and provide unparalleled accuracy, the AutoMeter tachometer was widely accepted in the cockpits of the fastest race cars. Through the years, AutoMeter honed this technology to continuously improve all products. AutoMeter Products, Inc. is the worldwide leader in performance instrumentation.

1968-72 Cutlass Rally Gauge Pack

Original style Rally Pack Gauges have been reproduced for all 1968-72 Cutlass models. The pack consists of the oil, fuel and water temperature gauge as well as a superior reproduction of the factory "tick-tock-tach," which is a combination of the tachometer and clock. While designed to replace OE Rally Pack Gauges, these may also be used to convert from a warning light dash, which will require additional wiring available separately (part# CT2502 and CT2503). Available for 1968-69 as well as 1970-72 Cutlass, 4-4-2 and Hurst/Olds.

Dakota Digital NEW!

Interface Module

Output your gauge information direct from the OBD-II/CAN or aftermarket EFI CAN connection to your Dakota Digital HDX, RTX, VFD3 or VHX Gauges.

For factory computers with OBD-II(J1850/ CAN OBD protocols only) the interface module allows you to directly plug into the engine diagnostic port which allows you to extract engine & transmission information from the vehicles computer(ECM). The interface collects and outputs for most vehicles the speedometer, tachometer, engine temperature and check engine indicator. It can also potentially, depending on application, collect and output intake air temperature, transmission temperature, ambient air temperature, gear position, oil pressure and boost pressure. The module is compatible with OBDII protocols SAE J1850 VPW, SAE J1850 PWM and ISO 15765 CAN 500k 11 bit identifiers that follow the SAE J1979 PID protocol. The module will not collect and output gear position data for GM Connect & Cruise packages because it's not transmitted from that system.

The AEM interface module is a direct plug-in using the supplied 4 pin harness for simple connection to the AEM CAN bus (AEMnet) system that is used by the AEM Infinity ECU, Series 2 EMS & EMS-4 kits. The interface module will potentially collect and output speedometer, tachometer, engine temperature, oil pressure, fuel pressure, air/fuel ratio, intake air temperature, boost, transmission temperature and check engine indicator. The outputs are dependent on what is available from the AEM system.

The Edelbrock interface module works with the dedicated DB9 CAN connection plug on the main harness of the Pro-Flo EFI Kits. The interface module will potentially collect and output tachometer, engine temperature, intake air temperature, fuel pressure, air/fuel ratio, MAP and boost. The outputs are dependent on what is available from the Edelbrock system.

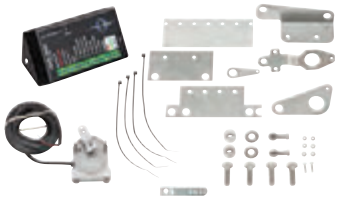
The Holley interface module is a direct plug-in using the supplied 2 or 4 pin harness to the Holley Terminator (including the X and X Max), HP, Sniper or Dominator EFI kits. The interface module will potentially collect and output tachometer, engine temperature, intake/manifold temperature, fuel pressure and air/fuel ratio. There may also be available speedometer, oil pressure and boost. These outputs are dependent on what is available from the Holley system.

The MSD interface module is a direct plug-in using the supplied y-adaptor for the MSD Atomic TBI EFI Kits. The interface module will potentially collect and output tachometer, engine temperature, intake/manifold temperature, fuel pressure and air/fuel ratio. There may also be available oil pressure. These outputs are dependent on what is available from the MSD Atomic TBI system. The interface module isn't compatible with the Atomic LS EFI.

Part#	Year	Desc.	UOM	Price
DDBIM01	61-77	.....	each	104.99

NOTE1: The interface works with HDX, RTX, VFD3 & VHX gauges with the black plastic modules. The earlier aluminum modules will not work with the interface. NOTE2: Dakota Digital cannot guarantee the presence or accuracy of the outputs since this is a function of the computer (ECM) or aftermarket system and matching OEM or aftermarket functional sensors.

ALWAYS KNOW WHAT GEAR YOU'RE IN



Dakota Digital MADE IN THE USA

1961-77 Gear Shift Sending Unit

This new generation of the gear-shift position system from Dakota Digital. They've minimized the decoder (the brain of the system). That new smaller size with inboard terminals allows for easier installation. Able to be used with a Dakota Digital instrument system or on its own, this versatile unit can relay transmission gear positions to a VFD, VHX, HDX or RTX instrument system, as well as the DGS-series of standalone indicators.

- Built-in outputs for reverse lights (up to 15 amps) and neutral safety switch (with supplied 30amp relay).
- Easy setup and calibration.
- User-calibrated for 2-4 forward gears plus Park, Reverse and Neutral.
- Stainless steel and aluminum mounting hardware included for a variety of transmissions.

Includes: Mounting hardware included to fit automatic transmissions including GM TH350, TH400, 700R4 and 4L60/70.

1961-77 Electronic Cable Speedometer Drive

The missing link between your cable-driven speedometer and late model electronic transmission! Measuring 5 1/2" x 3 1/2" x 2", this drive unit allows the use of a mechanical-cable speedometer to be used in conjunction with a modern drivetrain which provides only an electronic output. 36" cable available for GM thread-on & GM clip-on style speedometers. Powerful motor is quiet enough to mount the module inside the cabin. Waterproofed case can also be mounted under the hood, or even inside a fenderwell. Bluetooth-enabled to sync with available mobile app for stone-simple set up. Supplied programming switch and LED readout make setup easy. For OBD II equipped vehicles, the supplied pigtail will easily plug into the DLC, simplifying the wiring connections. The PID control of the cable speed provides quick, smooth operation and prevents overdriving or damaging the speedometer needle. Consider this the most precise and easiest to use cable-drive unit on the market!

USE WITH ANY GAUGE

Corrects fuel gauge and sending unit mismatch.

Fuel Link Gauge Adapter

Whether you are using an aftermarket fuel gauge or have installed a fuel injection tank with a different sending unit than the original, this unit will correct the signal difference and allow any gauge to work with any fuel sending unit. Its compact size and labeled wire terminals make the Fuel Link from Classic Instruments easy to install while the pushbutton programmability with LED readout allows for simple use. Extra features include signal damping to prevent unnecessary needle movement as well as the option to trigger a low fuel warning light at 1/8 tank (light not included). A simple solution to inaccurate fuel gauges.

Now you can have high RPM memory recall on your factory or aftermarket tachometer. Designed to work with any electric tachometer and also on your factory electronic tachometer. Simply connect the little black box in between your existing tachometer and the tachometer signal from your ignition. The microprocessor monitors each incoming tachometer signal and saves the highest reading. In normal mode, the microprocessor simply sends the incoming tachometer signal straight to your tachometer, but when you press the button, the microprocessor recalls and sends the highest signal to your tachometer instead of the one coming from the ignition. This product includes a lifetime warranty, and this product is made in the USA!

GPS Speedometer Sending Unit
The Intellitronix GPS Speedometer Sending Unit offers high-accuracy readouts and can be wired directly into your existing speedometer with a simple 3 wire hookup! The Intellitronix GPS Speedometer Sending Unit easily connects to your existing speedometer, allowing for precise readings that you will not get with any other speed sending unit. Our GPS Speedometer works with any industry standard 4000, 8000 or 16000 pulse per mile or programmable speedometer. It can be wired directly into your existing speedometer and needs no additional sensor from the transmission to operate. The unit comes with a GPS receiver, omni-directional 4 ½ ft. antenna, and microprocessor that continuously converts GPS signals into a pulse stream that then replicate the output from you existing, mechanical speed sensor but with GPS accuracy. This combination of GPS technology and our own innovative engineering and electrical design allows for high-accuracy readouts. You do not have to worry about inaccuracies due to changes like different tire sizes or rear end gear ratios ever again!

1961-77 Drinkster Consoles

The BD Drinkster Bench Seat consoles are universal consoles that are available in two sizes. These consoles rest on top of any bench seat but are particularly suited for narrower cars and trucks with limited seating space. Both sizes share the same 6 3/4 inch width but differ in length only. The contoured bottom is uniquely shaped to match the general profile of bench seats, resulting in a very comfortable and ergonomically correct position for the driver's arm. An additional benefit to this unique shape is properly aligned drink holders for maximum stability and ease of use. Standard features include two medium drink holders, comfortable padded armrest, under-lid storage compartment and a simple but effective strapping system that can optionally be used to provide more stability with less movement to your console while driving.

– The BD Drinkster is longer and uses the entire depth of the seat (front-to-back) and in some cases will slightly hang over the front edge. For this reason, the BD Drinkster works best in vehicles where the automatic transmission selector is located on the steering column. Measures: 8-1/4" w x 7" h x 17-1/4" d

– The BD Shorty Drinkster works best on bench seats with less depth (measured front to back). If you have a manual transmission with a shift handle/knob that comes close to touching the front of your seat then this console is a great option for you. Measures: 8-1/4" w x 7" h x 12-3/4" d

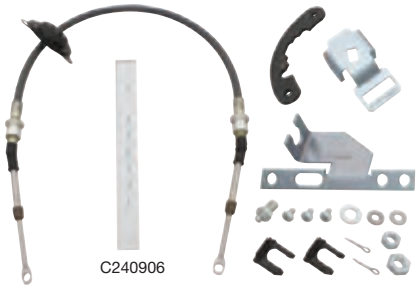
A QUALITY, CUSTOMIZED SOLUTION

Professionally manufactured kit makes it easy!



C240906

Shift Conversion Kits

Whether you're converting from a 2-speed or 3-speed automatic transmission to a 3-speed or 4-speed OD automatic, these kits will allow you to use your stock console and shifter. In the 1965-66 conversion kit, you convert from a rod shifter linkage to a cable shift linkage with all of the parts, including the cable, available from OPGI.

When converting from a 2-speed console shifter to a TH350/TH400 3-speed automatic in 1967-69 cars, or converting a 3-speed console shifter in the 1967-72 cars to a 4-speed overdrive 200-4R, 700-R4 or 4L60 transmission, it includes a new shift detent and lens as part of the kit. The 1970-77 conversion kits are for vehicles converting to 700-R4, 200-4R and 4L60 transmissions. 1970-72 models are for dual-gate shifters only. All hardware and cables are included for the most comprehensive kit on the market.

SMOOTH SOLID LINKAGE OPERATION
Top-quality craftsmanship throughout

1961-77 Floor Mounted Automatic Shifter
Add a subtle custom look to your interior with a floor mounted shifter from Lokar. These shifters are manufactured to premium quality standards to ensure proper function and a long life. The solid linkage utilizes adjustable rod ends which eliminate the need for a cumbersome cable. Standard shifters feature a chrome finish with a satin mushroom knob, while Midnight series shifters feature a black powder coated finish and black mushroom knob. Shifters are available in either 8" or 16" height and can be purchased in either straight or curved configurations to accommodate your interior style. These shifters are the perfect complement to any interior and can be mounted inside a console, or direct to the floor. Neutral safety switch is included with every shifter, while shift boots and custom knobs are sold separately.

Super-Duty Race Shifter Cable

These super-duty 5-foot race shift cables are the highest quality available. They have rotary swaged ends with an eyelet on one end and a threaded stud on the other, with double jam nuts and internal locking washers for mounting. They're pre-lubed, have a 0.375" O.D. red "long lay" outer jacket for greater cable protection and have less than 0.015" backlash per foot, which means you'll get almost instantaneous gear engagement when shifting. These super-duty shift cables have up to 50% less backlash than some competitor's cable and the 5-foot length is what comes standard with all B&M race shifters.

Part#	Desc.	UOM	Price
CH25898	.....	each	84.99

NOTE: Works on most B&M shifters except the Unimatic.

Unimatic Shifter Cable

These "Unimatic" 5-foot shifter cables are high-quality and made to fit all B&M Unimatic shifters. They have swaged-on ends with a threaded stud on each with double jam nuts and internal locking washers for mounting. They're pre-lubed, have a 0.250" O.D. "long lay" outer jacket for cable protection and is accurately clearanced for proper backlash, meaning you get positive gear engagement when shifting. The 5-foot cable comes standard with all B&M Unimatic shifters.

Part#	Desc.	UOM	Price
CH25901	.....	each	47.99

Performance Shifter Cables

These Performance 5-foot street shift cables are high-quality and are made to fit all B&M shifters (except race shifters, the Unimatic and the console Quicksilver shifter) manufactured from 1981 to the present. They have swaged ends with an eyelet on one end with a threaded stud on the other, with double jam nuts and internal locking washers for mounting. They're pre-lubed, have a 0.250" O.D. "long lay" outer jacket for cable protection and is accurately clearanced for proper backlash meaning you get positive gear engagement when shifting. The Performance shift cables come in the 5-foot length and come standard with all B&M street shifters.

Part#	Desc.	UOM	Price
CH25899	.....	each	74.99

NOTE: Works on most B&M shifters except for the Unimatic and the Quicksilver (with console) series shifters.

Please refer to OPGI.COM for the most current pricing.

MADE IN THE USA

AMERICAN POWERTRAIN

FREE SHIPPING ON THIS ITEM

1964-72 White Lightning Shifters

OPGI now offers these White Lightning shifters from American Powertrain. These shifters feature a billet aluminum base plate and tower as well as the billet steel core which means they are built for longevity and excellent fitment. The White Lightning shifters also include an independent bias adjustment for improved centering and smoother operation of the 2-3 shift by simply turning a screw to your desired setting. Also, these shifters feature a low-profile design for increased tunnel clearance, but they also allow for factory consoles to be used and avoid modification of those consoles. Better than any of these great features, the White Lightning shifters are made right here in the U.S.A. so quality is better than anything else on the market!

Part#	Desc.	UOM	Price
TKO

1964-77 Accelerator Pedal Pad

A new accelerator pedal pad from OPGI is an excellent finish detail to your interior restoration. For 1964-67 Cutlass models, our pedal is an exact reproduction of original equipment including the correct metal inner structure with a molded rubber outer. Other features such as the vertical ribs and factory ball stud mounts make this an excellent choice. The 1968-77 accelerator pedal is an authentic reproduction pad featuring top-quality injection-molded plastic construction and original pin and spring mounting for a hassle-free installation. Pedal pads are sold per each.

NEW!
USA-230 Stereo

Custom Autosound's USA-230 is an excellent choice for classic car or truck enthusiasts looking for a more affordable radio without sacrificing quality electronics and a classic stereo look. It has been designed to fit in the stock dash without any modifications required. The USA-230 has the same appearance and all of the features offered in the USA-630 model simply without USB port, iPod dock and CD changer control. The USA-230 does provide an auxiliary input which can connect to iPods, iPhones, satellite radio tuners or any other device with a headphone jack. It also boasts 4 Channel RCA pre-outs and a digital display with electronic tuner, 16 station pre-sets and a 4-way fader.

STEREO FEATURES INCLUDE:

AM/FM Radio, 200 Watts, AUX Input for connecting, iPod/Satellite/Portable Player, Separate Bass & Treble, Front / Rear Fader, 4 Channel RCA Pre-Outs, Digital Clock, 12 FM / 4 AM Pre-sets, USA/Euro Tuner, Auto Antenna Lead and Electronic Volume / Tuning Controls

USA-630 Stereo

Custom Autosound's USA-630 is designed to provide the best in audio technology wrapped in a classic car stereo look. It will fit your car or truck's stock dash without any modifications required. It has been designed with a bezel containing your car's manufacturer logo as well as large OEM style push-buttons to compliment your dash. When it comes to electronics the USA-630 boasts modern features like a USB input for flash drives to playback MP3/WMA song files and a dock for your iPod. When connected to these devices the radio's digital display will show artist, song, album titles and allow song navigation through the radio itself. With 300 watts peak the radio provides plenty of power but additionally contains four RCA pre-outs for optional amplifiers. It also comes with Auxiliary inputs for satellite radio tuners, iPhones or any portable player you may wish to use.

STEREO FEATURES INCLUDE:

AM/FM / USB flash drive player, Direct CD controller, 240 watts (4x60), USB interface plays MP3/WMA files, Alpha-numeric display for MP3/WMA files, 4 channel RCA pre-outs, Auxiliary input (RCA rear-1/8" pin jack included), Separate bass and treble controls, Front and rear fader, Digital clock, 12 FM/4 AM pre-sets, USA/Euro tuner, Auto antenna lead and Electronic volume/tuning controls

USA-740 Stereo

The USA-740 offers the same classic look that Custom Autosound has always been known for with today's latest features. Now, with built-in Bluetooth (microphone included). A solid 300-watt peak power should be all the juice you need, yet the USA-740 has Hi 4volt, 4channel RCA Pre-outs and a Subwoofer RCA pre-out for additional amplifiers. The USB input for playback of MP3/WMA/FLAC/WAV song files. A front mini jack auxiliary audio input and a rear RCA auxiliary audio input provide versatility for options like satellite radio, I-pod or any portable player you wish to use. Match the dominant color of your instrument cluster with user selectable multiple LCD color choices with LCD dimmer control. The AM/FM RDS tuner shows station, song and artist on the LCD display. For those of us committed to music collections on compact disc.

STEREO FEATURES INCLUDE:

AM/FM RDSTuner w/ 25pre-sets, RDS Tuner shows station/song/artist on LCD Display,
Two Aux-inputs: Mini Jack front, RCA Rear, Alpha Numeric Display for MP3/WMA/FLAC/WAV Electronic Tuning & Volume Control, Last number Memory, Clock or Function Display (switchable), Bluetooth and Remote Microphone, USB Port for Flash Drive, MP3/WMA/FLAC/WAV/Playback, Direct CD-1, LCD Dimmer Control, 300 Watts Peak 2-Ohm stable, 7 LCD color Choices, LCD Dimmer Control, Digital Clock, DSP EQ and Power Antenna Lead

STREAM MUSIC FROM ANY BLUETOOTH DEVICE

Powerful 180 Watt output

1961-77 Vintage Car Audio Bluetooth Amplifier

Eliminate the cords and stream music from your phone or any other Bluetooth enabled device with this new amplifier from OPGI. The compact amp measures 5"x5"x2" which allows for a hidden installation under the dash or wherever is convenient for you as the amp has a 30-foot range. Each amp puts out 180 Watts of power using 4-channels at 45 Watts each. The amp features auxiliary input, pre-amp input, and the capability of working with or without a radio as well as with 2 or 4 speakers. The amp has current sensing inputs and will automatically mute for incoming calls when used with your phone. This must-have device is the perfect solution for all of your music needs.

DIRECT REPLACEMENT WILL BOLT RIGHT UP

Functions just like the factory originals

CTP647M

Convertible Top Motor Assembly

Our motor and pump assembly is designed as a direct replacement. Your existing reservoir may be used with the new gaskets provided.

Part#	Year	Desc.	UOM	Price
CE15716	62-63	3-hole ..	each	245.99
CE11506	62-63	4-hole ..	each	363.99
CH27365	64-66	4-hole ..	each	305.99
CTP647M	67-72	3-hole ..	each	298.99

NOTE1: Please look at your original pump and motor to see if you need a 3-hole or 4-hole mounting pattern. NOTE2: Motors carry a 5-year manufacturer warranty. Warranty is void if fluid other than ATF is used.

Convertible Top Pump Fill Plug

This molded rubber plug is identical to original equipment used on convertible models. The plug pushes into place and keeps the fluid from escaping the system.

Part#	Year	Desc.	UOM	Price
CH30528	62-72	.....	each	13.99

1964-70 Hydraulic Pump Steel Ball Kit

These steel balls reside in the pump and close off ports so one side vacuums the fluid in and the other port side pushes the fluid out. A necessary replacement for proper port function. Sold as a four-piece kit.

LONG-LASTING AND GUARANTEED BEST QUALITY

- Authentic Levant grain vinyl
- Pre-cut for an easy installation
- 1964-72 dual-seamed, 1973-76 single-seamed (like factory original)

MADE IN THE USA

1964-76 Cutlass/4-4-2 Vinyl Tops

Each vinyl top is created utilizing the dielectric heat-sealing method, which is an exact factory duplication of the original GM vinyl tops. Why settle for something close? These have been installed in thousands of cars since the early 1980's when we began selling them. The most original vinyl tops on the market continue to be a mainstay in the restoration market. Available in black or white—please specify when ordering.

B&M

1961-77 Hurst Equipped Emblem
This is an exact replica of the "Hurst Equipped" emblem that was installed on many vehicles throughout the 1960s. With so many vehicle owners installing Hurst Performance Products, what a better way to identify your vehicle than by attaching an emblem to your car. With an adhesive 3M backing, this emblem is perfect for fenders, quarter panels, trunk lids or dash panels. Emblems sold per each.

1961-77 Decal & Graphics Preparation

CH31705

CH31704

CH31706

Surface preparation is key when installing decals and graphics on your vehicle. OPGI has several products that will help you achieve professional results ensuring your vehicle looks great for years to come. PRE-APP eliminates wax, oil and dirt providing a smooth and clean surface to begin with. SLIDE-ON resists drying and allows movement of the decal for proper placement. Once the squeegee is applied, the decal adhesives be allowed to "set-up". SLIDE-OVER UV protectant shields your decals from fading while repelling dust, dirt and oils. Unlike petroleum based products, it does not attract dust or draw moisture out of the decal. These products are a must-have when installing decals or graphics on your vehicle.

XENON OR HALOGEN

Outstanding Delta-Tech brand is a modern, powerful wonder!

High-Performance Headlights

Convert your standard low power headlights over to the ultra-bright halogen or Xenon headlights used in all the high-end European luxury cars. The Delta Tech conversions replace 1961-75 using four 5-3/4" round lights. Besides the powerful bulbs, the other reason these conversions provide so much light is the use of a lead crystal lens and a specially-finished parabolic reflector. The Delta Tech headlight conversions are an easy bolt-in for more light and improved safety. Delta Tech also offers a DRL (Daytime Running Lights) conversion for increased safety on 7" round headlights for your classic. It's an easy conversion and requires only minor modifications.

Part#	Year	Desc.	UOM	Price
Halogen				
CH25274	61-72	H-4 bulb....	pair	25.99
Xenon				
CH25130	61-72	high 5-3/4"	pair	121.99

CH25136	73-75	high/low 7" w/DRL.....	pair	119.99
CH25275	61-72	H-4 bulb....	pair	26.99

NOTE1: X=Halogen, Hi=Hi beam, Hi-Lo=High and Low Beam. NOTE2: When converting to a DRL (Daytime Running Lights) system, you have to drill a 1" hole in the headlight mounting bucket. When converting to a 5-3/4" diameter system, you may have to drill a 2" diameter hole in the core support for lamp clearance due to the 1" deeper lamp.

Please refer to OPGI.COM for the most current pricing.

CH30742

MADE IN THE USA

LED Headlights

These powerful light assemblies feature modern LED technology combined with a prismatic crystal lens and parabolic housing to produce unmatched power, clarity and light. Rated at 1900 Lumens, the lamps draw only 2 amps of power, making them extremely efficient. Includes detailed instructions to aid installation.

Part#	Desc.	UOM	Price

1961-77 Halo Headlights

Made in the USA to ensure quality, these lights feature a superior parabolic reflector and crystal lens that maximize light output and help to increase visibility. Available with 55-watt Xenon or 25-watt LED main bulbs, each light is equipped with a low-watt LED halo that doubles as a daytime running light and a nighttime custom accent. All lights are sold as a pair and include detailed instructions for a straightforward installation.

CH30848	high/low, 5-3/4"	pair	345.99
CH30842	high/low, 7".....	pair	372.99

NOTE: Due to their design, a minimum of 5" of clearance is required behind the headlight lens.

Switchback Halo LED Headlights

The "Switchback Halo " LED headlamps act as both Daytime Running Lamps and Turn Signals. The white DRL halo switches to amber blinker halo when the turn signal is activated, and then switches back to white DRL halo when the turn signal is canceled. The 'City Lights' option has additional pop and style that will make people stop and notice your ride. They have a mini bulb mounted through the reflector just below the main headlight lamp. They can be tapped in with daytime running lights, parking lights, or turn signals. Wiring harness is not included, but is available. The LED for all headlights produces 4,000 Lumen or 160Lm/watt of light power at a near daylight color temperature of 6,000 Kelvin. Rated at 22,000 operating hours, they are also very energy efficient, drawing only 2 Amps at 25 Watt. DELTA Headlights feature replaceable components for complete serviceability. Protected by limited 5-yr warranty.

In the box:
(2) HALO headlight assemblies
(2) H4 LEDs (4,000LM 25W 2 Amp)
(2) LED Amber Lights with Sockets (City Lights Only)
(2) Halo wire harness
(2) Silicone boots

LED Conversion Headlight Bulbs

These lights from Oracle are the only DOT Compliant "Street Legal" LED Headlight Conversion Available. FIRST 6-Volt Daytime Running Light Compatible LED Bulb Available. LED Bulb features Precision Filament Geometry for no-Glare Illumination. No Fan, Head-Sink, or other obstructing/ cumbersome cooling system. Physically matches original bulb for OEM fitment and easy DIY installation. The V-Series bulbs feature Flip-Chip Scale LED packaging. The advantages of flip-chip technology are multiple: it provides enhanced electrical performance over standard wirebond technology, allows for a smaller form factor due to increased routing density, and eliminates wire-bond loops. V-Series LED bulbs offer even more compatibility by working with vehicles that use the headlight bulb for the DRL function at a reduced voltage. The class-leading 6-32V ultra-wide range voltage protection will allow these LED bulbs to be used in Daytime Running Light Applications without common flicker issues. The V-Series bulb will din to 50% brightness in DRL mode just like the factory halogen bulb. LED Headlight bulbs have relied on passive thermal management systems such as large heat sinks, metal ribbons, or loud cooling fans. These methods can be unreliable and almost always make the installation process more difficult and time consuming for the installer. ORACLE Lighting's new V-Series bulbs feature our SmartDrive™ Active Thermal Regulation (ATR) temperature management. The integrated constant current linear LED driver inside the bulb uses a system called "thermal foldback" to protect the LEDs and the bulb components.

S3: ORACLE Lighting S3 LED Conversion Bulbs Instantly provide 3200 Lumens of Crystal Clear 6000K light output. The electronic components of the S3 Headlight bulbs are housed in a sealed waterproof heat-sink design, eliminating the need for external drivers and cooling fans. The CSP (Chip Scale Package) LED Chip Design features a small package size but high intensity volume per unit with less heat value resulting in industry-leading Luminous Efficacy (science talk for "Best Bang for your Buck"). This new low-profile design reduces common bulb fitment issues for an easy Plug & Play DIY installation.

High Output: These new high-output LED Headlight bulbs create a 4,000+ Lm blanket of light for the driver to increase safety and nighttime visibility. Philips Luxeon ZES chips allow for the increased Lumen output while still drawing less than half the power of the factory headlight bulb. These smaller chips also have excellent heat dissipation characteristics, making them extremely reliable even in harsh environments. The new internal driver components were designed by Samsung and offer excellent performance in a smaller package. The new adjustable heat sink makes fitment issues a thing of the past since it is removable to reverse install or mount outside the headlight back-cap for added adaptability. More illumination, increased reliability, and easier installation.

ORACLE LIGHTING MADE IN THE USA

Sealed Beam Headlights

ORACLE Lighting Sealed Beam Headlights are a great way to add modern styling to your classic car! SMD Halos are pre-installed into the composite reflector housing with glass lens, just connect your wires to a 12V power source. These lights work great with any of the wide selection of ORACLE Lighting switches and controllers for easier installation. We also recommend the ORACLE H4 LED Headlight Bulbs as a great addition to these headlights for additional light output and visibility without blinding other drivers. Accepts H4 Bulb (Sold Separately). 1 year full replacement warranty. Amber Halos can be used as turn signals. blue, green, red, or UV/purple are intended for show use only. Easy installation, wire directly to 12V source. No external inverter or regulator required.

REPLACE WELDED STUDS

1961-77 Window Molding Clip Screws
Some cars used these screws to hold the clip to the body. However, if you had the stud welded-on and now it's missing, this screw will work on that too. Sold as a twenty-piece kit.

Part#	Year	Desc.	UOM	Price
CH2201	61-77		KIT	12.99

1961-77 Molding Clip Remover
Used to remove molding clips on all American cars. Tool lays flat on the glass and slides under the moldings to find clips and release their grip. A must for saving hard-to-find, or sometimes irreplaceable moldings and clips.

Part#	Year	Desc.	UOM	Price
CVT0039	61-77		each	12.99

THE FINEST MIRRORS, BROUGHT TO YOU BY RESTOPARTS®

Manufactured in precision-stamping dies just like the factory originals. Stainless steel backing finely replicates the original "mirror-like" finish. Hardened zinc die-cast attachment and end ball ensures that the mirror stays in place. Don't take a chance on others in the market that have been known to loosen over time, we guarantee ours. Mirrors are also professionally assembled and checked for quality at the factory then rechecked again before shipping. The 10-1/8" and 11-1/2" mirrors are available with your choice of black or gray rubber protective ring.

NEW! Inside Rearview Mirror Kits

Features the correct mirror support bracket, mirror mounting screw, and rearview mirror. Available in a variety of choices.

IN SEVERAL FINISHES!

CNC-machined billet aluminum

MADE IN THE USA

Billet Aluminum Inside Rearview Mirrors

Custom interior mirrors are manufactured from 6061-T6 billet aluminum to achieve a consistent appearance, fit and function. Mirrors feature convex glass and an adjustable pivot to enhance your field of vision and ensure stability while driving. Mirrors measure 9" x 2-1/2" x 1" and are available in two styles, and several finishes. Choose the stem mount to fit the mirror to your original mirror mount bracket, or the glass mount, which fastens to the windshield when used with the proper adapter, which is sold separately.

ADD A CUSTOM FEATURE

1961-72 Custom Rear View Mirrors with Map Light

These custom day/night rear view mirrors are styled after original equipment, but feature the addition of a built-in map light. Designed to easily mount to your original mirror support, each unit includes a day/night lever on the bottom. The included wire features both a male and female terminal which can easily be plugged into your fuse block. Available in 3 sizes; 8-inch and 10-inch are available in silver or black, while the 12-inch is only available in silver.

45 DAY MONEY BACK GUARANTEE

We want you to be completely satisfied with the parts you receive. Items purchased from OPGI may be returned within forty-five (45) days of purchase for any reason. See back of catalog for details.

BILLET RIDES

Billet Aluminum Outer Mirror

Starting with 6061-T6 aluminum, the billet mirrors are CNC-machined. Features convex glass as well as increased articulation. Pivot ball can be tightened to lock the mirror head. Utilize the original mounting holes drilled by GM, but can be fitted to nearly any vehicle. Mirrors include a mounting gasket and are available in a variety of finishes to suit your specific taste.

ONE-PIECE WINDOWS ADD SUBTLE CUSTOM LOOKS

The most comprehensive kit available

MADE IN THE USA

1964-65 One-Piece Window Kits

One-piece window kits have been precisely engineered for an excellent fit and factory appearance for your vehicle. Each kit contains everything necessary to swap your stock windows over to a smooth-looking one-piece kit including a 3/16" green tinted and tempered glass, glass run channel, window rollers, window roller channel, front vertical roller guide, inner and outer window felts with chrome bead, weatherstrip adhesive and the necessary hardware. Detailed instructions are also included to aid in a straightforward installation of this extraordinary custom window kit.

Part#	Year	Desc.	UOM	Price
CH32158	64-65	sedan	KIT	849.99

Note: One-piece window kits are for use with OE manual windows. Kits will work with some power window kits, but some modification to the regulator mechanism may be required.

'66-67 COUPE AND CONVERTIBLE

Complete assemblies contain most everything you need!

1966-67 Vent Window Glass Assemblies

Each component that goes into the manufacturing of these completely assembled glass units is guaranteed to be an exact reproduction of the original. Assembly comes out of the box ready to bolt-in. This professionally assembled kit includes the front and rear framework, clear glass, handle, inside frame, weatherstripping (except the rear run channel), etc. Most everything!

The rear glass run channel weatherstripping can be ordered separately as a pair under part# GRC0018.

1964-72 4-Window Power Window Kits

These aftermarket, model specific, power window kits convert manual windows over to power and are a direct bolt-in assembly. The Regulators are made from 1018 cold-roll steel for strength and durability with Bronze Oilite thrust bearings at the pivots and the 4130 gear plates are Heat Treated for longer tooth life and better wear resistance. A variety of switch options are available: Standard Chrome, Black Illuminated or the Nostalgic which is an original looking switch bezel that is a machined billet aluminum piece that is buffed, polished then chromed. They are available in both door or console mount. Also available are the Nu-Crank switches that operate your original crank handles as a power switch and a No Switch option that includes motor plugs and terminals. These kits are available as 2 switch front door window kits or 4 switch front door and rear quarter window kits. These assemblies carry a lifetime warranty.

NOTE: Due to the fragile nature of fiberglass products, we inspect each piece for major damage prior to shipping. It is common for fiberglass components to have small chips and minor imperfections in the gel coat finish. These imperfections are not considered damage as they will be eliminated during the paint preparation process. Fiberglass parts are not shipped in a finished "ready to install" state and will require minimal filling and sanding prior to primer and paint. NOTE2: Hoods are special order items, they will be drop shipped direct from the manufacturer, and may take up to six weeks for delivery.

MOLDED TO OEM SPECIFICATIONS
Bolts directly to your hood

Cutlass & 4-4-2 Hood Tongue

C240883 C240884 C240885

The original style hood tongues are professionally manufactured in either durable ABS plastic, or original gauge steel for a genuine fit and appearance. Each hood tongue must be painted to match your vehicle, but features the correct mounting holes and flanges making installation hassle-free. Sold per each.

1968 Cutlass Chrome Hood Louvers

Made using the same type of high-pressure injection tooling as the originals, these are exact, close tolerance hood louvers with a professionally polished chrome-plated finish. For all 1968 Cutlass S, 4-4-2 and Hurst/Olds.

Part#	Year	Desc.	UOM	Price
C230031	68	.....	pair	249.99

NOTE: Installation of these hood louvers is simplified if the hood is off the car. Just like the factory, our hood louvers are a close tolerance fit.

1969-70 Cutlass S, 4-4-2, Hurst/Olds Chrome Hood Louvers

Made using the same type of high-pressure tooling as the originals, these are exact, close tolerance hood louvers for all 1969-70 Cutlass S, 4-4-2 & Hurst/Olds except models with W-25 OAI (Outside Air Induction) hoods.

Part#	Year	Desc.	UOM	Price
C230010	69-70	non-OAI.....	pair	249.99

NOTE: Installation of these hood louvers is simplified if the hood is off the car. Drilling oversized holes in the factory retaining bezel will allow easier adjustment of the louvers and their painted retaining bezel as the factory holes were too small.

'68-72 AUTHENTIC INJECTION-MOLDED PLASTIC DESIGN
Our precise reproductions are not universal. These are the correct factory replicas that will pop right into place and function perfectly

MANUFACTURED RESTOPARTS BY ORIGINAL PARTS GROUP

DON'T COMPROMISE!

MANUFACTURED BY RESTOPARTS

1964-72 Hood Hinge Bolts
This reproduction is the only exact one on the market. The set includes the four bolts to hold the hinge to the hood and the four correct bolts that fasten the hinge to the inside part of the fender. The current generic "replacement" bolt, sold by competitors everywhere, is too long, has a sharp pointy end and, when screwed down, it often creates a frustrating "nipple dent" from the tip of the bolt on the top of your hood—a serious flaw.

Don't compromise. This is the only true, correct fitting flush-ended reproduction on the market

Part#	Desc.	UOM	Price	SALE

Important Body Panel Information
Regarding Minor Imperfections In Steel Panels:
The sheet metal you receive may have scratches, dings, small dents and other minor imperfections, which are considered normal sheet metal characteristics due to the nature of the product. OPGI does not consider these minor imperfections as damaged. These items will be easily corrected during the filling, priming and sanding phase of your sheet metal installation. All sheet metal panels will require some sort of manipulation during installation. Every panel that we sell is inspected and then carefully packaged to protect against damage that may occur during transit.

Regarding Minor Imperfections In Fiberglass Panels:
Due to the fragile nature of fiberglass products, we inspect each piece for major damage prior to shipping. It is common for fiberglass components to have small chips and minor imperfections in the gel coat finish. These imperfections are not considered damage as they will be eliminated during the paint preparation process. Fiberglass parts are not shipped in a finished "ready to install" state and will require minimal filling and sanding prior to primer and paint.

Test Fit All Panels Prior To Paint and Installation:
OPGI recommends test-fitting all sheet metal panels prior to final paint and installation. It is also recommended that the damaged area of the vehicle not be cut out before receiving the new sheet metal. Measure twice, cut once to be safe. Sheet metal panels are not a finished product like door handles and mirrors. Minor modifications including elongating mounting holes, adding shims etc. are normal and may be necessary when installing sheet metal. This is a consideration when reinstalling original GM panels as well as reproductions. It is important to note that hard driving conditions can twist frames and bodies out of original tolerances. Poor bodywork from previous collisions can cause problems with the body structures that the panels are attached to.

PREMIUM STAMPED STEEL REPRODUCTIONS
EDP-coated for corrosion resistance

1968-69 Cutlass Fenders
Replace your original fenders with these top-quality reproductions from OPGI. Fenders are stamped to factory specifications using state of the art machinery which ensures the best possible fit and finish to keep your restoration project looking great. The correct mounting points allow for a straightforward installation and a durable EDP coating prevents rust and corrosion. Available individually or in a discounted pair to suit your needs.

DISCOUNTED KIT SAVINGS

1964-72 Complete Body Bushing Kits

When we introduced these in 1986, they were considered the gold standard in body bushings. Today, they are still the best on the market. Why? Because we didn't cut corners then, and we don't now. Just as we did in 1986, we continue to produce them in custom casehardened steel tools (expensive, but the right way to do it), ensuring a consistent, precise injection-molded rubber bushing every single time—unlike ones that competitors offer, which judging by the lower density, seem to be produced in cheaper aluminum molds. In addition to our finely reproduced rubber bushings, it's also noteworthy that each steel insert is also stamped the right way in authentic zinc. Again, no competitor bushing and insert combination comes close. The bottom line is that you get the finest quality, time-tested and proven over and over again to be the best anywhere. Your satisfaction is guaranteed!

Total Polyurethane Set

For improved handling and braking performance of your A-Body, polyurethane bushings help reduce bushing deflection and help to maintain constant front end alignment.

The polyurethane bushings installed in the rear suspension will help drag strip acceleration and reduce wheel hop, along with keeping the rear end centered in the car for better handling. Get the most out of your car's handling with these polyurethane suspension sets.

Frame FX Reinforcement Kit

FREE SHIPPING ON THIS ITEM

One of the most effective ways to improve the stiffness and handling of your A-Body is to box the factory frame. The Frame FX kit takes all of the guesswork out of the job and gives you 14 pre-cut panels manufactured in heavy-gauge to match the thickness of the factory frame and fit into the weak points of the original chassis. Hellwig has also engineered a panel that adds an extra body mount to tie the floor to the chassis using an included polyurethane bushing, to add even more strength to the entire car. The kit also includes brackets for mounting the transmission crossmember with enough adjustment to accommodate nearly any drivetrain configuration. While fabrication and welding skills are necessary for proper installation, the kit comes with everything you need, including a detailed instruction booklet, to make this job a success.

Front End Rebuild Kits

IMPORTANT INFORMATION: At OPGI, we offer top-of-the line Moog brand kits. With over 30 years experience in Racing, Moog has proven itself as an industry leader when it comes to suspension components and kits. Moog ball joints offer an innovative "gusher bearing" technology (providing a unique bearing lubrication system), casehardened steel components, with a yellow zinc dichromate coating. All of this adds up to world-class quality.

Moog kits also feature "Problem Solver" suspension bushings. The main function of the suspension bushing is to dampen unwanted noise and vibration from tires and the road surface. Moog's bushings have been specially designed with a uniquely formulated elastomer that provides superior damping and suspension control over your original equipment bushings.

There are many reasons to upgrade to Moog, including better vibration and noise control, increased control over suspension movement (allowing for improved handling and extended tire life) and increased service life. Moog components exceed all OEM design specifications and quality, ensuring you a premium upgrade when it comes to your suspension rebuild kits. All Federal Mogul/ Moog suspension components carry a limited lifetime warranty. Warranty is subject to proper installation and normal driving conditions. Warranty is not applicable to any off-road or race vehicles.

COMPLETE KIT INCLUDES:
Upper and lower ball joints, Inner and outer tie rod ends, Idler arm assembly, Upper and lower control arm bushings and Adjustment sleeves

1961-77 Front Control Arm Bushings

These original style rubber bushings are available for a variety of upper and lower applications. Choose between standard bushings and premium Moog bushings. Standard feature high-temperature synthetic rubber centers, which are bonded to steel sleeves for increased life and performance. Moog bushings are manufactured by the original equipment supplier and feature conventional rubber to absorb noise and reduce vibration. Rubber centers are professionally bonded to steel sleeves to produce a finished bushing that provides better handling while meeting OEM specs. All Federal Mogul/Moog suspension components carry a limited lifetime warranty. Warranty is subject to proper installation and normal driving conditions. Warranty is not applicable to any off-road or race vehicles.

NEW! Rear Upper R-Joint

R-Joints are a revolutionary rod end design that provides low friction, full range articulation, long service life, lateral stability and a quiet operation. They articulate in 3 planes, 360 degree axial rotation and 30 degrees of total lateral rotation. The R-Joints are a 17-4 investment cast stainless steel housing with rolled threads and polished stainless ball and RTX10 composite cage provides consistent low friction movement. The special RTX10 composite cage needs NO lubrication. This self-cleaning designs movement is not affected by ANY water, grit, dirt, or debris. The spring loaded closure keeps the mechanism tight and rattle free for LIFE!

LIFETIME LIMITED WARRANTY

Idler Arm Assemblies

MOOG CHASSIS PARTS

Help renew your steering linkage with a new idler arm from OPGI. These idler arms are identical to original equipment and include the mounting bracket to the frame for a hassle-free installation. Choose between our standard idler arms or our premium Moog idler arms. Standard idler arms include a patented low-friction bearing which has been enlarged for easier movement. Other features include a heat-treated and forged bracket as well as a permanently attached boot for protection from dust and dirt.
Premium Moog idler arms are manufactured by the OE supplier and feature an internal spring to absorb shock and vibration for maximum durability. The patented press-in cover plate eliminates excessive play and the powdered metal gusher bearing allows grease to flow for improved movement. The tapered bearing design decreases deflection, while the large bearing surface distributes the load evenly. All Federal Mogul/Moog suspension components carry a limited lifetime warranty. Warranty is subject to proper installation and normal driving conditions. Warranty is not applicable to any off-road or race vehicles.

Tie Rod Ends

Inner and outer tie rods are essential components to your steering linkage as they connect the center link to the steering arm and spindle. Choose between our standard tie rod ends and premium Moog tie rod ends depending on your needs.
Standard tie rod ends feature a patented double bearing design that houses a large 26 mm ball end. Each cold-forged rod housing includes the correctly threaded end, which makes installation a breeze.
Premium Moog tie rod ends feature a patented cover plate design, which captures the ball stud between two bearings to eliminate lash. Assembled with the correct pre-load, these tie rod ends help maintain proper steering effort. All housings are forged and heat-treated for strength and durability and each housing incorporates the correct threaded end for installation.
All Federal Mogul/Moog suspension components carry a limited lifetime warranty. Warranty is subject to proper installation and normal driving conditions. Warranty is not applicable to any off-road or race vehicles.

Critical for front end alignment

MOOG CHASSIS PARTS — LIMITED LIFETIME WARRANTY

Tie Rod Adjustment Sleeves

Tie rod adjustment sleeves are manufactured to OEM specifications and are a necessary component to your steering linkage and front end alignment. Choose between our standard adjustment sleeves and our premium Moog tie rod sleeves.
Standard sleeves are manufactured using OEM-quality steel and feature a black oxide protective coating for corrosion resistance. Each sleeve features the correct internal threads as well as the outer tightening clamps.
Premium Moog sleeves are manufactured from top-quality steel and feature a superior corrosion resistant coating. Correctly threaded sleeves are machined with fluted ends to help channel out corrosive build-up. Top-quality hardware is included with the clamps to help keep the sleeves in place.
All Federal Mogul/Moog suspension components carry a limited lifetime warranty. Warranty is subject to proper installation and normal driving conditions. Warranty is not applicable to any off-road or race vehicles.

STAVE OFF WEAR & TEAR

Longer life than rubber—urethane design is superior to the original

PROTHANE MOTION CONTROL — POLY227

Ball Joint Boots

Get longer life out of your ball joints and boots by upgrading to our urethane ball joint boots. These boots have a much longer life than rubber—grease and oil tend to dry out and rot rubber, whereas the durable polyurethane doesn't absorb the oil and grease, thus preventing the cracking and rotting.

Part#	Year	Desc.	UOM	Price

PATENTED DESIGN THAT WILL GIVE YOU THE MOST ADJUSTABILITY AND BEST CLEARANCE

Tubular Control Arms

SPC's upper control arms are a patented design that will give you the most adjustability and best clearance of any arm on the market. Sold as a pair, upper arms come with ball studs that are 1/2" taller than stock to improve camber curve. Throw in some caster and the ability to tune camber and you will have a 'modern' feeling suspension. The ball joints are greaseable and rebuildable. Additionally, OE length and 1/4" extended studs are available to tune your ride or maximize your specific suspension geometry. Front upper Adjustment range: Camber ±3.0° Caster ±3.0°. SPC's lower control arms will lower your front end by 1" and add 1° positive caster for an aggressive, ready-to-run stance. If you have coilovers use SPC's Coilover Mount and Spacer Plate 2 pack - part number SP95338, 4 pack - part number SP95332. Optional bump stop available (part no SP95339). Combine upper and lower control arms with SPC's 1" lowering springs to complete the transformation of your Pro Touring, Track Ready, or daily driving street use American Muscle.

1964-72 Totally Tubular™ Control Arms
Upgrade your suspension with these tubular control arm sets from OPGI. The Totally Tubular™ kits feature upper and lower arms complete with ball joints, cross shafts, bushings, bump stops and hardware. Each arm is professionally manufactured using 1-1/2" .120" wall DOM tubing for strength and durability. Pivot barrels are also DOM tubing featuring a 1-1/2" diameter and .188 wall. Upper arms are assembled using premium 4130 chrome-moly cross shafts and Delrin bushings. Lower arms feature a helical stamped coil pocket for secure spring mounting and hassle-free installation. All arms are available in black powder coated finish and designed for use with stock height spindles.

GLOBAL WEST SUSPENSION

Geometry Plus Control Arms
"Geometry Plus" control arms offer more than just a high-tech appearance. Designed to improve suspension, the arms provide more straight-line stability, better corner entry and overall vehicle response. The main concept is keeping as much of the tire on the ground as possible during all conditions. This is done with different length control arms, which directly affect the tilt of the tire in relationship to the pavement. Arms are fully assembled, including ball joints and bushings, which are available in the revolutionary Del-A-Lum design. Del-A-Lum bushings are fully greasable and feature a no drag design that will not work harden and wear out. All arms are TIG-welded for strength and powder coated gloss black for outstanding looks. Arms are sold per pair for upper and lower applications.

TOP-OF-THE-LINE ARMS AND SPINDLES

CH28383

DETROIT SPEED, INC.

MADE IN THE USA

1964-72 Detroit Speed Control Arm And Spindle Kit
This complete front control arm and spindle kit has been designed by Detroit Speed to work as an integrated system on your vehicle. Each control arm features laser-cut tubing and ends, which are precisely TIG-welded in fixtures to guarantee geometric accuracy. Delrin bushings eliminate binding and all arms include new ball joints as well as a high-gloss black powder coated finish. The DSE-exclusive forged spindles are 1-1/2" taller than the stock spindle, which provides massive handling improvements by modifying the camber curve. Other benefits of these spindles include the 2" of drop from stock height spindles, the ability to use stock steering arms and minimized bump steer. Sold as a complete kit.

NEW! 2.0 Control Arm Kit

QA1's GM 2.0 Control Arms provide increased positive caster compared to OE arms, are among the lightest arms available featuring lower unsprung weight and improved performance without sacrificing durability. They include QA1's integrated ball joint design; stronger than OEM, rebuildable for tunability, and providing long-term reliable service. These arms feature billet cross shafts for reduced weight and durability for the long haul. Double-sheer lower mounts are coil-over ready for a clean installation. QA1 GM 2.0 Control Arms look incredible and use no unsightly additional adaptors! Form meets function: these newly designed arms look and perform great and don't require painstaking restoring like factory stamped steel control arms.

NOTE1: Arms are not compatible with OE springs. Must be used with a coil-over system. NOTE2: Accommodates either factory or aftermarket disc brakes. NOTE3: Minimum wheel size to work with these arms is 15". NOTE4: Bushings and ball joints are greaseable on all 2.0 Control Arms.

OFFSET CROSS SHAFTS

1964-72 Billet Steel Upper Control Arm Cross Shafts

With these offset upper control arm cross shafts from Global West for GM A-Body applications, you are now able to fine tune your alignment for racing or performance street applications. They will give you an additional 1-1/4 degrees of adjustment even on stock suspension setups. Made from billet steel, they are guaranteed to last and stand up to the pressures associated with performance driving. Includes hardware for the shaft, but not for the frame.

Fastrax Caster Camber Gauges & Accessories
Portable, hands-free alignment can be done quickly and easily with the FasTrax™ Adjustable Camber/Caster Gauge. This tool will help you fine tune your alignment for optimal tracking and handing. Weather installing adjustable control arms or replacing idler arms/tie rod ends or struts SPC's FasTrax can set alignment for optimum performance. Fastrax is available in:

Standard - Includes gauge and wheel mount that fits most 13"17"

Performance - Includes gauge and wheel mount fits most 17" to 22" wheels

Off-Road - Includes gauge and wheel mount fits most 17" to 22" wheels, Extended toe arms make it easy to measure toe on all off-road tires

Heavy Duty - Includes gauge and wheel mount fits most 21" to 26" wheels, toe arms, no lip adapters and Heavy-Duty tape measure.

FasTrax optional attachments:

Toe Adapter Kit Includes 2 arms and reinforcement blocks install easily onto either the SP91000 or SP91010

No Lip Adapter - A quick adapter to attach the FasTrax to wheels without an outer "lip" install easily onto either the SP91000 or SP91010

Both of these install easily onto either the Standard or Performance

Fastrax Caster Camber Gauge Displays Camber +/-4 degree / Caster -4 degree to +12 degree, Saves time and tires, Accurate, rugged and easy-to-use. SPC recommends 2 FasTrax with Toe Adapters for more convenience.

Strengthen trailing arm mount points

MADE IN THE USA

Rear Trailing Arm Mount Braces
Using these Hotchkis trailing arm mount braces will strengthen the upper and lower trailing arm mount points on the chassis. They prevent the upper trailing arm crossmember from tearing under repeated hard launches and triangulates this portion of the frame for more strength. Made of high-quality, TIG-welded steel, these powder coated arms are the perfect addition to the Hotchkis trailing arms.

'64-72 CUTLASS/4-4-2
Strengthens factory mounting points

CH24793

MADE IN THE USA

Trailing Arm Mount Braces
Trailing arm mount braces work with upper and lower trailing arms to accurately locate the rear suspension for major improvements in cornering, steering response and traction with less wheel hop and more power to the ground. They also prevent the factory rear upper trailing arm crossmember from tearing out under high-power and extreme traction conditions.

Tubular Rear Trailing Arm Sets

Totally Tubular™ trailing arms are made from heavy gauge tubing, and utilize a patented non-squeak self-lubricating bushing that will never need to be greased, and will outlast any material on the market. Kits include upper and lower trailing arms as well as a rear sway bar. Lower arms are available in black powdercoat, upper arms are black anodized aluminum. Note: 1964 kit requires using original rear end bushing.

SIGNIFICANT ENHANCEMENTS TO THE HANDLING OF YOUR PRIZED MUSCLE CAR!

Get maximum traction and improved handling with our line of Global West products

CH25026

CH26912

Rear Suspension Accessories

The Global West tubular lower rear trailing arm offers better traction for hard launches and improved handling due to less flex in the trailing arm and bushings. OPGI offers three versions of these powder coated trailing arms. The most economical rear lower trailing arm comes with polyurethane bushings in each end and is great for drag racing. Because there isn't much suspension movement at the drag strip, this trailing arm won't cause undue amounts of suspension bind. If they are used on the street, the lateral fore and aft forces can cause the suspension to bind and produce an unbalanced, ratcheting movement. The polyurethane will eventually wear and work-harden resulting in an unresponsive rear suspension. Our #2 Global West tubular lower trailing arm utilizes a spherical bearing on the frame end and a poly bushing on the rear axle end. This eliminates bind in the suspension and works well on the street and track. The down side? The poly bushing will eventually work-harden and wear-out. Still, a great overall choice. Global West's top-of-the-line lower rear trailing arm features a spherical bearing on the frame end and a Del-A-Lum bushing on the rear axle end. This trailing arm eliminates lateral for-and-aft movement, with no bushing deflection and therefore no bind in the rear suspension. Great for use on the street and strip! Global West also offers upper rear trailing arms that are fully adjustable. This of course, makes setting the pinion angle easy. The trailing arm is designed with right hand and left hand threads on the adjuster so the arm does not have to be removed in order to adjust the length. Jam nuts secure the position after the adjustment. The arms come with spherical bearings located on the frame side allowing the rear end to have proper movement. Rear suspension frame supports: Global West adjustable round tube supports tie the upper trailing arm frame mount to the lower trailing arm mount. These supports provide additional strength to the upper crossmember in order to reduce the possibility of tearing the upper mount out during hard acceleration.

3 LEVELS OF PERFORMANCE

Available with or without shocks

CH33741

CH33737

QA1 MADE IN THE USA

2.0 A-Body Handling Suspension Kits

Want better handling for your 1964-77 GM A-Body vehicle? Take a look at QA1's handling suspension kits for the best ride that fits your needs. Available in three different levels of performance, these handling kits offer easy, bolt-in installation and seamlessly works with whatever OE component each piece attaches to. These kits include spring rates carefully selected to maximize performance while maintaining a smooth, comfortable ride. They are geared towards average with small block and LS powered vehicles. Level 1 includes Single Adjustable front and rear coil-over shocks. LEVEL 2 includes Double Adjustable front and rear coil-over shocks as well as the new 2.0 Control arms. LEVEL 3 include the new 2.0 upper and lower control arms and are offered with QA1 all new MOD series fully adjustable coil-over shocks for the ultimate in suspension tunability. What if the vehicle has been heavily modified from its original weight? No problem. These kits are also offered without shocks to give you the flexibility to order the shocks with the spring rates you want.

Level 1
• Front Single Adjustable Pro Coil System • Rear Single Adjustable Pro Coil System • Front Sway Bar
• Thrust Bearing Kit • Tie Rod Adjuster Sleeves • Spanner Wrench

Level 2
• Front Double Adjustable Pro Coil System • Rear Double Adjustable Pro Coil System
• Street Upper Control Arms • Street Lower Control Arms • Front Sway Bar • Rear Sway Bar
• Thrust Bearing Kit • Boxed Lower Trailing Arms • Adjustable Upper Trailing Arms
• Tie Rod Adjuster Sleeves • Adjustable Frame Brace • Spanner Wrench

Level 3
• Front/Rear MOD Series Pro Coil System • Pro-Touring Upper/Lower Control Arms
• Front Sway Bar • Rear Sway Bar • Boxed Lower Trailing Arms • Adjustable Upper Trailing Arms
• Tie Rod Adjuster Sleeves • Adjustable Frame Brace • Canister Mount - Flat • Spanner Wrench

2.0 A-Body Drag Race Suspension Kits

Available in three different levels of performance, these drag racing kits offer easy, bolt-in installation and seamlessly works with whatever OE component each piece attaches to. Unlike the QA1 Handling Suspension Kits, these kits are ready for a new game, straight line performance! LEVEL 1 drag racing kits contain carefully selected components to maximize straight line performance and drag racing potential. LEVEL 2 drag racing kits include the new 2.0 upper and lower control arms and offer coil-over shocks suited SBC/LS to maximize stored energy and weight transfer. LEVEL 3 drag racing kits include the new 2.0 upper and lower control arms and are offered with QA1 all new MOD series fully adjustable coil-over shocks for the ultimate in suspension tunability. Kits are also offered without shocks to give you the flexibility to order the shocks with the spring rates you want.

Level 1
• Front Double Adjustable Shocks • Rear Single Adjustable Shocks • Rear Sway Bar
• Boxed Lower Trailing Arms • Adjustable Upper Trailing Arms • Fixed Tubular Frame Braces
• Tie Rod Adjuster Sleeves • Anti-Hop Bars

Level 2
• Front/Rear Double Adjustable Pro Coil System • Rear Sway Bar • Boxed Lower Trailing Arms
• Adjustable Upper Trailing Arms • Drag Race Upper/Lower Control Arms • Tie Rod Adjuster Sleeves
• Adjustable Frame Brace • Anti-Hop Bars • Thrust Bearing Kit • Spanner Wrench

Level 3
• Front/Rear Mod Series Pro Coil System • Rear Sway Bar • Boxed Lower Trailing Arms
• Adjustable Upper Trailing Arms • Drag Race Upper/Lower Control Arms • Tie Rod Adjuster Sleeves
• Adjustable Frame Brace • Anti-Hop Bars • Canister Mount - Flat • Spanner Wrench

TruLink Systems

Tune up your 1964-1972 GM A-body chassis with RideTech's TruLink Adjustable Rear Suspension System. The comprehensive system features heavy duty tubular control arms equipped with patent-pending R-Joints plus application-tuned HQ Series adjustable shock absorbers. We replace your car's flex-prone stamped upper and lower control arms with precision-welded tubular steel StrongArms constructed from heavy duty 1.5" OD .156 wall DOM steel tube. The end result is less flex for more predictable handling and launch characteristics. StrongArm rear control arms are precision welded and powder-coated for long-lasting appearance. Each arm receives patent-pending R-Joint rod ends and bearings for noise-free, high articulation movement with zero stiction. R-Joints eliminate the binding, stiction, noise and vibration associated with poly bushings offered in most aftermarket control arms. R-Joints never need lubrication and have exceptional wear resistance. For ultimate articulation, the TruLink system features press-in R-Joints for your axle to upper control arm attachment points. The final piece in the TruLink system is a pair of RideTech HQ Series adjustable monotube shock absorbers. We custom-valve them specifically for the A-Body platform with modern tires. We provide rebound adjustment to help you fine tune compliance. With a few turns of the adjusting knob, you can tune rebound damping to suit both your car's needs and your personal preferences. RideTech HQ Series shocks offer an industry-exclusive 1,000,001 mile warranty.

MADE IN THE USA

Pro Touring Suspension Systems

These CPP Pro-Touring Suspension Kits are the most complete on the market offering the ultimate in performance upgrades. Available in four different stages, some kits feature base suspension components, while other kits feature front and rear brake packages. Manufactured in the USA with the quality in mind, each kit features front and rear Totally Tubular™ upper and lower control arms, front and rear Pro-Touring sway bars, front and rear coil springs with nitrogen gas shocks (Stage 1), or the dual-adjustable coil over package with rear dual-adjustable shocks in (Stage 2-4).

Stage I: Upper & Lower Totally Tubular™ control arms, rear upper & lower Totally Tubular™ trailing arms, front solid sway bar kit in 1 1/8", 1 1/4" or 1 3/8" diameter, rear Pro-Touring sway bar kit, front & rear coil springs in stock or 2" drop height, front & rear Classic Fit™ nitrogen gas shocks.

Stage II: Upper & Lower Totally Tubular™ control arms, rear upper & lower Totally Tubular™ trailing arms, front solid sway bar kit in 1 1/8", 1 1/4" or 1 3/8" diameter, rear Pro-Touring sway bar kit, rear coil springs in stock or 2" drop height with rear dual-adjustable aluminum-body shocks or upgrade to a rear dual-adjustable coil-over kit, front dual-adjustable coil-over kit with coil springs rates for small block (350#), LS (450#) or big block (550#)

Stage III: Upper & Lower Totally Tubular™ control arms, rear upper & lower Totally Tubular™ trailing arms, front solid sway bar kit in 1 1/8", 1 1/4" or 1 3/8" diameter, rear Pro-Touring sway bar kit, rear coil springs in stock or 2" drop height with rear dual-adjustable aluminum-body shocks or upgrade to a rear dual-adjustable coil-over kit, front dual-adjustable coil-over kit with coil springs rates for small block (350#), LS (450#) or big block (550#), complete 11" front & 11" rear stock height disc brake kit with upgraded drilled & gas-slotted rotors, chrome master cylinder with adjustable proportioning valve distribution block

Stage IV: Upper & Lower Totally Tubular™ control arms, rear upper & lower Totally Tubular™ trailing arms, front solid sway bar kit in 1 1/8", 1 1/4" or 1 3/8" diameter, rear Pro-Touring sway bar kit, rear coil springs in stock or 2" drop height with rear dual-adjustable aluminum-body shocks or upgrade to a rear dual-adjustable coil-over kit, front dual-adjustable coil-over kit with coil springs rates for small block (350#), LS (450#) or big block (550#), complete 13" front & 12" rear stock height Big Brake kit with drilled & gas-slotted rotors, chrome master cylinder with adjustable proportioning valve distribution block.

HOTCHKIS SPORT SUSPENSION

Sport Suspension Sway Bars

Hotchkis "Sport Suspension" sway bars are designed to improve the cornering performance and traction of any 1964-72 Cutlass. Front bars are available in a rigid 1-3/8" tubular design, which features greasable bushings, heavy-duty mount brackets and end links. Rear bars are available in the adjustable lightweight "Extreme" bar, which is hollow, 1-5/16" and comes complete with TIG-welded end links, greasable bushings, heavy-duty mounts and stainless steel U-bolts. All sway bars are available individually or as a complete assembly.

– Tubular construction – Lightweight design – Hardware included – Gloss black powder coated finish

Hellwig SUSPENSION PRODUCTS

Front & Rear Sway Bars

All bars are engineered for a factory fit to your vehicle. Front bars are available in solid and tubular versions. Solid bars are identical reproductions of original equipment, while the modern tubular design features a larger diameter bar and smooth finish. All bars are powder coated in a black semi-gloss finish. Due to continual large-volume purchases, OPGI is able to offer these prices on all high-performance sway bars. They are recognized throughout the high-performance industry to be the best anywhere. Bars are available individually or save time and money with our sway bar kits.

INCLUDES: Sway bar, end link bushings and frame bushings.

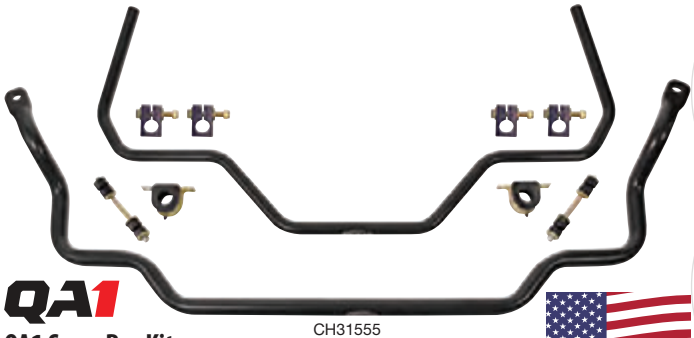
SIGNIFICANTLY IMPROVED HANDLING
Precision fitment



CH31555

QA1

MADE IN THE USA

QA1 Sway Bar Kit

These precision CNC formed sway bars from QA1 will take your ride to a whole new level of handling. The front sway bar is manufactured from hollow-core 4130 Chromoly steel while the rear bar is cold formed from solid steel stock. This insures maximum strength and durability while guaranteeing a precision fit for a true bolt-on installation. Both front and rear bars are coated in a gloss black powder coated finish for long lasting durability & corrosion resistance. Polyurethane bushings and high quality plated hardware included.

Detroit Speed, Inc.

MADE IN THE USA

Detroit Speed Tubular Front Sway Bars

These premium-quality tubular sway bars from Detroit Speed are available for both front and rear applications to add a new level of comfort and control to your ride.The traditional-style front bars feature large 1-3/8" hollow tubing and include greasable polyurethane bushings, mounts and end links. For the ultimate performance at the front of your car, choose the new splined front sway bar. The bar uses 1-1/2" hollow 4130 alloy heat-treated and splined bar that mounts in black hard-coated 6061-T6 billet aluminum pillow blocks with Delrin bushings. The bar arms are 3/4" thick solid steel to minimize deflection and come in a black powder coated finish. The bar includes a low-friction ball-style end link system and all necessary mounting hardware.

NOTE: ProTouring sway bars will not work with some aftermarket rear ends.

ridetech

Musclebar Sway Bar Kits

RideTech has upgraded the traditional notion of sway bars with the new MuscleBar™. Using precision CNC tubing benders, PosiLink endlinks and Delrin lined mount bushings, RideTech can now produce sway bars with unheard of dimensional and rate accuracy.

FEATURES:

- Precision CNC-Bent Tubing For accurate and repeatable fitment
- Exact Bar Rates Included with each bar – no guesses as to bar rate
- Delrin-Lined Frame Mount Bushings allow easy rotation over the stiction of polyurethane or rubber
- Easy to install spherical end links
- Adjustable rate with sliding mount for a 200-400lbs adjustment range

SPECS: RATE= 200-400lbs, Diameter= 1" , Wall Thickness= .156"

MOSER ENGINEERING

1964-72 Rear End Assemblies

Upgrade your rear end and differential with this complete package from Moser Engineering. Each heavy-duty 12-bolt assembly is application specific and ready to bolt directly into your vehicle using the original mounting points. Designed and manufactured in the USA, these are the most rugged packages on the market today. Each kit is custom tailored to suit your needs, with various options for differential, axles, gears, and brakes.

Each rear end package includes:

-Cast iron center housing -Seamless steel axle tubes -Differential Unit -Ring and Pinion Gear -Pinion Yoke (for 1310 u-joint) -Custom alloy axles -Axle seals -Timken sealed ball bearings -Wheel studs 5 x 4.75" pattern -Heavy-duty retainer plates (bolt-in axle applications) -T-bolt kit (bolt-in axle applications) -Cast aluminum rear cover

Moser rear disc brake kits: are included with your rear end and designed to improve your stopping power. Ready for installation, these kits utilize a cast-iron GM caliper with integrated parking brake, plain 11.25" rotor, and all necessary mounting brackets and hardware for hassle-free installation. Disc brake kits are for use with 15" or larger diameter wheels.

CH31325	68-72	w/Trutrac diff., 33 spline, 4.11 gears	each	3,459.99

NOTE1: Unit comes with the differential assembled, but axles are not installed and options such as brakes are shipped in kit form. NOTE2: When ordering assemblies without disc brakes, OE drum brakes must be used. NOTE3: When using OE drum brakes, slight clearancing to the backing plates are required. NOTE4: Rear end assemblies are shipped without fluid. NOTE5: : Rear end assemblies are designed for use with factory style shocks. Due to the design changes in this assembly, aftermarket coil-overs will require modification to the shock bracket.

NEW! Grip-N-Loc Differential

Grip-N-Loc™ builds upon exclusive technologies previously found in their limited slip line, but is even more robust to satisfy the extreme demands of serious drivers. If you push the limits of performance and traction, perhaps through competition, or simply through extreme weather driving, Grip-N-Loc is your best choice. A Grip-N-Loc will upgrade your vehicle for safe transfer of increased power/torque across the axle. Case material is up to 50% stronger than OE cases. Advanced cone clutch technology provides 25% increase in bias ratio/increased traction. Heat-treated, hardened-steel gear materials for confidence in extreme conditions.

Chevy 12-Bolt available in 3.07-3.73:1 or 4.10:1 & up gear ratios; Ford 9-Inch available in 28 or 31 spline; BOP 10-Bolt available in 2.93-3.23 or 3.36 & Up gear ratios

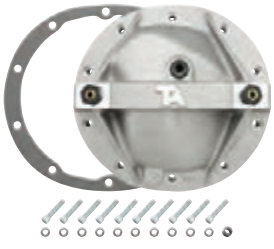
NOTE: For Chevrolet differentials only.

356-T6 ALUMINUM

Includes everything



T/A

1964-70 Rear End Cover/Girdle

Cover prevents breakage of the cast-iron carrier bearing caps when they're subjected to a sudden loading. By slightly pre-loading the carrier bearing caps, the cover/girdle holds the cap in place so there's no movement and therefore no breakage. Made of 356-T6 aluminum, weighing only 7-lbs., the T/A cover/girdle is easy-to-install and comes with all instructions, bolts, washers and cover gasket.

Part#	Desc.	UOM	Price

NOTE: BOP = Buick, Olds and Pontiac.

TWO VERSIONS

1970-72 Olds W-27 Aluminum Differential Covers

One of the rarest options for the 1970-72 4-4-2's was the W-27 aluminum differential cover option. It held more fluid and was made of aluminum, so it kept the rear gear oil cooler, thereby increasing gear and Posi-life. OPGI is offering two versions of this cover that fit the 1970-72 10-bolt Olds rear end and the 12-bolt heavy rear end. These are top-quality duplicates of the original W-27 rear covers.

ARP automotive racing products

Ring Gear Bolts

ARP makes the best ring gear bolts on the market because of their attention to materials and manufacturing details. The "Pro Series" of ring gear bolts are made from 8740 chrome-moly steel and heat-treated so that they have a tensile strength in the 200,000 psi range—much stronger than factory ring gear bolts. If you want the best, use ARP.

Rear End Gear Oil And Additive

Lucas heavy-duty gear oil is packed with additives, making it the perfect choice. Expect longer oil life, lower oil temperatures, longer component life, fewer seal leaks and less power usage. Normal applications require approximately two quarts of gear oil. For vehicles with posi-traction, add a 4-oz. bottle of GM limited slip additive to provide the necessary protection.

HOTCHKIS SPORT SUSPENSION MADE IN THE USA

1964-72 1.5 Street Performance Series Shocks

Manufactured by Fox and have been specifically tuned by Hotchkis ride engineers. The Hotchkis 1.5 Street Performance Series shock absorbers feature the latest cutting edge mono tube shock technology in a lightweight smooth-bore Type III hard anodized aluminum body. The shocks feature smooth riding digressive disc technology a high-flow piston specially formulated oil and high pressure nitrogen for consistent performance under varying conditions and temperatures. Each shock is application tuned to offer superior ride comfort as well as vehicle control. For years of durability the 1.5 SPS shock features 1/2" hard chrome plated heat treated alloy shaft subjected to 100 hour salt spray testing. To prevent contaminants from entering the shock the rod guide employs a wiper/scraper dual seal which cleans the shaft before reaching the main seal. End caps are black anodized 6061-T6 billet aluminum and feature polyurethane bushings. CNC machined cross bars and vehicle specific mounting hardware makes these shocks a direct replacement for OE.

C980100

KYB

Gas-A-Just Shocks

America's best-selling monotube gas shock. The monotube design is paired with high-pressure nitrogen gas to keep your tires glued to any road surface. This system eliminates the common problem of fading performance (associated with twin-tube construction) that allows the air and fluid to mix. KYB "Gas-A-Just" shocks include a protective outer shell to keep dirt out, self-sealing packing to reduce oil leakage, rubber cushions to protect inside on extreme extension strokes, seamless cylinder to reduce splitting, hard-chromed piston rod to reduce friction, rebound/compression valve to give quick dual-direction response, sintered iron piston for strength, all-weather fluid, floating dividing piston to separate gas and fluid and a tube guard to prevent damage from stones and debris. "Gas-A-Just" shocks are ideal for use with both radial and bias-ply tires.

QA1958P

QA1

Stocker Star Adjustable Shocks

These single adjustable front and rear shocks feature a machined and forged aluminum shock body that is clear-anodized for improved durability and a show-winning appearance. There are 12 deflective disc valving options with a single twist of one knob, which can be done while the shocks are on the car. The shock mounting bushing material is exclusive to QA1 shocks for both the upper and lower mounts along with either zinc or chrome-plated mounting hardware. These shocks also feature a three-step sealing system that features a double-lip seal with a wiper to keep dirt out and eliminate seal drag on the 5/8" centerless ground, hard-chromed shock piston rod. Another benefit is the QA1 "Star Stocker" shock can be rebuilt and re-valved by an authorized QA1 service center. Good shocks for the street or strip.

QA1 MADE IN THE USA

NEW! Pro Coil High Travel Springs

These are uniquely-wound springs that have fewer coils and that means lighter springs with increased travel before coil bind due to the distance between the coils. A lighter spring reduces unsprung weight and reacts faster, optimizing suspension performance. These high tensile chrome silicon wire tapered coil springs are designed to fit the Double and Single Adjustable Pro Coil Shock Systems series of coil-over shocks. They are available in either 10" or 11" length depending upon spring rate. The Springs are marked with the free length and spring rate and are powdercoated silver. Lifetime guaranteed to remain within 2% of their original free height and rate and Made in the USA.

SPP

Dual Adjustable Coil-Over Conversion Systems

These springs are designed so that the lower end sets on the coil-over shock and the upper end sets in the original spring bucket in the frame. This allows for the use of a longer and lighter spring for more stored energy, offering increased weight transfer. Greater durability is also achieved by locating the spring pressure in the frame and not on a single stud. The threaded aluminum body allows ride height adjustment and boasts an easy bolt-in installation. The system includes aluminum body coil-over shocks, specially designed conical springs and all necessary mounting hardware.

Choose between 450 lb or 550 lb Spring Rate.

QA1

MADE IN THE USA

Rear Coil-Over Conversions

QA1 offers bolt-in rear Coil-Over Conversion Kits for GM A-Body vehicles. These kits include specially designed USA made mounting brackets, single or double adjustable aluminum shocks, springs and all necessary hardware for installation. The single adjustable shocks provide 18 positions of simultaneous rebound and compression adjustment, whereas QA1's double adjustable shocks provide 18 positions of compression adjustment and 18 positions of rebound adjustment for a total of 324 possible valving combinations. These shocks also utilize a fully threaded body allowing for ride height adjustability to lower your vehicle. Multiple spring rate options are also available, from casual street driving to hard core race applications. Made in the USA. Easy, bolt-In Installation includes mounting brackets and requires no cutting or welding. Shocks are rebuildable and revalvable by the QA1 Factory or QA1 authorized service centers. For 1964-72 choose 130 lbs. for soft, 150 lbs. for medium, or 175 lbs. for a firm ride.

Rear Coil-Over Shocks

QA1 now offers bolt-in rear coil-over shocks for GM A-body vehicles. These shocks are available in single or double adjustable valving options. Single adjustable shocks provide 18 positions of simultaneous rebound and compression adjustment while QA1's double adjustable shocks provide 18 positions of compression adjustment and 18 positions of rebound adjustment, for a total of 324 possible valving combinations. These shocks also utilize a fully threaded body allowing for the use of aftermarket springs. Made in the USA. Easy, bolt-in installation includes mounting brackets and requires no cutting or welding. Shocks are rebuildable and revalvable by the QA1 Factory or QA1 authorized service centers. Springs not included.

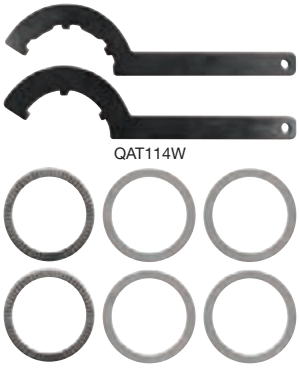
QA1

Front Coil-Over Conversions



QAT114W

QA78109

QA1's single or double adjustable front coil-over conversion shocks feature a forged & machined aluminum shock body that has been threaded for the ultimate in ride weight adjustability. Each shock body is also clear-anodized for award-winning looks & durability. Specially designed conical springs come with each kit, allowing for use of the factory upper spring pocket, while the lower portion rides on plates with the shock body. Choose either single or double adjustable shocks depending on your needs. The single adjustable series provides 24 positions that simultaneously adjusts both compression & rebound with one knob. Double adjustable shocks offer a much wider range with separate knobs for compression & rebound.

QA1

MADE IN THE USA

NEW! MOD Series Pro Coil System Coil-Overs

Designed specifically to meet the demands required by today's high performance drag race and handling/pro-touring cars, QA1's new multi-patent-pending MOD™ Series shock can be completely revalved in minutes while remaining on the car, saving racers time and money. They also feature a double adjustable design with adjustable low-speed bleed for fully independent control over the compression and rebound characteristics.

These shocks are some of the most capable shocks on the market today with their impressive force curve capabilities and high levels of tunability. The key element to this range of adjustment is the QuickTune™ Technology – modular valve packs that can easily be swapped out. Never before could you change the valving characteristics this much without completely disassembling the shock. Using QuickTune™ Technology, MOD™ Series shocks can be revalved in minutes without interrupting the oil path and opening the shock up for debris and air contamination, all while the shock remains on the car. The base eyelet is indexable, so you can unbolt it and reattach it at the angle you need for the best shock and canister placement

Features and Benefits:

- QuickTune™ technology - modular valve packs that allow for complete shock revalving without removal
- Medium compression and rebound valve packs standard
- Soft or firm compression and rebound valve packs available
- 24 click independent compression and rebound adjustment with low-speed bleed
- Large solid piston (with blow-off valve) for improved driver feel and control with up to 1,600 lb. force
- High-speed valving adjustment (coarse adjustment)—relates to shock operation during impact events, like hitting a pothole or curb
- Low-speed valving (fine-tune adjustments)—adjusts ride quality and weight transfer on corner entry/exit; more bleed for softer feel and less bleed for stiffer feel
- Indexable base eyelet—multiple position to optimize knob access and provide more mounting flexibility
- Made to be used with bottom eyelet style mount in tubular control arms, includes T-bar adapter
- Thrust bearings included
- Front spring rates available in 250-650 lbs
- Rears available in 130-220 lbs

ALDAN AMERICAN

MADE IN THE USA

Front & Rear Coil-Over Sets

Aldan American coil-over kits are designed to convert your suspension to a fully ride-height adjustable coil-over system which delivers superior handling and ride quality for a drastic improvement over stock suspension components. Front sets feature Aldan American's Phantom Series, single adjustable coil-over shocks. The high-tensile coil-springs are designed as a direct fit into factory upper spring pockets with ride-height adjustments up to 2". Rear sets are available in single or double adjustable styles. Single adjustable coil-over kits feature Aldan American's Phantom Series shocks for superior ride quality and handling. These kits also give you the ability to lower your ride-height by up to 3". Double adjustable coil-over kits feature Aldan American's Striker Series shocks and are excellent for extreme street or drag racing applications. These double adjustable coil-over kits not only give you the freedom to lower ride height up to 3", but also change rebound and compression settings to fine tune your suspension to suit your driving needs. The Phantom Series is also available in a front and rear set backed by with Aldan's Forever Guarantee. Made in the USA.

Application specific, bolt-on installation!

HOT1020

MADE IN THE USA

Adjustable Coilover Kits

Hotchkis' new ultra-premium, American made Coilovers, developed in conjunction with off-road specialist Falcon Shocks, are competition proven. The coilovers are full of industry-leading features, including premium adjustable aluminum monotube shocks with CNC machined pistons, digressive valving, precision machined oil/gas separators and filled with long-lasting Red Line Oil shock fluid. They've also undergone a 200 hour salt spray test to ensure durability, and both manual and adjustable shock systems feature our wide range 8-way rebound settings. The electronic systems provide nearly infinite damping activation and includes electronic controlled shocks, master in-car control unit, cockpit controller switch and a military-spec, weather tight wiring harness and Bluetooth enabled module. Each package includes grade 8 mounting hardware, fabricated brackets and unique front A-Arm installation kit. The sport coil springs are wound from high tensile strength steel for endurance and are rated at 700 lbs/inch front and 350 lbs/inch rear. You can also adjust the ride height down 2" - 4" from stock to achieve the perfect stance of your vehicle. Designed for OE style rear end differentials. Made in the USA.

THE MOST ADVANCED AIR SUSPENSION LEVELING SYSTEM IN THE WORLD

The perfect solution

ridetech Air Ride Technologies

RidePro-X Digital Air Suspension Control System

Sophisticated pressure and height algorithms tune air spring rates for proper handling and world-class ride quality. The sleek & stealthy 3-position control module plugs into your vehicles 12V cigarette lighter or power port & talks to the ECM via an RF signal. Each system includes RidePro-X control system, aluminum 3 gallon tank, Thomas compressor, valves, 1/4" air lines & all necessary fittings.

The RidePro-X Digital air suspension control system includes the following: - Stealthy 3-position control module. - "Ride Height On Start" automatic lift & level feature. - Pressure-based crossload compensation - critical for dynamic driving scenarios such as cornering & panic stops. - Display & setup via smartphone, laptop or Bluetooth. - Weatherproof ECM and heavy-duty mil-spec connectors. - Automatic weight compensation. - RidePro-X system is upgradeable to RidePro-HP system. - Bluetooth connectivity and smartphone app are included.

ridetech Air Ride Technologies

RidePro-HP Ride Height Sensors

RidePro-HP ride height sensors upgrade your existing RidePro-X pressure based system. Height and spring balance are established by comparing the position of the ride height sensor to the air pressure within each air spring. Your vehicle is then leveled with no cross-loading. This is especially important for dynamic driving scenarios where quick transitions occur such as high-performance driving, sudden directional changes and panic stops. This complete kit includes height sensors, height sensor linkage kits, group harness, heat shrink tubes and necessary hardware to complete the easy installation.

The LevelPro sensors automatically monitor both air pressure and ride height to eliminate crossloading. All products include detailed instructions for installation. Satisfaction guaranteed!

1964-72 500 Series Quick Ratio Power Steering Box

This new power steering conversion gearbox is a modern alternative to the popular but outdated 800 box. The 500 Series box provides superior directional control and road feedback, as well as a more stable and comfortable feel to the driver. CPP engineered the recirculating ball gears for low friction and increased steering response. Also, it will line up perfectly to your column without shims or spacers. All the other boxes on the market are rebuilt units, whereas this CPP 500 Series box is brand new, with a new housing, new internals, new gaskets, and seals. This is the very best gear-box available to convert your vehicle to power steering! Output shaft is 3/4" 30-spline, it utilizes a factory power steering pitman arm and the box is setup for stock inverted flared fittings.

EDDIE MOTORSPORTS MADE IN THE USA

1964-77 Braided Stainless Power Steering Hoses

Eddie Motorsports power steering hose kits feature high-quality 28" braided stainless steel hoses that are Teflon lined to handle the high-pressure demands of your steering system. These kits are for use with Eddie Motorsports pulley kits and include two 28" braided stainless steel/teflon lines, each with one crimped-on 90 degree hose end and all of the necessary fittings. Installation requires cutting the two hoses to length and installing the included screw-together hose ends. Kits for systems with remote reservoirs will also include one 36" -10 return line, or add a remote power steering reservoir to your existing system using hose kit # EM10737, this kit includes 36" of -10 braided stainless steel line and clear anodized hose ends.

EDDIE MOTORSPORTS MADE IN THE USA

1964-77 GM Type II Pump Power Steering Hardlines

Eddie Motorsports power steering hardlines are used on GM type II power steering pumps with attached reservoirs. These stainless steel power steering hardlines are available in a long or short option. The long hardline wraps around the top of the reservoir whereas the short hardline wraps around the side of the reservoir. The integral banjo fitting has 16.5mm x 1.5 threads and the line includes a nut and ferrule for attaching AN-6 Teflon lined braided stainless steel hose. Eddie Motorsports also offers power steering pump fittings and hardware for GM type II power steering pumps only. High flow pressure fitting accepts fittings with 16.5mm x 1.5 threads, internal orifice is .150" and allows pump to flow 3 -3.5 gallons per minute @ 1500 psi for use with Eddie Motorsports pumps used with GM power steering gear boxes. Low flow pressure fitting accepts fittings with 16.5mm x 1.5 threads, internal orifice is .120" and allows pump to flow 1.5 - 2 gallons per minute @ 1200 psi for use with Eddie Motorsports pumps used with rack and pinion steering systems.

COMPLETE WITH IGNITION SWITCH & KEYED TUMBLER

Tilt Steering Columns

Add tilt steering to your classic while maintaining an original appearance with a classic keyed tilt column from Flaming River. Each column is manufactured in the USA with all new components including: the GM ignition switch and key assembly with the full function positions and standard GM plug module. The tilt columns are constructed of 304 stainless tubing and also incorporate a high strength all steel shaft with Teflon coated bearings and Flaming River's exclusive "Tru-Torque" tilt locking system. Available for both floor shift or column shift applications, each column can be ordered in a plain mill finish, polished stainless or black powder coat. Columns are sold each and carry a 3-year/36,000 mile warranty. Installation and mounting accessories are sold separately.

More vehicle models available (Column Shift), please see OPGI.COM for your vehicle fitment.

EASILY ADD TILT-WHEEL TO YOUR CLASSIC
All-new components throughout

PP00957
(Column shift - Chrome)

Tilt Steering Columns
Steering columns are now available for floor shift or column shift applications. Add modern tilt-wheel convenience and choose between natural or chrome-plated finishes to fit your needs. Each column features a 2" diameter tube packed with a 1" DD shaft and all new internal components, including 4-way flasher, turn signal switch, and complete wiring. The 1969-72 columns feature a built in ignition switch complete with new tumbler and key set. All steering columns are designed to accept OEM or aftermarket steering wheels from 1967-up. Column shift columns will include a neutral safety switch as well as a chromed plastic shift indicator housing with clear acrylic lenses for three and four speed transmissions.

CH20122	69-72	11" rotor.....	pair	133.99

NOTE1: Rotors can be used on 1964-68 cars equipped with OPGI disc brake kits. NOTE2: This high-performance item is not eligible for any further discounts or promotional pricing.

1967-77 Cutlass & 4-4-2 Rotors

Part#	Year	Desc.	UOM	Price
KR20106	67-68	4-piston type	each	99.99
BD60232	69-72	front w/disc.....	each	45.99
PBD5214	73-77	front w/disc.....	each	54.99

NOTE: Part# KR20106 is a one-piece rotor designed to work with the original four-piston calipers.

1964-72 Roller Bearing Hub Kit

This front hub kit is the ideal addition to any brake system. The lightweight kit will remove 2-lbs. from your front end and increase strength over the original cast iron hubs. Perfect for today's modern wheels and upgraded braking systems, each kit features forged aluminum hubs, inner and outer roller bearings, bearing races, wheel studs, seals, hardware and grease caps.

Part#	Year	Desc.	UOM	Price
CH30250	64-72	.....	each	189.99

NOTE: These kits can be used with disc brake conversions that utilize the original hub and spindle.

1964-72 Drum Brake Hub Kit

This drum brake hub kit is a direct replacement for missing or worn originals. The front drum brake hubs are cast, just like OEM and come complete with new wheel studs, as well as bearings, races, seals, nuts, washers, pins and caps for a hassle-free installation to get you back on the road.

Part#	Year	Desc.	UOM	Price
CH30556	64-72	.....	KIT	56.99

NOTE: These kits can be used with disc brake conversions that utilize the original hub and spindle.

REPRODUCED TO OEM DIMENSIONS

A must-have for disc brakes

CH20359

1964-72 Disc Brake Spindles

These original style disc brake spindles are identically forged to factory specifications for fit and finish. Each spindle is expertly machined and ready for installation.

Part#	Year	Desc.	UOM	Price
CH20359	64-72	.....	each	99.99

FORGED 1045 ALLOY STEEL

For OEM or big disc brakes

1964-72 2" Forged Drop Spindles

New drop spindles are ready for installation. The spindles are designed to be used with factory disc brakes or larger 13" big brake kits. When using the OE disc brakes, the factory steering arms and calipers bolt right up. The spindles are forged from 1045 steel alloy for strength and durability and precisely machined for a perfect fit. Spindles require the use of 15" or larger disc brake wheels that do not exceed a 4" backspace.

Part#	Year	Desc.	UOM	Price
CH26651	64-72	.....	pair	249.99

NOTE1: Factory disc brake caliper bracket requires slight modification for a proper fit. Modification involves light grinding for clearance. NOTE2: The use of these spindles eliminates the use of original backing plates.

IMPROVE HANDLING!

Reduce body roll!

MADE IN THE USA

AFX Pro Spindles

Wilwood's AFX ProSpindle Kits contain a pair of high strength steel spindles for 1964-72 GM A Body vehicles that use the original bolt on steering arms. Specifically designed for use with Wilwood's disc brake kits, with a 2.00" drop for a more aggressive stance without affecting steering geometry. With the added benefits of providing a lower center of gravity, raised front roll center and a decreased camber change also improve handling with less body roll. Installs using the OE ball joints using original or aftermarket control arms. The kit includes four steering arm bolts, two for each spindle.

Part#	Year	Desc.	UOM	Price
WW15890	64-72	.....	set	289.99

FORGED 4140 STEEL CONSTRUCTION

For OE style brakes

1964-72 2" Drop Disc Brake Spindles

Lower your center of gravity and improve handling without hassle using these forged steel drop spindles. Designed to mount directly to original equipment ball joints, tie rod ends, and steering arms while allowing the use of factory single piston disc brake components as well as original dust shields.

Part#	Year	Desc.	UOM	Price
PP05701	64-72	.....	pair	189.99

NOTE: Installation may require slight clearancing on factory disc brake caliper.

1964-72 Hydraulic Brake Assist Kits

These all new hydraulic brake assist kits are the perfect upgrade for your existing manual or vacuum-assisted brakes. With the use of hydraulic pressure, these kits put an amazing 1800psi to the wheels for serious stopping power. Kits are available in two styles, the Street Beast and the Show Stopper. The Street Beast includes the hydraulic assist unit, steel firewall bracket, aluminum Corvette-style master cylinder, underhung prop and stop block kit, rubber pressure and return hoses, and all necessary fittings and hardware for installation. The Show Stopper includes the hydraulic assist unit, billet aluminum firewall bracket, MCPV-1 aluminum all-in-one master cylinder, chrome accumulator cover, braided stainless steel pressure hose, rubber return hose, and all necessary fittings and hardware for installation. Due to the placement of the master cylinder and proportioning valve in this kit, brake lines from the proportioning valve to the distribution block must be custom made upon installation.

COMBINES ALL THE KEY COMPONENTS OF THE BRAKE SYSTEM

CH26658

1961-77 MCPV-1 All-In-One Polished Master Cylinder

Weighing in at only five pounds, the MCPV-1 aluminum master cylinder has all the features of a modern braking system in one master cylinder. It has a double-adjustable proportioning valve, removable metering valve (for 4-wheel disc brake cars), stop light switch port, larger capacity (1-quart), and a smaller size than a conventional iron master cylinder. It's approximately the same size as an iron Corvette master cylinder, only much lighter. The MCPV-1 has two circuits: a front circuit with a metering valve for disc front/drum rear brakes, which is removable for 4-wheel disc brakes, and a rear circuit that has the double-adjustable proportioning valve and a maximum rear pressure adjustment. The proportioning valve controls the brake pressure between front and rear brakes, while the rear pressure adjustment controls what the maximum pressure is to the rear brakes. They're available in two different bore sizes for most brake applications and come with a polished finish.

ADJUSTABLE DESIGN ALLOWS YOU TO FINE TUNE YOUR SYSTEM

1964-77 Wilwood Adjustable Proportioning Valve
These premium proportioning valves from Wilwood allow you to precisely adjust your vehicle's brake pressure and are a must have for any disc brake conversion. Each valve features a forged-billet body and a fine-thread adjustment knob for pinpoint accuracy when tuning. Two valves are available to suit your needs. The standard valve features an adjustment knob and a single inlet and outlet. The combination valve features and adjustment knob, high-pressure brake light switch and a total of three inlets and three outlets while maintaining full isolation between front and rear circuits.

'64-72 REPLACEMENT

1964-72 Proportioning Valves
Proportioning valves are a vital part of the braking system and are necessary when converting from drum to disc brakes. Making sure fluid is going to the right place and maintaining correct pressure is important. Whether disc/drum or disc/disc, OPGI has the right valve to get the job done.

Part#	Year	Desc.	UOM	Price
CH26775	64-72	disc/drum	each	36.99

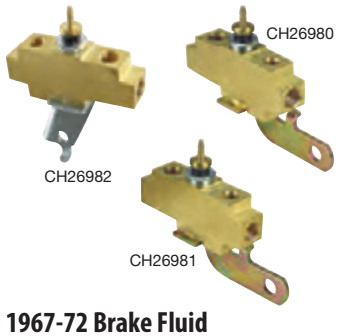
AUTHENTIC SIZE — SOLID BRASS

Brake Fluid Distribution Block

These solid brass distribution blocks route the brake fluid from the master cylinder to the front and rear of the car. OPGI is now offering exact reproductions of these brake distribution blocks that fit and function just like the originals. The 1964-65 block looks just like the 1966 block, but the 1966 had a 1/4" brake line that goes from the front to the rear of the car. The 1967 block is for a dual reservoir master cylinder or disc brake-equipped vehicle. These blocks are correct in every detail for that top-quality restoration.

Part#	Year	Desc.	UOM	Price
G240269	64-65	.....	each	19.99
G240270	66	w/1/4" rear line..	each	19.99
G240271	67	w/dual master cylinder..	each	29.99



1967-72 Brake Fluid Distribution Block

Fluid distribution blocks were used on all cars whether equipped with disc or drum brakes. The block mounts to the frame and feeds both the front and rear brakes. While not a proportioning valve or hold-off valve, the block will contact the brake warning light if there is a loss of pressure detected. This valve features the correct brass body and phosphate-plating on the mounting bracket.

'70 CUTLASS

1970 Disc Brake Hold-Off Valve

This valve is a reproduction of the original hold-off or correction valve used on 1970 model cars equipped with disc brakes. The valve mounts to the frame and holds pressure from the front allowing the front brakes to actuate a split second prior to the rears. During extreme braking, the valve prevents the car from getting sideways as well as evening out the braking load.

Rear Drum Brake Hardware
Keep your rear drum brakes working properly with new hardware. New brake shoe washers, spacer bars and spacer bar springs are all available from OPGI. The washer slides over the shoe mounting stud to keep things in place, while the spacer bar acts as a support for the shoes on the lower portion of the drum—it also helps the automatic adjusters to work correctly. Often worn or bent, it's definitely a good idea to replace these small items.

STAMPED STEEL
Necessary for proper brake function

CH30538-PR

1964-77 Rear Drum Brake Levers
Levers are identically reproduced to factory specifications for use on all 9-1/2" rear drum applications. The stamped steel lever fits into the brake drum and is activated by the parking brake cable. When the cable is pulled, the shoes are pressed against the drum stopping any potential movement. Sold individually or in a discounted pair.

BRAKE SYSTEM BLEEDING & FLUSHING MADE EASY

1961-77 Power Bleeder Kit
This power brake bleeder is designed as a one-person operation with no external power source needed. Because of the two-quart container, you can flush a complete brake system without having to stop to refill the fluid supply container. They say you should flush your brake system once a year due to the absorption of up to 2% moisture and contaminants, which will rust, corrode and wear-out brake system components. The "Power Bleeder" makes this an easy operation and it is a durable tool that is inexpensive to boot. Comes complete with the correct adapters, hoses and clamps.

Part#	Year	Desc.	UOM	Price
CH26311	61-77	.....	each	89.99

1961-77 Motive Products Brake Bleeding Catch Bottle Kit
When you're using Motive Products power brake bleeder, this catch bottle kit will be very handy. The kit consists of two 500 mL polyethylene bottles with a flexible bleed valve attachment tube and steel wire to hang the bottles from any suspension part. Each bottle also has a vent on top to connect the bleed valve tube when the bottle is not in use.

Part#	Year	Desc.	UOM	Price

Speed Bleeders
Brake bleeding is now a one-person job. This revolutionary Russell "Speed Bleeder" replaces the original bleeder valve in your caliper/wheel cylinder with a spring-loaded, one-way ball and check valve design. This allows the old fluid and air out and then closes automatically between pumps preventing the old fluid and air from re-entering the brake line. Just position a container to collect the brake fluid then remove your OEM bleeder screw and replace it with the new Speed Bleeder screw.

Part#	Year	Desc.	UOM	Price

CH29051

Wilwood Brake Fluid
Five is DOT approved and provides superior lubrication to all moving brake parts such as master cylinder and caliper pistons, bores and seals. Wilwood's High Temp 570 is a specially formulated racing fluid that has a minimum dry boiling point of 570° Fahrenheit to withstand the rigors of racing. The low viscosity allows easy bleeding of your brake system, eliminating aeration of the brake fluid caused by foaming due to excessive pumping of the pedal. Both fluid types are sold in packs of six 12-oz bottles, which are hermetically sealed to guarantee against unwanted absorption of moisture.

THE ULTIMATE IN STOPPING POWER FOR MUSCLE CARS

CH24763

ACDelco

1967-77 ACDelco Dura-Stop Brake Shoes

With their specially formulated friction material that doesn't require a break-in period and consistent high-torque stopping power at all pad temperatures, these Dura-Stop pads and shoes are the best available. The pads are also 400% stronger than standard ones, due to a special pad and steel backing plate molding, not bonding process. Other benefits of these pads and shoes include instant brake response, with a light pedal effort, dramatically reduced fade in an extreme stop and reduced rotor checking and cracking. The ultimate in muscle car brake pads and shoes.

Professional Flaring Tool
Making quality flares in tubing can be difficult without the proper tools. This professional level flaring tool makes flares quickly in all types of tubing and does not damage or deform the tubing. The tool comes with 5 dies and one turret with 8 punches to provide 37° flares for 3/16", 1/4", 5/16", 3/8" and 1/2" tubing sizes in various materials including copper, aluminum, copper/nickel, steel and stainless steel. The Earl's Professional Flaring Tool also includes a bench mounting flange to mount to your shop bench and can also be used with a vise.

Part#	Year	Desc.	UOM	Price
ERL1002	61-77		each	447.99

ERL1025

Professional Lever Style Tubing Benders
Earl's professional tubing benders are high-quality tools that can handle all types of tubing including harder material like stainless steel but will also work with other materials such as steel, copper and copper/nickel. The open side of the tool slips over the tube at any point, and makes smooth, tight radius bends without scoring or flattening the tube and can bend tubing up to 180°. Each tool bends a single size and are sold individually.

HOLDS FUEL AND BRAKE LINES TO THE FRAME

1964-67 Rivet-Style Line Clip

Depending on the application there were either four or five of these rivet clips used to hold the brake and fuel lines to the frame—front-to-rear. The clip is designed to hold two lines, but in some instances, it only held one line. These rivet clips mount just the way the factory ones did and are dyed the original red color for an exact factory look.

Part#	Year	Desc.	UOM	Price
C240224	64-67	.....	each	5.99

FOR BRAKE/FUEL LINES

1968-72 Heavy-Duty Frame Clip

These clips keep the brake and fuel lines up and out of the way of the forward mounting point of the lower rear control arm. It is reproduced just like the factory part with the correct gray phosphate coating. They are used on both sides of the frame. These are capable of holding up to three lines although, from the factory, they typically held one or two lines. A high-quality reproduction.

1966-72 RESTOPARTS® FUEL TANKS

PROFESSIONALLY STAMPED GALVANIZED, STAINLESS STEEL OR NI-TERNE, YOUR CHOICE!

GALVANIZED TANKS feature a double-sided zinc coating for corrosion resistance. all seams and components are copper brazed for increased strength and durability, while a powder coated finish is applied to each brazing area as an added layer of protection.

NI-TERNE STEEL TANKS feature a double-sided zinc-tin alloy coating for superior resistance to rust and corrosion. Featuring added shine, these tanks are soldered w/tin to reduce or eliminate the possibility of cracks & leaks found in other tanks.

STAINLESS STEEL TANKS are stamped to factory specs using 304 stainless steel sheet & provide the ultimate in appearance & corrosion resistance. Each tank is tin soldered to prevent cracks and leaks.

Fuel Tank Assemblies

Premium fuel tanks from RestoParts® are now available & ready for shipment! Choose from Galvanized, Ni-Terne, or Stainless steel. Each tank features the lock ring & gasket for installation of the fuel sending unit. Tanks also feature the necessary vent & return line connections as well as the filler neck where specified. Rather than arc welding which can become brittle & subject to premature cracking, our RestoParts® tanks are manufactured using superior methods for increased strength & durability. These methods are able to withstand constant road vibrations without fears of cracking or leaking.

AEROMOTIVE QUALITY AND INGENUITY

Completely assembled and ready to install

AER8103

Stealth Gen II Fuel Tanks

The new Gen II Stealth tank utilizes Aeromotive's patented and award-winning Phantom in-tank technology that enables a quiet, high-flow EFI pump and baffle to maintain an ample fuel supply around the inlet of the pump while ensuring consistent fuel delivery and drivability even in low fuel conditions. Unlike competitive tanks, Aeromotive's Gen II Stealth tanks feature outlet and return ports along with electrical terminals positioned in the OEM location. This design enables flush installation to the vehicle floor and will not require strap modification or spacers. All Gen II Stealth tanks come out of the box completely assembled. The fuel pump, fuel level sending unit, and fuel/electrical bulkhead are pre-installed. As a true plug-and-play assembly, the Aeromotive Gen II Stealth tank gets you out of the garage and on the road in no time.

FiTech Fuel Injection

Fuel Tank & EFI Fuel Pump

FiTech has partnered with TANKS Inc. to make your EFI upgrade easier with a complete offering of fuel tanks and FiTech In-Tank Pump Module!

Fuel Injection demands higher pressure from an electric fuel pump and the best place to mount a pump is in the gas tank. FiTech's In-Tank Module secures the supplied 340 LPH pump and bolts directly into the new tank providing a modern EFI solution that supports up to 800 horsepower (NA). Notched tanks help with exhaust clearance and vehicles with mini-tubs.

- Direct-fit tanks feature internal baffles for constant fuel delivery
- In-Tank Pump Module secures the supplied 340 LPH pump in the tank
- -6 AN inlet/outlet provide leak-free fuel line connections
- Recessed sending unit mount provides added clearance
- New mounting straps and fuel level sending unit supplied

DT38HB

Fuel Hose Kits

Available for standard models and models with return vapor lines.

THESE EXACT REPRODUCTIONS INCLUDE:

DT38HC STANDARD:
Includes a 3/8" gas hose, plus pinched clamps (green) from front hose-to-pump and rear hose-to-gas sender unit connection for a single, one-piece gas line.

DT38HB WITH VAPOR RETURN:
Includes both 3/8" and 1/4" hoses, plus correct green 3/8" clamps and red 1/4" clamps for non-high-performance models with vapor return line.

DT38HA STANDARD:
Includes a 5/16" gas hose, plus pinched clamps (black) from front hose-to-pump and rear hose-to-gas sender unit connection for a single, one-piece gas line.

A MUST-HAVE

Run your fuel pump when you need it

1961-77 Electric Fuel Pump Controller

This fuel pump controller is ideal for any vehicle that utilizes an electric pump. The controller works off of the tachometer signal which tells the pump when to work. The pump is allowed to run for 3-seconds when the key is turned on in order to prime the system, after that, the pump runs only when the engine is running. When the engine stops, so does the fuel pump. The controller is for use with any 12-volt pump and includes detailed instructions for a straightforward installation.

MADE FROM BILLET ANODIZED ALUMINUM

Supports up to 900 HP

ARO7254

AEROMOTIVE

MADE IN THE USA FREE SHIPPING ON THIS ITEM

1961-77 Phantom Fuel Systems

These Phantom 340 Stealth fuel systems from Aeromotive converts any stock fuel tank to a modern, in-tank design and supplies enough fuel for whatever engine combination you have. Whether you have a carbureted application, EFI swap or you are placing a late model electronic fuel injected engine into your classic, OPGI has what you need! The clever design of this fuel system allows you to have an in-tank fuel pump that runs quietly, keeps fuel from sloshing and keeps the pump submerged even at low fuel levels. This system includes all the fittings needed, the fuel pressure regulator as well as the fuel filter needed to get you on the road quickly. Not only will these kits support up to 900 horsepower, they are made of anodized billet aluminum and made in the U.S.A. Detailed instructions are included to make sure you know exactly what needs to be done to complete the installation. AN-08 style fuel hose and hose ends are not included.

Carbureted: (1) 18688 Phantom 340 fuel pump, (1) 12321 10 micron fuel filter, (1) 12305 fuel filter bracket, (1) 13204 bypass fuel pressure regulator, (1) 16307 fuel pump wiring kit, (3) 15606 AN-06 ORB to AN-06 flare fittings, (1) 15607 AN-08 ORB to AN-08 flare fitting, (3) 15610 AN-10 ORB to AN-08 flare fittings, (1) 15626 AN-06 port plug, (2) 15649 AN-06 ORB to AN-08 flare fittings, (1) 15632 0-15 psi fuel pressure gauge.

EFI conversions: (1) 18688 Phantom 340 fuel pump, (1) 12321 10 micron fuel filter, (1) 12305 fuel filter bracket, (1) 13131 bypass fuel pressure regulator, (1) 16307 fuel pump wiring kit, (6) 15606 AN-06 ORB to AN-06 flare fittings, (2) 15609 AN-10 ORB to AN-06 flare fittings, (1) 15626 AN-06 port plug, (1) 15633 0-100 psi fuel pressure gauge.

Late model EFI: (1) 18688 Phantom 340 fuel pump, (1) 12321 10 micron fuel filter, (1) 12305 fuel filter bracket, (1) 13131 bypass fuel pressure regulator, (1) 16307 fuel pump wiring kit, (1) 15118 3/8" quick connect to AN-08 fitting, (1) 15605 AN-08 ORB to AN-06 flare fitting, (6) 15606 AN-06 ORB to AN-06 flare fittings, (2) 15609 AN-10 ORB to AN-06 flare fittings, (1) 15633 0-100 psi fuel pressure gauge.

Dual Action Adjustable Fuel Log

This dual action adjustable fuel log from Aeromotive not only cleans up your engine compartment but has great features too! The slip style length adjustment allows fitment to both 4150 and 4500 style carburetors, Holley HP style carburetors, and Demon style carburetors. Made of billet aluminum, the ball and socket adjustment permits the log to be manipulated vertically for better clearance. Each end features ORB-10 inlet and outlet ports and two 1/8" NPT ports for gauges and/or pressure transducers. Each adjustable fuel log is finished in a bright-dip black anodized finish for durability and great looks.

EFI AND CARBURETED APPLICATIONS

ARO3204 ARO3101

AEROMOTIVE MADE IN THE USA

1961-77 A1000 Bypass Fuel Pressure Regulators

Made of anodized billet aluminum, these fuel pressure regulators from Aeromotive are the best on the market. Available for both electronic fuel injected or carbureted applications, the Aeromotive A1000 bypass fuel pressure regulators are meant for medium to high horsepower applications to control fuel pressure to an optimum level. These regulators can be used in either gasoline or alcohol configurations as well as supercharged or turbocharged engines. Each bypass fuel pressure regulator comes with easy to follow instructions to ensure you have the system set up correctly.

Electronic fuel injected regulator: Base pressure adjustable from 40-75 psi, 1/8" NPT gauge port, (2) ORB-10 inlet ports, (1) ORB-06 return port, 1:1 boost/vacuum rise ratio.

Carbureted regulator: Base pressure adjustable from 3-15 psi, 1/8" NPT gauge port, (1) ORB-10 inlet port, (1) ORB-08 return port, (2) ORB-06 outlet ports, 1:1 boost/vacuum rise ratio.

	Part#	Desc.	UOM	Price
3	ARO3204	carbureted	each	214.99
3	ARO3101	EFI	each	205.99

NOTE: Carbureted applications require AN-08 return line from bottom of regulator to the top of the fuel tank.

Holley Electric Fuel Pumps

The Holley electric fuel pumps provide constant fuel flow with no pulsation. Each have externally accessible pressure relief valves & are more tolerant of contaminated fuels. Each pump weighs approximately three pounds & includes mounting bracket. The "red" pump flows 97 gph (free flow) & 67 gph at five psi. The "blue" pump flows 110 gph (free flow) & 70 gph at nine psi & includes fuel pump pressure regulator part# CH20503. These pumps are not designed or recommended for use on fuel injection systems. Use of safety shut-off switch part# CH20505 is strongly recommended.

FOR STREET OR RACE!

Edelbrock Electric Fuel Pumps

MADE IN THE USA

Made to the highest quality standards. Machined from aircraft-quality aluminum to aerospace tolerances for extended life & performance. Available in both a 120 gph & 160 gph (gallons-per-hour) configuration. The 120 gph pump (good for 600 HP) preset at 6.5 psi so no regulator is needed. The 160 gph pump (good for 1000 HP) requires the fuel pressure regulator, which has 3/8" NPT inlet/outlet & is adjustable from 5-10 psi.

Aeromotive 1961-77 Aeromotive In-Line Fuel Filters

MADE IN THE USA

Aeromotive's in-line fuel filters are made from anodized aluminum and are available in a variety of finishes. Aeromotive has made these fuel filters to run on anything from 200 to an astounding 3000 horsepower. Available in NPT, ORB, AN and canister styles, with your choice of a 100, 40 or 10 micron filter. The 100 micron in-line filters include a stainless steel cleanable element that is meant to be used between the fuel tank and the fuel pump to protect the pump. The 40 micron in-line filters include a fabric filter element and the 10 micron in-line filters include a cellulose filter element that are meant to run after the fuel pump to protect your injectors or carburetor.

More Fuel Filters also available. Please see OPGI.COM for your vehicle fitment.

Holley In-Tank Fuel Module

FREE SHIPPING ON THIS ITEM

Perfect for those interested in an EFI conversion but do not want to worry about the complications of changing the fuel system. Convert your factory fuel tank or fuel cell to an in-tank EFI fuel system quickly! The conversion is easily accomplished with basic tools and requires no welding or fabrication. The billet aluminum module design includes a billet pump hanger bracket to control pump vibration while also providing a low profile design to fit where space is at a premium. Once installed, hook up your fuel lines and your power source/ground and you are on the road. The Holley Universal In-Tank Retrofit Fuel Modules support up to 550 EFI horsepower or 700 carbureted horsepower. This kit is ideal for Holley Terminator EFI, Sniper EFI, MSD Atomic EFI or any other TBI or EFI conversion. Each kit is available for both return and returnless style.

Holley EFI CONVERSIONS AT ORIGINAL PARTS GROUP

For over a century Holley has driven the cutting edge of fuel-system design. That work continues today through Holley's market-leading EFI products as well as through Holley's family of best-in-industry brands. Top brands like MSD, Flowmaster, Hurst, Accel and many more make up the industry's leading offering of enthusiast-driven products to deliver robust, complete performance solutions for builders, racers, and drivers.

HOLLEY SNIPER EFI KITS

Easy to install and will support up to 600 HP with a simple 4 wire connection. There are no extra control boxes to mount and both the fuel pressure regulator, ignition timing control are completely integrated. All controlled by an included color touchscreen programmer. The self-tuning ECU will automatically make adjustments on the fly which means no laptop required. The master kit will contain the most complete EFI fuel system on the market. Everything is included to completely plumb your fuel system including 20 feet of 3/8" EFI hose, in-line fuel pump, post and pre fuel filters, return bulkhead and all of the necessary fittings and hardware.

STARTING AT

3 **$1,124.99**

SNIPER QUADRAJET EFI CONVERSION

The first bolt on spread bore electronic fuel injected throttle body system that does not require any additional adapters, sealing plates, or intake manifold swaps! The system retains the same great features as the 4150 Sniper EFI version such as; four 100lb./hr. Injectors, built in timing control, a 3.5" full color touchscreen and much more! The throttle body will support up to 500 horsepower naturally aspirated. In addition to all of these great tried and true features, the Sniper EFI Rochester Quadrajet™ (Q-Jet) system will fit most stock air cleaners and offers multiple fuel inlet configurations that allow for a stock appearing installation!

STARTING AT

3 **$1,403.99**

DUAL-QUAD SNIPER STEALTH 4150 EFI

The Sniper EFI 4150 2x4 system from Holley features 8, 100LB/HR Fuel Injectors capable of supporting 1250 HP on both naturally aspirated and forced induction applications. The Sniper EFI 4150 2x4 was designed for use on naturally aspirated engines, while the Super Sniper EFI 4150 2x4 system was developed for both naturally aspirated and draw through supercharged applications. Every Sniper EFI can be used with free downloadable Sniper EFI Software, giving you unlimited control of your engine. Super Sniper EFI 2x4 comes with a USB to CAN tuning cable allowing for live engine tuning.

Holley Sniper Air Cleaner Assemblies

Complete your Sniper upgrade with our new 14" Sniper air cleaner assemblies. Each air cleaner assembly includes a stamped steel lid with an embossed Holley Sniper logo, a 1" drop base specifically designed for Sniper EFI applications, your choice of a 3" or 4" paper filter element, and all necessary mounting hardware. The included drop base fits all carbs and throttle bodies with a 5-1/8" neck - more specifically Sniper EFI 4150 throttle bodies with clearances for front mounted fuel fittings*, and Sniper EFI 2300 throttle bodies. Available in both black and chrome finishes to best match your SniperEFI unit.

Ultimate LS EFI System

FiTech's Ultimate LS Induction systems are designed as a complete system for your LS engine and are ready to be installed out of the box! The sheet metal intake looks stellar and delivers the performance to match for engines ranging from 500-750 horsepower. Kits are available with or without built-in transmission controls for popular GM 4-speed automatics. There are kits available with a taller intake to accept the truck accessory drive assembly.

- •Cast throttle body with a 92mm(500 HP) or 102mm(750 HP) inlet
- •Sheet metal design is ideal for a 1500-6500 rpm power band
- •Self-learning technology maintains your target air/fuel ratio settings
- •Sequential fuel and spark control with individual cylinder trim
- •Connects to 24x and 58x cam sensors
- •Knock sensor control connects to factory sensors
- •3-Bar MAP sensor for boosted applications up to 30-psi
- •Tach output driver works with most tachs
- •Two programmable electric fan outputs
- •Wide band oxygen sensors
- •Custom wiring harness for a direct plug-in installation
- •Control the shift points & firmness of 4L60/65/80/85 transmissions

STARTING AT **$1,966.99**

Master kits include the above plus:

- •FiTech EFI Kit with Inline Pump Kit

This kit is supplied with our heavy duty, 255 LPH, external fuel pump that is suitable to support engines producing up to 650 horsepower. This kit includes 40 feet of high pressure fuel hose, two fuel filters including a serviceable 10-micron filter, fittings, mounts & clamps.

- •FiTech EFI Kit with Force Fuel System

The new Force Fuel System mounts under the hood and uses the stock fuel pump to supply fuel to the reservoir. Inside is an efficient 340 LPH electric pump that produces the high pressure required of the EFI system. This kit is supplied with the reservoir assembly and includes a built-in pressure regulator, 5-feet of high pressure hose, -6AN fittings and an efficient 10-micron serviceable fuel filter.

NEW! Retro-LS EFI Kit

3

The Retro-LS throttle body system, plated in classic carburetor gold, bolts to an LS intake made for carburetors and delivers all the driveability benefits of a factory EFI system. The kit supports up to 650 horsepower with its four 80-lbs injectors and delivers a semi-sequential fuel supply through an effective annular discharge design. For ease of installation, a wiring harness is supplied that is already terminated with the specific LS engine sensors, including the factory knock sensors to complement the built-in timing control. On top of that, the ECU also has the ability to control the transmission shift points and characteristics of the popular 4L60/65/80E transmissions.

CH33710 (BASE) **$1,723.99**

CH33711 (MASTER) **$2,104.99**

No laptop is required and the system will work on 24x or 58x cam sensors. Supplied with: ECU, handheld controller, windshield mount, dual WB02 sensors, bung kits, gasket, and mini USB cable. Master kits include the above plus: •FiTech EFI Kit with Force Fuel System. The new Force Fuel System mounts under the hood and uses the stock fuel pump to supply fuel to the reservoir. Inside is an efficient 340 LPH electric pump that produces the high pressure required of the EFI system. This kit is supplied with the reservoir assembly and includes a built-in pressure regulator, 5-feet of high pressure hose, -6AN fittings and an efficient 10-micron serviceable fuel filter.

GO Port EFI

3

The Go Port EFI system features eight injectors placed precisely in each intake runner to inject fuel right into the cylinder head port. A sequential port fuel design provides excellent throttle response, effective fuel atomization and delivery resulting in terrific throttle response and overall performance.

starting at **$1,299.99**

FiTech offers two complete systems; a kit for up to 550 horsepower and a 1050 horsepower kit. Each system is supplied with a new aluminum intake machined and fitted with injectors (36 or 80 lbs), fuel rails, the wiring harness and an 850 cfm throttle body. The ECU, with its high speed processor, is integral to the throttle body along with the TPS, IAC, IAT and MAP sensors reducing wiring and making installation as easy as possible. All setup is handled through the color touchscreen monitor with no tuning experience necessary to have your engine fired up and running at its best. There is also a standalone system if you would like to supply the manifold. Supplied with: Throttle Body, gasket, aluminum single plane intake manifold, high flow fuel rails, injectors, WB02 sensor, bung kit, coolant temp sensor, color touchscreen monitor and mount.

Atomic EFI

Adding fuel-injection to your classic car just got easier with the Atomic EFI from MSD. The Atomic EFI is the fastest way to quicker starts, smoother idle and immediate throttle response. Available in several configurations as complete kits, each throttle body injection unit is packed with features designed to enhance performance and reliability. An internal fuel rail reduces leaks and provides a sleek appearance. Annular rings improve fuel atomization and ensure the best air/fuel mixture is delivered to each cylinder. The square-bore design features large 1.75" diameter throttle blades that are riding on precision roller bearings for a smooth pedal transition. The self-calibrating throttle position sensor and four 80-lb injectors ensure that fuel is delivered at the correct rate. Wiring is reduced by integrating the ECU and most sensors into the throttle body. The only sensors you'll need to connect are the O2 and coolant temperature. The compact power module is a simple plug-in device that can control the electric fuel pump and two electric fans. A hand-held programmer provides a hassle-free way to custom-tailor the EFI to your engine and monitors all of the vitals during operation.

- Master Kit: Throttle body, power module, wide band O2 sensor, hand-held monitor, fuel pump, filter, brackets, high-pressure hose & clamps.
- Standard Kit: Throttle body, power module, wide band O2 sensor, hand-held monitor.

Adjustable Fuel Log

This fuel log from Edelbrock is a great solution for getting the perfect fit on your Holley or Demon 4150/4500 series carburetor. It features -10 AN telescoping center log that is adjustable from 7-3/4" to 13-1/2". It also features swivel ball socket ends that can be adjusted to clear various air cleaners and carburetor linkage accessories. The fuel log also includes two 1/8" NPT ports for use with a gauge or pressure transducer. Comes finished in a sleek black anodized aluminum for a great look.
Includes: Two aluminum gaskets, two O-rings, -10AN plug & -8AN Male x -10AN port fitting.

LS ECU & HARNESS KITS

The new Pro-Flo 4 LS ECU & Harness Kit is what you'll need to complete your Gen III or Gen IV Chevy LS engine swap. Retains the LS engine's OEM EFI components.

ED35711

Pro-Flo 4 LS Engine Swap ECU & Harness Kits

Now you can get an affordable easy solution for adding EFI on your Gen III or IV LS engine. This basic EFI conversion kit is a great option if you already have an EFI intake on your LS engine and only require an engine management system. This kit is a great solution for any performance level LS engine swap. These kits include the all new Pro-Flo 4 ECU, Bosch 4.9 LSU wide band sensor and harness. The harnesses connect directly to the factory coils, injectors, camshaft/crank sensors and other sensors on the factory LS intake manifold. To further simplify your LS EFI conversion experience, this system also uses the exclusive Edelbrock E-Tuner 2 wireless Bluetooth Android based tuning application that can be downloaded to your smartphone or optional tablet. No complicated laptop software necessary, as Edelbrock has done the hard work for you. The E-Tuner 2 app includes a setup wizard that's easy to use and the ECU is pre-loaded with calibrations that best fit your engine setup. Once your vehicle is up and running, the self-learning features of the E-Tuner 2 app continually adjust the fuel mapping to get the best performance available from your engine package, leaving you to enjoy the ride!

Quadrajet Streetmaster Carburetors

FREE SHIPPING ON THIS ITEM

In need of a quality replacement for that worn-out Q-Jet? Look no further than OPGI with these "Streetmaster" carburetors from Sean Murphy Induction (SMI). Whether your engine is stock or loaded with performance parts, we've got you covered. Each unit is completely disassembled, cleaned and re-colored. During assembly, the throttle shafts are bushed, all casting plugs are sealed with epoxy to prevent leaks and top-quality components are used throughout.

Level 1 – Intended for stock 430-455 engines. Fits engines with standard bore intake manifolds. Carburetors are equipped with electric choke as well as a front inlet for fuel. Minor linkage modification may be necessary.

Level 2 – Intended for mildly modified 400-455 engines. Equipped with electric choke and front fuel inlet. Recommended modifications include: camshaft duration of 208-224° duration @ .050", compression ratio between 8.5-10:1, mildly ported iron heads or Edelbrock aluminum heads, aluminum intake and headers.

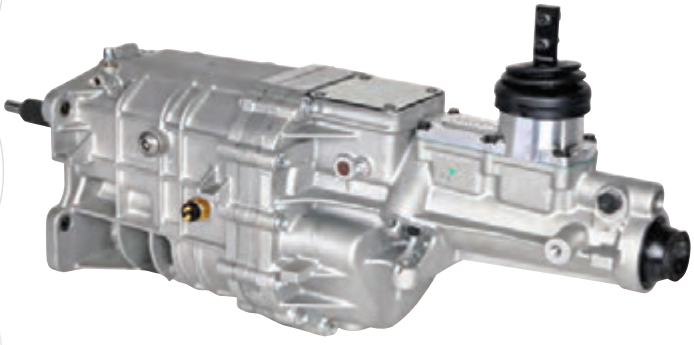
THE AFTERMARKET'S PREMIER TRANSMISSION

Magnum 6-speed manual transmission



CH33765

TREMEC MADE IN THE USA

NEW! Tremec T-56 Magnum Manual Transmissions

The kingpin of TREMEC's high performance line-up, the Magnum double-overdrive 6-speed transmission takes the very best from TREMEC's current OEM technologies and pairs it with the most popular features of the TKO 5-speed. Able to withstand a massive 700 lb-ft. of torque while providing unbelievably crisp shifts, no other manual transmission on the planet offers as much combined strength, versatility, and general ease-of-use as the Magnum. Known in its original equipment form as the 'TR-6060', the Magnum is an aftermarket version of the same transmission found in many of today's most celebrated factory muscle cars. Multiple shifter locations, giving you refinement where you want it and strength where it counts. Can be combined with any GM engine; big block, small block, or LS when using the correct bell housing.

Clutch Fork Included: No
Clutch Type: Hyd
Input Shaft Diameter: 1.125In.

NEW! Tremec TKX 5-Speed Transmissions

TKX 5-Speed Manual Transmission Features and Benefits

- Capable of engine speeds of 8,000 RPMs with shifts at 7,500 RPMs.
- Designed for multiple applications with three shifter locations. Compact, end-loaded design provides clearance in most transmission tunnels without floor modifications.
- Increased case strength with three-piece aluminum housing provides outstanding structural stiffness (includes main case, intermediate plate and rear extension). Gaskets at all flanges simplifies installation and eliminates fluid leaks.
- Superior shift-ability through use of multi-cone synchronizers and hybrid synchronizer rings made of sintered bronze and carbon.
- Noise, vibration and harshness (NVH) minimized with gear layout to best control stress levels. All gears supported by caged needle bearings to reduce end play on the gears.
- All gears and shafts made from special grade steel (ASTM 4615) providing increased torque carrying capacity.
- Equipped with a high-performance short-throw billet aluminum shifter that isolates road noise, while providing clean, crisp shifts.
- Robust design with internal three-rail shift system and steel shift forks.
- Wide gear width increases gear life and torque capacity.
- Built-in reverse light switch and cruise control safety switch.

Tech Specs: 26-spline input shaft. 31 spline output. All gears and shafts made from special grade steel (ASTM 4615) 600ft-lb Constant Load Rated

PERFORMANCE

1961-77 SuperMatic 4L65E 4-Speed Automatic Transmission

CH33197

Chevrolet Performance 4L65E Four-Speed Automatic Transmission is similar in design to the 4L60E. This remanufactured 4L60E electronically controlled four-speed overdrive transmission features five-pinion gearsets, heat-treated stator shaft splines, induction-hardened turbine shaft, seven-plate 3.4 clutch. The 4L65E can handle up to 430 lb.-ft. torque, with gear ratios: 1st: 3.06, 2nd: 1.62, 3rd: 1.00, 4th: 0.70. Use SuperMatic™ converter for direct bolt up to Gen I and Gen II engines. Torque converter not include. Use with electronic controller P/N CH33199 with Chevrolet Performance LS fuel injected applications. Chevrolet Performance has you covered with a 12 month Warranty.

PERFORMANCE

1961-77 Transmission Control Systems

Chevrolet Performance SuperMatic™ Transmission Control Systems are pre-programmed to provide full function transmission operation after completing connections, no laptop programming required, only compatible with E-67 based Chevrolet Performance electronic LS engine control systems. Connect and cruise is simple just connect the clearly marked leads to the engine control harness connections, with no additional wiring required. Optional features for personal preferences: Gearshift timing, Multiple shift patterns, Manual shift mode, Supports most "Tap Shifters" or wheel-mounted paddles and On-Board data logging. For use with 1996-2008 4L60E family transmissions and is compatible with OBD-II code readers.

MADE IN THE USA

NEW! ProFit TKX 5-Speed Conversion Kits

American Powertrain ProFit Tremec TKX manual transmissions and installation kits are designed to fit your classic muscle cars. The TKX has a more streamlined case than the normally used OE design T-56 and T-5 which provides clearance in most transmission tunnels. The rigid 3-piece aluminum housing capable of engines speeds of 8,000 rpm with shifts at 7,500 rpm.

TKX 5-Speed Manual Transmission Features and Benefits

- Designed, tested and built specifically for the aftermarket.
- Designed for multiple applications with three shifter locations. Compact, end-loaded design provides clearance in most transmission tunnels without floor modifications.
- Increased case strength with three-piece aluminum housing provides outstanding structural stiffness (includes main case, intermediate plate and rear extension). Gaskets at all flanges simplifies installation and eliminates fluid leaks.
- Superior shift-ability through use of multi-cone synchronizers and hybrid synchronizer rings made of sintered bronze and carbon
- Noise, vibration and harshness (NVH) minimized with gear layout to best control stress levels. All gears supported by caged needle bearings to reduce end play on the gears.
- Equipped with a high-performance short-throw billet aluminum shifter that isolates road noise, while providing clean, crisp shifts.
- Robust design with internal three-rail shift system and steel shift forks.
- Wide gear width increases gear life and torque capacity.
- Built-in reverse light switch and cruise control safety switch.

Tech Specs: Gear ratios 1st 2.87, 2nd 1.89, 3rd 1.28, 4th 1.00, 5th 0.68, 26-spline input shaft, 31 spline output, All gears & shafts made from special grade steel (ASTM 4615) 600ft-lb Constant Load Rated

Kit Includes: Tremec TKX17805, AP Revolution Offset Shifter Mechanism - OE 4-speed shift position, Driveshaft Slip Yoke - 1330 Solid Yoke, Cryo Hardened Steel, Mechanical Speedometer Conversion - Cable adapter compatible with OE cable, VSS Wiring Harness - For electronic speedometer or fuel injection ECU, Reverse Light Wiring - Weatherseal harness, non-polar, Poly Trans mount, Pilot Bearing - Roller steel, grease pre-pack (LS and non-LS engine included) Shift Knob - White w/black 5-speed pattern, Hardware, Warranty and Instructions

1964-72 ProFit T-56 Magnum 6-Speed Conversion Kits

Do you want to have the convenience of a modern 6-speed transmission in your classic GM A-Body, but do not know what to purchase? OPGI now offers these T-56 Magnum 6-speed ProFit Conversion Kits from American Powertrain. Regardless of having a stump-pulling 600 horsepower big block or a modest 350 horsepower small block under the hood, these 6-speed T-56 Magnum transmissions are built to withstand up to 700 lb.-ft. of torque. Available in either a close ratio or wide ratio configuration, we have exactly what you are looking for your application. American Powertrain has designed these kits to be as comprehensive as possible, yet allowing for some customization to what you as the customer is looking for in the perfect transmission for your application.

Each kit includes: AP Revolution shifter mechanism for OE 4-speed position, seamless DOM driveshaft assembly, cryo hardened steel driveshaft slip yoke, transmission mount, stainless roller pilot bearing, modular reverse light harness, modular reverse lock-out harness, mechanical or electronic speedometer conversion, transmission tunnel patch, shifter knob, hardware, detailed instructions and warranty information.

Close ratio Gear Ratio: 1st: 2.66, 2nd: 1.78, 3rd: 1.30, 4th: 1.00, 5th: 0.80, 6th: 0.63

Wide ratio Gear Ratio: 1st: 2.97, 2nd: 2.10, 3rd: 1.46, 4th: 1.00, 5th: 0.74, 6th: 0.50

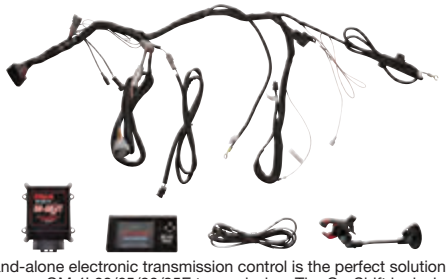
FiTech Fuel Injection

Go-Shift Transmission Controller



FiTech Go-Shift stand-alone electronic transmission control is the perfect solution when it comes to managing your GM 4L60/65/80/85E transmission. The Go-Shift is designed to be easy to install, affordable and simple to program. In fact, all of the transmission settings, including shift points, firmness and converter lock-up can be adjusted through the supplied handheld monitor!

A harness, complete with OEM style sealed connectors, makes installation a plug 'n play affair while the compact ECU easily mounts out of the way. After setting up the trans, you can disconnect the monitor or keep it plugged in to view transmission data.

- Easily adjust the rpm points and firmness of each shift
- Direct plug-in harness for ease of installation
- Speedometer calibration and output
- Compatible with paddle shift inputs
- Control the torque converter clutch lock-up

B&M

1961-77 Transmission Cooler
The "SuperCooler" is one of the most efficient automatic transmission oil coolers available due to its unique rigid stack plate construction, which reduces pressure drops across the internal core. With the stack plate design and the width of the internal tubes, the heat rejection rate is much greater than conventional fin and tube transmission coolers. Because of its rigid design, the SuperCooler is much more resistant to damage from flying debris and rocks. This transmission cooler is pressure tested to 200 psi and it has large 1/2 NPT fittings for maximum fluid flow. Increase your automatic transmission's life with the B&M SuperCooler.

Transmission Slip Yokes

Brand new transmission slip yokes are available to help you set up your drivetrain correctly. Manufactured in ductile cast-iron and precisely machined for proper fit and function, these slip yokes are ideal for any application. Choose spline count, overall length and snap ring orientation to ensure the correct configuration for your vehicle.

The 27-spline fits Powerglide, TH350, 700-R4, 200-4R, early B/W T10, '63-70 Muncies (except '70 M22) and all Saginaw manual transmissions. The 32-spline yoke fits the TH400, '70 Muncie M22 and all '71-74 Muncies. The 31-spline fits all Tremec TKO & Magnum manual transmissions.

LIGHTWEIGHT ALUMINUM

Dual bolt-pattern

Tremec Magnum Bellhousing

GM to Tremec Magnum bellhousing will mate any V8 engine to a Magnum T56 6 speed transmission. Cast from A356 aluminum, the bellhousing features extra-thick walls to handle torque and horsepower. At 33lbs the housing is lighter than cast iron at a lower price, making it a cost effective solution for builders who are not needing SFI certification. Features: Heavy duty high quality aluminum casting, direct bolt-on to GM or Viper style Tremec 6-speed, fits 11" clutch, includes dust cover and all necessary hardware, dual starter pocket, 100% manufactured in the USA.

REMOVE THE OLD MECHANICAL LINKAGE

Made in the USA

CH31391

AMERICAN POWERTRAIN MADE IN THE USA

1964-72 Hydramax Hydraulic Clutch Kits

Are you installing a 4-speed or converting to a modern 5 or 6-speed manual transmission in your classic A-body GM vehicle but do not want to mess with the original style linkage? These American Powertrain Hydramax hydraulic throwout bearing conversions are exactly what you are looking for! The Hydramax hydraulic bearing conversion set is easily installed and uses original or aftermarket style pedals and because of the adjustable master cylinder bracket, you are able to achieve the perfect clutch rod angle without having to make unnecessary holes in your firewall. Aside from working with original style pedals, these kits will work with most 4-speed, Tremec TKO, Richmond, T56 and Magnum 6-speed transmissions.

The kit includes: Pre-bled Hydramax concentric slave cylinder, steel braided lines, 3/4" bore black powdercoated master cylinder, nickel plated firewall mount, reservoir kit, pedal rod, fittings, hardware and complete instructions.

POWDERCOATED ALUMINUM
'64-72 A-body

MADE IN THE USA

1964-72 X-Factor Transmission Crossmember
These American Powertrain X-Factor transmission crossmembers are able to work with multiple OE and aftermarket transmissions, but offer exceptionally more strength than the originals. The X-Factor transmission crossmember is able to withstand up to 1,000 horsepower and is made of quality aluminum that is powder coated to feature a premium finish and added durability. Each American Powertrain X-Factor transmission crossmember comes with hardware and bolt plates needed for a complete installation.

Part#	Year	Desc.	Mfg #	UOM	Price

MINIMIZE MOVEMENT

Helps put the power down

ENERGY SUSPENSION

MADE IN THE USA

NEW! Polyurethane Transmission Mount

Soft running enough to absorb vibrations for street use yet rugged for racing use. Helps control torque on high performance vehicles. Maintains proper drive shaft angle to help prevent early wear and unexpected power train damage. Replaces the original, short lived and typically too-soft rubber mounts and outdates those hard-running metal transmission mounts. Resistant to under vehicle fluid oils, coolants and road contaminants. Made of Energy's Hyper-Flex performance polyurethane and heavy duty hardware for added durability. Available in black or red.

Flywheel bolts are an important bolt with regards to vehicle performance and safety. ARP manufactures the highest quality bolts on the market due to their attention in using outstanding materials and paying attention to the littlest details in manufacturing. The high-performance series of bolts are made from 8740 chromoly steel and heat-treated so that they have a tensile strength in the 180,000 psi range, which are much stronger than factory bolts. The ARP "Pro Series" are made from premium-grade steel and heat-treated in-house to a 200,000 psi tensile strength with precision-rolled J-threads after heat-treat. All the ARP bolts have flat, 12-point heads with a larger shank diameter for increased strength and flywheel register. Get the best. Get ARP!

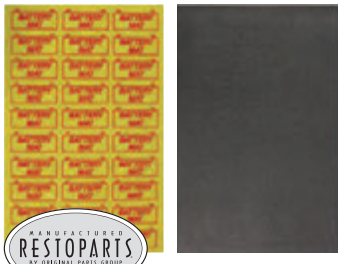
SIMPLE YET EFFECTIVE

It's the handy little mat that no battery should be without



MANUFACTURED RESTOPARTS BY ORIGINAL PARTS GROUP

1961-77 Battery Mat Tray Saver

This revolutionary item is placed under your vehicle's battery and slows the damaging effects of a typical slow acid leak that most batteries have. Helps save money in repairs and replacements by increasing the life of your new battery tray. Super-absorbent polypropylene needle punch felt—a space-age design! Two are recommended for the typical A-Body battery tray. Mat measures 8" x 12".

MADE IN THE USA

1964-77 Battery Relocation Mounts

Detroit Speed battery relocation kit is a great way to reduce underhood clutter and improve weight distribution. This CNC machined aluminum battery mount is designed around the optima battery (GROUP 34 /78 batteries). The entire battery mount is machined from 6061 billet aluminum. Three countersunk stainless steel bolts secure the top of the battery mount to the support rods. The base of the mount is mounted to your vehicle with no visible bolts from the top. It is a simple, strong way to hold your Optima battery anywhere. There are six drilled and tapped holes on the underside of the base. Although fewer attachment locations will securely mount your battery, provide six mounting holes to give you added flexibility. A mounting hole template is provided to assist you in locating the holes. These kits are available with or without 18' red/black 2 gauge battery cable, 2 bulkheads (1 positive, 1 negative), 1 pair top post battery terminals and 4 crimp/solder rings for 2 gauge battery cables. The mounts are shipped in a natural finish. The dimensions of the battery mount are 11 1/2" x 8 1/2" x 7 1/2" tall.

12V Automatic Float Charger

Prevent the normal discharging of a battery that is not used for weeks, months or years. By keeping the charge up, the tender extends the life of batteries rated for 5-125 amp-hours. The tender can do this by providing a constant, minimum current, regulated output, which is great for long-term use. The float charger works on all 12-volt batteries. Comes with a 1-year limited warranty.

PROTECT YOUR VEHICLE FROM THEFT

Disable the ignition by grounding out the coil

NEW!

Performance Distributors

MADE IN THE USA

Kill Switch

Protect your vehicle from theft with this simple, easy to install kill switch. The DUI Kill Switch is designed to disable the ignition by grounding out the coil which will prevent the engine from starting. The system is easy to install with the included hardware. Just mount the toggle switch in an inconspicuous area, connect one side of the switch to the negative side of the coil and the other side to a ground. This effective and low cost anti-theft device will ensure that your hot rod will remain where you park it without the fear of some knucklehead driving off with it. The kill switch works with all DUI and HEI style distributors. Comes with all items pictured and easy to follow instructions.

1964-77 Highway 22 Wiring Harness Kit

This complete Highway 22 wiring harness from American Autowire is perfect for any custom wiring job. The complete kit features a compact fuse panel, necessary wires and connectors and detailed step-by-step instructions for a straightforward installation.

- G-10 Composite Panel Base(7.5"L x 4.5"W x 3.125"H)
- Nylon 6/6 Panel Components
- GXL/XLPE GM Color-Coded Wire
- Battery and Accessory Power Expansion
- Self-Locking Screw Clamp Interface
- 22 Power Outputs in 16 Fuses; Up to 4 Breakers
- Gauge Cluster Disconnect
- 8-Gauge Alternator Feed Wire
- 175-Amp MegaFuse Protection
- 40-Amp Fan Relay
- Ignition, Headlight and Dimmer Switches
- Step-by-Step Instructions

1961-77 Highway 15 Nostalgia Wiring Harness Kit

Our Highway 15 Nostalgia wiring harnesses are an excellent choice for most vehicles. The harness uses the highest quality components to ensure your satisfaction. Classic Braid-in-lacquer wiring is reminiscent of the 1950s and early 1660s cloth covered wiring, but is manufactured using today's modern technology. Each kit comes complete with a fuse panel, color-coded wiring, switches and connectors for a very comprehensive harness that you can install yourself.

KITS INCLUDE THE FOLLOWING:

- G-10 Composite Panel Base(4.5"L x 4.5"W x 3.5"H)
- Nylon 6/6 Panel Components
- GXL/XLPE GM Color-Coded Wire
- Self-Locking Screw Clamp Interface
- 15 Power Outputs in 9 Fuses; 1 Circuit Breaker
- Gauge Cluster Disconnect
- 8-Gauge Alternator Feed Wire
- 175-Amp MegaFuse Protection
- Ignition, Headlight and Dimmer Switches
- Step-by-Step Instructions

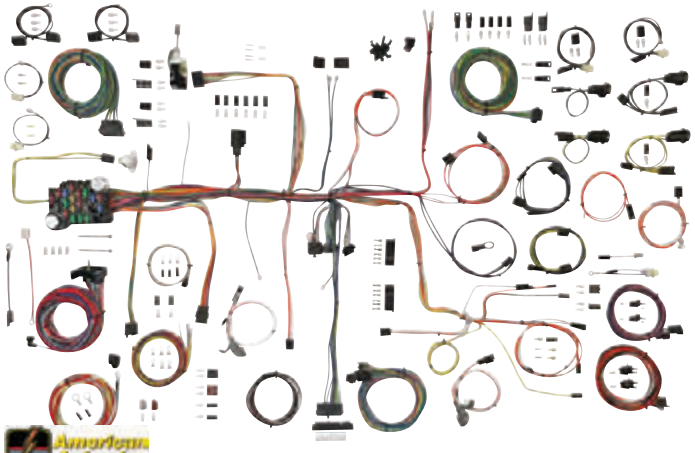
A PREMIUM ELECTRICAL UPGRADE

Utilizes modern ATO style fuses



1968-72 American Autowire Classic Update Kit

These model specific "Classic Update" wiring kits from American Autowire are designed to be the most complete and easiest to use kits on the market today. Each kit is packed with original style light sockets, switch body connectors, bulkheads, terminals, switches and more to make it the most complete kit on the market today.

- Replacement headlight switch with internal 25-amp circuit breaker, retaining nut, shaft and knob
- Standard turn signal and hazard flashers
- New horn relay mounted into the main dash harness
- New fuse box mounts in original location and utilizes modern ATO fuses for accessibility and reliability
- Original switch connector bodies throughout
- Steering column connectors allow use of stock or aftermarket columns
- Separate custom courtesy lamps to be used with original interior lights
- Exclusive "cluster harness disconnect" allows for quick service and assembly. Original terminals and connectors are provided for stock cluster connections, but wiring will also connect into a variety of popular aftermarket gauges
- Rear body harness plugs in at the stock location and includes longer leads for custom wire routing options
- Rear body wiring includes back-up light lead wires with correct sockets, stop and tail light lead wires with correct sockets, terminals to mate with the license plate connection wire, side marker lead with ground wires, with lamp sockets, fuel tank sender wire and grommet and tank connection
- New floor dimmer switch is provided for ease of installation
- GM bulkhead connectors for engine and front light wiring are included and allow easy installation with original or custom routing
- Engine wiring includes connectors for OEM points or HEI distributors. Power and tach connectors are supplied for HEI distributors. Alternator connections are supplied for GM "SI" series internally regulated alternators.
- Front lighting harness includes extra-long leads that can be routed for stock or optional custom appearances. Headlight, parking and directional light connectors and terminals are provided along with a switched trigger wire for an electric fan relay

WITH PAINLESS PERFORMANCE, YOU'RE SIMPLY INVESTING IN THE BEST!

FREE SHIPPING ON THIS ITEM

Wiring Harnesses

Painless Performance wiring is simply the highest quality wire you can buy! All Painless Performance harnesses use thermal cross-linked (TXL) high-temperature wire. TXL wire has twice the voltage rating of standard general purpose (GTP) wire and can withstand temperatures up to 275°. It delivers performance on demand in high-performance applications, plus, it will not kink making it much easier to route. Painless Performance also utilizes OEM-style fuse blocks that feature easy-to-find modern blade fuses, clearly labeled circuits and corrosion-resistant construction. With Painless Performance wiring, each wire is preprinted with the application so you know right where it goes. All kits come with more than enough wire and terminals to do the job. You cut and route to suit your needs.

1961-77 Muscle Car Harness

Bring your electrical system up-to-date with one of these new harnesses from Painless Performance Wiring. Aftermarket accessories can put heavy loads on factory wiring and possibly cause harm. These new harnesses use the highest quality thermal crossed-linked (TXL) polyethylene wire rated up to 275°—that's twice the load of standard wire!

Part# S220102 includes pre-terminated plugs for the ignition and turn signal switches.

Part#	Year	Desc.	Mfg #	UOM	Price

Remote Master Disconnect w/Emergency Pushbutton

Don't fumble around trying to shut off your racecar's electrical system in an emergency. This Painless Performance assembly allows you to install a large pushbutton within easy reach so you can shut off the electricity to help prevent a fire. The switch activates a 250-amp continuous-duty solenoid, which can be mounted anywhere the positive battery cable is located.

Part#	Desc.	UOM	Price
CH26645	.....	each	154.99

GREAT FOR ANTI-THEFT DEVICE

Remote Master Disconnect Switch w/ Latching Solenoid

This Painless Performance "Remote Master Disconnect Switch" comes with a mechanical latching solenoid that is great for everyday use and will also act as an anti-theft device—the latching solenoid will lock the switch and the battery current will be off.

This switch works great for cars that are not driven too much. When you operate the latching solenoid, you are not using current to turn the solenoid on or off, therefore it won't drain your battery. The solenoid is rated at 110-amps continuous duty and is activated by a momentary push-button switch, which can be hidden under the dash.

Pro Series Wiring Harness

The Painless Pro Series gives you everything you need to wire up your pro-touring or custom ride right the first time! Ample length is provided for each circuit, providing you the freedom to route and hide your wiring how you choose. Once you've got the harness fit how you like it, included are over 25 GM factory style connectors found on most '60s to early '90s GM switches, allowing you to turn the Pro Series harness into a direct fit harness for your application. LED ATC bladed fuses get you away from the old hard-to-find glass fuses, and will light up if blown making troubleshooting a painless task. The 6 gauge charge wire and midi fuse (no more problematic fusible link!) will keep up with today's high amperage alternators, and the provided front and rear ground harnesses making grounding your lighting circuits a breeze! Provided with many GM connectors and terminal, insulated and non-insulated butt splices, heat shrink, grommets, cable ties, ground straps, and cable tie clips, the Pro Series brings a new meaning to truly Painless wiring and includes our lifetime guarantee.

This harness features a grommet style firewall pass through with the fuse block mounted inside the vehicle on or near the firewall. The wires are pre-terminated using Packard factory crimping machines and utilize a grommet to pass through the firewall, keeping your wiring safe and protected from harsh metal edges. Each wire is extra length with up to 20' of length to the front and over 25' to the rear providing ample length for mounting your fuse block and freedom to route the wiring how you choose. After trimming to fit, utilize the provided terminals & connectors to terminate the ends.

This harness comes with adaptable open-ended ignition switch wiring and terminals, allowing you to adapt to any ignition switch you desire! GM old style (3-3/4") and new style (4-1/4") turn signal switch connectors are included.

Included with the GM Pro Series harnesses is:
(4) H4 Headlight connectors- to support single (high/low) or dual headlights (separate high beams)
(2) Turn signal connectors- fits connectors found on factory GM hard wired turn signals
(4) Molded ¼ sockets for front & rear marker lights
(2) HEI distributor connectors (+ and Tach)
(2) Connectors for factory GM wiper motor
GM washer pump connector
Courtesy light sockets
GM headlight switch connector
GM dimmer switch connector
Gm brake switch connector
GM turn signal switch flat connectors (early & late)
Neutral Safety Switch connector (column mounted or factory floor shifter mounted)
Reverse Switch connector (column mounted or factory floor shifter mounted)
Braided ground straps (for body and core support to frame grounding, also includes (6) self-tapping ¼" screws for mounting)
Alternator bag kit with terminals, splices, resistor, diode to connect the alternator. (1) Connector for GM 10si alternator
Assortment of insulated and non-insulated splices, ring terminals, heat shrink, grommets, cable ties, and cable tie clips.

Specialty Tape

Painless Performance has the tape you need to complete your wiring project for both the interior and the engine compartment.
Fleece Tape: This high-quality fleece tape is designed to provide secure bundling for a clean look and great protection on the harness. Best fit applied to harnesses in the passenger compartment, the harness remains flexible after applying the tape. Temp rating -40 F to 221 F.
High Heat: This High Heat/ Abrasion Resistant tape has been specially designed for bundling and wire protection against abrasion. The tape will withstand the heat and chemicals in the engine compartment of a car, all while providing a clean and tidy look. Temp rating -40 to 302 degrees F

A MUST-HAVE FOR ANY TH400 TRANSMISSION

Manufactured to factory specifications

TH400 Kickdown Switch Case Connector

Your TH400 transmission is equipped with an internal kickdown solenoid that is controlled by the electrical system of your vehicle. These connectors mount into the case of your transmission and come with the correct single or double prong connector allowing you to easily plug your factory harness into the transmission. Available in single or double prong, these connectors are a must-have for proper transmission operation.

L240058	w/cornering lights.....	each	29.99

NOTE: To ensure the correct turn signal switch is received, the original must be removed from the steering column and inspected as there were two possible switches used for 1964-66 non-tilt columns that cannot be interchanged. The BPC switch will have the lower portion of the switch's body made of metal, and there will be "BPC" stamped on the unit. A Guide switch will have the body made of plastic and "Guide" will be stamped on the unit.

Performance Distributors

MADE IN THE USA

NEW! LiveWires Spark Plug Wires

Performance Distributors LiveWires are a high quality, low resistance set of spark plug wires designed to deliver all of the spark energy from the coil to the plugs. LiveWires are built with a high temperature sleeve that protects the plug wire from the extreme under hood temperatures. The sleeving is made from a non-flammable heat treated glass braid, much like the type that is used on today's ovens. This unique sleeving provides heat protection up to +1400° F and offers excellent resistance to moisture and chemicals. Inside this high temperature sleeve is an 8mm spiral core wire with a durable and lasting silicone jacket. The spiral core consists of a stainless steel wire wrapped around a magnetic core. This offers an extremely low resistance value of 300 – 350 Ohms per foot for optimum spark travel. Spiral core wire is also radio suppression, so there is no electronic interference with the radio and they work great with delay boxes and stutter boxes. Unlike universal plug wires sets, LiveWires do not require any assembly. All sets are custom fit and numbered on both ends for the correct cylinder making installation, removal and re-installation quick and easy. No cutting, splicing or crimping is required! All sets include a tube of dielectric grease that is applied to the plug boots to prevent voltage leakage and boots and terminals from sticking to the plug.

1961-77 8.5 mm Super Conductor Spark Plug Wire Set

The 8.5 mm "Super Conductor Wire Sets" are designed specifically to fit race engines equipped with headers or an MSD distributor. They are custom-made to be routed behind the block, under the headers and to the spark plug, giving the engine an extra clean appearance as well as protecting the wires from making contact with the headers. Set includes terminals for engines with early and late-type distributor caps. Terminals are factory-installed on one end.

COLORS AVILABLE: Black or red.

MSD

Street Fire Spark Plug Wires

Street Fire spark plug wires have been designed with 500 OHM per foot resistance for improved spark delivery and power. Wires feature a helically wound conductor to suppress electro and radio noise and the Kevlar core adds strength and durability. Thick 8 mm silicone jacket resists heat and abrasion while heavy-duty terminals provide a secure connection. Spark plug wires are sold in complete sets and available in a variety of end configurations.

HIGH QUALITY, 7 MM KEVLAR SPIRAL CORE SPARK PLUG WIRES

LOCAR

MADE IN THE USA

NEW! LS Extra Long Spark Plug Wire Set

These high quality, 7 mm, Kevlar spiral core spark plug wires include high-temp silicone boots. The wires are 9' long with 40 ohms of resistance per foot, giving you all the length and performance you need to remote mount your coils, out of sight and out of mind. The LS Classic Spark Plug Wire Kit includes the plug wires with pre-installed 90 degree coil boots, straight unterminated spark plug boots (plug wire crimpers are needed to complete the installation), 90 degree distributor boots and terminals.

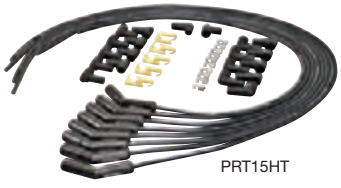
PREMIUM SPARK PLUG WIRES!

Heat resistant ceramic boots!



PERTRONIX PERFORMANCE PRODUCTS

Ceramic Boot Spark Plug Wires

These are the answer to your burnt wire blues. Each wire is constructed from two layers of ultra-high temperature silicone and rated up to 600° F. The ceramic spark plug boot acts as the primary protection to direct heat withstanding up to 2000° F.

•Two current paths for reliability and redundancy. -Primary path: Carbon impregnated fiberglass center core. -Secondary path: Spiral wound stainless steel alloy

•Low 500 ohm per foot resistance.

•8mm Silicone jacket to resist high temperatures, moisture, oil and chemicals.

•EPDM (Ethylene Propylene Diene Methylene) inner insulation for superior heat resistance and prevention of arcing and voltage leaks.

•Fiberglass reinforcing braid for added strength and flexibility.

•Available with 45°, 90° & 180° boots.

SPIRAL WOUND WITH STAINLESS STEEL

Two layers of 100% silicone on the outside

TAYLOR

MADE IN THE USA

Spiro Pro Spark Plug Wires

Taylor "Spiro Pro" 8mm spark plug wires are spiral wound with a stainless steel wire for more power through the wire and to the plug. Two layers of 100 percent pure silicone eliminates radio frequency interference, 350 Ohm per foot resistance, provides more fire power to the spark plugs. Spiro Pro wires use two layers of 100% silicone on the outside with a temperature rating of 600 degrees without additional sleeving—the highest on the market. The spark plug boots are low profile and have double spring lock spark plug terminals. LT1/LS/Vortec applications are pre-fit/"plug and play"; other V8 applications may require cut and fit.

COLORS AVAILABLE: Black, blue or red.

RACE FIT LENGTHS AVAILABLE: 14" or 16".

Street Thunder Spark Plug Wires

Taylor's 8mm Street Thunder wires feature a 500-Ohm per foot resistance Kevlar helically Spiro wound core conductor for greater strength and durability that suppresses Electro Magnetic (EMI) and Radio Frequency Interference (RFI). Wrapped in durable Synthetic silicone double layer jacketing that resists heat, oil and abrasion. Delivers greater spark energy while improving power, idle and fuel efficiency. Works in conjunction with most ignition systems, on board computers and electronic components. Matching black silicone boots protect against high exhaust temperatures. Double locking spring terminals for secure vibration proof connections. These wires are cut to fit.

Spark Plug & Coil Wire Repair Kits

Taylor cable makes it easy to replace or repair one spark plug or coil wire at a time. Available for the extra-large 10.4 mm diameter wire and the 8 mm wire, these repair kits are available in several colors. Spark plug wire kits have a 90° boot on one end and a 180° boot on the other and they are 54" long. The coil wire repair kit has a standard coil tower end with a HEI end and the wire is 36" long. These kits make repairing a single wire very easy and cost-effective.

Max-Fire Distributor

Max-Fire distributor for Oldsmobile 260-455 V-8 engines is ideal for replacing or upgrading from a points triggered distributor. They feature precision machining for a perfect fit along with a simple three wire hook up for an easy installation with no need to run an external ignition control box. The centerless ground shaft utilizes an upper sealed roller bearing with an extra long lower bronze Oil-Lite bushing for smooth operation. The high output magnetic pickup and large paddle wheel reluctor deliver a strong trigger signal at high RPM for maximum performance. We recommend a new Max-Fire coil for maximum voltage output, ensuring you get the most from your high performance engine at higher RPM's. Each distributor includes a cap, rotor, retainer and mechanical advance curve kit.

FEATURES AND BENEFITS: • CNC machined from 6061-T6 aluminum with O-ring grooves for use in a fully machined engine block • Cap and rotor are molded in high quality 30% glass filled polyester for durability and carbon tracking resistance • Features brass contacts and a stainless steel rotor spring for maximum conductivity • Hardened iron drive gear ensures long service life • Fully adjustable mechanical and vacuum advance

TOP OFF YOUR VINTAGE APPEARING LS SWAP WITH THIS DISTRIBUTOR AND PLUG WIRE SET

7 mm, Kevlar spiral core spark plug wires

LOKAR MADE IN THE USA

NEW! LS Distributor & Plug Wire Set

If you want to top off your vintage appearing LS swap then look no further than Lokar's distributor and plug wire set. Uses a set of high quality, 7 mm, Kevlar spiral core spark plug wires with high-temp silicone boots. The wires are 9' long with 40 ohms of resistance per foot, giving you all the length and performance you need to remote mount your coils, out of sight and out of mind. The plug wires first connect to the coils and then pass through the hollow cast aluminum distributor body that is bolted to the engine's valley plate, and then on to the spark plugs for an authentic nostalgic look. The LS Classic Distributor kit includes the plug wires with pre-installed 90 degree coil boots, straight unterminated spark plug boots (plug wire crimpers are needed to complete the installation), 90 degree distributor boots, distributor housing, cap, and terminals.

	Part#	Desc.	UOM	Price
4	CH34266	.....	set	658.99

NOTE: Check firewall clearance to ensure fit. Distributor is designed to bolt to the back two bolts of LS Classic Valley Plates (they will NOT clear valley plates with raised ribs or oil pressure sender boss).

HAND BUILT TO EXACT TOLERANCES

No add-on spark box needed

Performance DUI Distributors MADE IN THE USA

NEW! Street / Strip Distributors

Add some serious firepower to your engine! The DUI (Davis Unified Ignition) has everything you need for the ignition in one simple unit. No external coils or spark boxes are needed. Just one 12 volt hot wire hooked up to the DUI sends 50,000 volts of pure spark energy to the plugs for a cleaner, crisper, more powerful running engine! Part of the DUI's performance comes from the custom calibrated advance curve. A special weight and spring assembly is hand fitted and dialed-in using a Sun Distributor Machine for a precise timing curve that will match the specifications of your engine and vehicle. The super smooth advance provides instant throttle response and maximum power throughout the rpm range with no pre-detonation. Vacuum advance is provided for improved fuel economy and cleaner spark plugs. The DUI's high output spark comes from our 50,000 volt coil and Dyna-Module. The high voltage coil allows spark plug gaps to be opened up to a massive .055"! The dwell in our Dyna-Module has been increased electronically to allow the coil to produce a longer duration spark. The combination of the larger gap and longer duration spark provides the most complete combustion of the fuel mixture possible for increased horsepower and torque. Additional benefits include quicker starting, smoother idle and better fuel economy! All DUI caps have the brass terminals for optimum conductivity and superior resistance to corrosion.

Colors Available:

DON'T CHEAT YOUR ENGINE OUT OF ANY FIREPOWER AVAILABLE

Built with brass terminals for maximum conductivity

MADE IN THE USA

NEW! DUI / HEI Cap and Rotor

Don't cheat your engine out of any firepower available! The DUI cap and rotor is the finest quality made today. This kit offers up to 50% higher dielectric strength and can handle all of the voltage available from the coil. Built with Brass Terminals for maximum conductivity with an improved design in the rotor for eliminating burn-through. The material used in this kit has proven to be the ideal resin for caps and rotors for DUI and HEI distributors. Nylon rotor screws are included and eliminate a "ground" for the voltage to jump at high RPM's. Fits all V8 DUI Distributors.

V8 Colors Available: Black, blue, clear, red & yellow
6 Cyl Colors Available: Black, blue and red

NEW! Rev Limiter

Protect your engine from over revving with the DUI Rev Limiter! This soft touch Rev Limiter uses sophisticated computer circuitry to drop spark one cylinder at a time, until your engine is at or below its maximum rpm. Those cylinders are then fired on the next cycle, to prevent them from loading up with fuel. The result is smooth rev limiting action that prevents backfires and possible engine damage. RPM limits are set with plug-in modules. A 6000, 7000 and 8000 RPM module is included with the rev limiter but other RPM limiting modules are available in separate kits. Works with all HEI and DUI Distributors.

FLAME-THROWER I, II AND III

Great for 6 or 8-cylinder engines

1961-77 High-Performance Coils

The "Flame-Thrower I" high-performance coil delivers 15% more spark, which allows for larger spark plug gap for added power, smoother response and better fuel economy. Delivers a full 40,000 volts.

The "Flame-Thrower II" coils maximize energy and reliability over the full rpm range, enable larger plug gaps for greater fuel economy and increased power levels and they're 50-state legal. These coils are rated at 45,000 volts and are intended for use with the "Ignitor II" ignition system.

The "Flame-Thrower III", 45,000 volts, 50 state legal, oil filled, 0.32 ohms primary resistance, compatible with most C.D. ignition systems.

PERFORMANCE UPGRADE

Blaster Ignition Coils

MSD "Blaster Coils" are an upgrade to your stock coil or if you want to complement the performance of your MSD ignition. These coils do not include a ballast resistor. When using an MSD "Ignition Control," the ignition is responsible for delivering the voltage to the coil so a ballast resistor is not necessary. The "Blaster 3" coil features an extra-tall tower to improve the coil wire attachment and spark isolation. Includes 90° terminal and boot. 0.7 OHM's.

Edelbrock

Ignition Coil

Electronic oil filled ignition canister style coil with red or chrome finish for hi-performance vehicles that have been converted to an electronic breaker less distributor, where a traditional oil filled can-style coil is preferred for the correct classic appearance. Designed with optimized winding for use with ready-to-run distributors and 6 Series CD ignition control boxes. Engineered for high output resulting in quicker starts, improved throttle response and more power at higher RPM

Universal High Output Dome Style Ignition Coil with Red Finish, designed to work specifically with the high output inductive storage ignition module in the ready to run distributors. It features heavy gauge windings that are engineered to ensure maximum power at higher RPM levels. A molded housing of glass reinforced polyester and high temperature epoxy encapsulation resists shock and vibration while providing excellent thermal conductivity. The brass contacts ensure maximum conductivity, while the male tower offers superior boot/terminal retention and protecting from arch over. This is compatible for use with 6 Series CD ignition systems.

ADD SOME SERIOUS FIREPOWER TO YOUR IGNITION SYSTEM

Outperforms all stock and other aftermarket coils

CH33799

CH33798

Performance DUI Distributors

MADE IN THE USA

NEW! Inferno Coil

Add some serious firepower to your ignition system with the Inferno coil! The Inferno and Inferno 2 Coils were designed to outperform all stock and other aftermarket coils. Both Inferno Coils are universal and will work with most any ignition system except for HEI and our DUI Distributors. The coils have been tested to withstand engine heat and extremely high temperatures. If you currently have a tachometer or later install one, all the necessary hardware to complete the installation is included. The higher voltage output of the Inferno coils will allow spark plug gaps to be opened up .010" larger than the factory plug gap. In some applications the gap can be opened up as much as .055". The Inferno coil will mount in a factory coil bracket and the Inferno 2 coil can be easily mounted anywhere in the engine compartment.

INCREASES PERFORMANCE AND EFFICIENCY

Extend plug gaps to .065"

Performance DUI Distributors

MADE IN THE USA

NEW! Sultans of Spark Coil

Boost ignition performance with our SOS (Sultans Of Spark) Coils for 1997-2019 General Motors LS/VORTEC engines. These hotter coils are packed with more voltage over the stock coils to help produce increased power, better throttle response, quicker starting and smoother idle! The LS SOS Coils have 7000 more volts per coil over stock and this additional spark energy will fire plug gaps up to .065". Extended plug gaps expose a larger spark kernel in the combustion chamber for an increased burn of the fuel mixture, thus giving your LS extra performance and better fuel efficiency. Our design team has used the latest technology to enhance the coil windings for higher output, yet maintained the original size so the coils will mount in the OEM bracket and retain the factory wiring. LS SOS Coils are fully compatible with flash devices and programmers. Superior thermal epoxy leads to improved heat transfer and vibration resistance. Brass terminals are utilized for improved conduction and resistance to corrosion. LS SOS Coils have a one year warranty from date of purchase.

10-15 PERCENT GAIN IN SPARK ENERGY OVER STOCK IGNITION COILS

High-temperature epoxy resists shock and vibration

CH34184

CH34183

TAYLOR

NEW! Thundervolt Coil On Plug

Taylor Thundervolt coil-on plug ignition coils are designed for street/strip applications and give a 10-15 percent gain in spark energy over stock ignition coils. They feature a specialized high-temperature epoxy that resists shock and vibration, while increasing thermal conductivity. They also feature a stainless steel spring with ferrite lugs, to help suppress RFI/EMI, and high-temperature 550 degree silicone boots. The ignition coils are manufactured to OEM specifications, ensuring that they fit in the stock location without any modifications.

MADE IN THE USA

NEW! Mini-VIP Voltage Step-Up Regulator

The new 18 volt Mini-VIP (Voltage Intensive Power) steps up your charging systems 14 volts to 18 volts, which is sent specifically to your ignition system in order to provide your engine with the ultimate spark for improved combustion. The 18 volt Mini-VIP is truly a revolutionary product that leads to "Chargition". "Chargition" is what Performance Distributors defines as the science that bridges the gap between your charging system and your ignition system. It emphasizes how a maximum performing charging system leads to a maximum performing ignition system. The 18 volts produced by the Mini-VIP enables you to open up your spark plug gaps to a whopping .070". The larger gap and hotter spark will burn the fuel more completely on each piston stroke. Voltage drop, which occurs when you have your accessories running, is eliminated as the Mini-VIP isolates the 18 volts to your ignition system only! In the long run, your plugs will stay cleaner. Some applications will also be able to run a richer fuel mixture due to the additional spark intensity. The unit is a simple three wire installation. The Mini-VIP is true to its name as it is small enough to mount anywhere and only weighs one pound.

6AL-2 Ignition Control

Featuring a new housing, digital controls and more power in a sleek package. Advanced micro-controller that manages the timing and rpm of the ignition as well as maintaining a spark output of 535-volts. In order to ensure complete combustion, the multiple sparks burn inside the cylinder for 20° of crankshaft rotation. Two other benefits are the rev-limiting controls: one for high-end over rev and the other can be set to activate off a clutch or trans-brake to set a launch limit. Rev limiters are controlled via rotary dials providing easy adjustments at any time. Ignition boxes are sold per each and include wiring, vibration mounts and complete instructions.

MORE POWERFUL SPARK

FREE SHIPPING ON THIS ITEM

Second Strike Ignition Box

Pertronix has combined the two with its "Second Strike" ignition supplement that uses your stock ignition as the primary spark producer and follows it with a second spark—anywhere from 2-18 crank degrees later—from its Second Strike CD box. This assures you of complete burning of the air/fuel mixture in the combustion chamber. It means you can get more power, better combustion efficiency and reduced plug fouling. The Second Strike also has a built-in rev limiter that randomly cuts out a spark from different cylinders to reduce plug fouling when you over-rev your engine. This ignition supplement works with most OEM and aftermarket non-CD ignitions and is compatible with most modern tachs without an interface.

MADE IN THE USA

1961-77 RPM Activated Switches

RPM Activated Switches are ideal for nitrous applications. They allow you to activate your nitrous system at a predetermined RPM and will stay active until RPM falls below the set RPM. IN03012 programs easily with the device's onboard dipswitches. IN03209 uses push-buttons and a digital display for programming. IN03210, also programmed using push-buttons and digital display, functions as a two-stage "window" switch, allowing you to turn on an accessory at the desired RPM, then turn it off at a second higher RPM. Selectable normally-open or normally-closed functionality allows you to turn on or off the accessory of your choice at the desired RPM. 2,000 to 9,000 RPM range. Digital versions also function as a Tachometer with high RPM recall. Switches feature over current protection, short circuit protection, and over voltage protection.

1961-77 Ignition Wire Sleevings

These high temperature sleeves can be used for ignition lead wires, spark plug wires, and even fuel lines to prevent vapor lock. Highly flexible and abrasion resistant, they offer maximum protection against spark loss. The inside is braided continuous e-glass insulation good up to 1000°F. The silicone outer surface is good for temperatures up to 500°F.

Cool-It Plug Wire Sleeves

COLORS AVAILABLE: Silver, Red, Black, Blue

These dual-purpose sleeves enhance performance, reduce misfires, extend plug wire life and will not react with petroleum products. The double-wall construction keeps the wire and boot cooler in a high-temperature engine. Its universal size fits most boots, is easy to install and - most importantly - is non-flammable. Cool-It Plug Wire Sleeves can be used in any high-temperature environment and comes in four color choices: black, blue, red and silver/natural.

PERFORMANCE

Connect & Cruise Powertrain System

Each Connect & Cruise kit delivers a brand-new, fully assembled crate engine, an electronically controlled overdrive transmission, electronic control modules for both, and the engine control hardware to get it all running in your project vehicle – including the mass airflow sensor, oxygen sensors and even the special throttle pedal for the engine's electronic throttle bodies. Chevrolet Performance engineers matched the engines with their respective transmission, ensuring it was up to the task of channeling big power with absolute dependability. The engine controller is specially calibrated to run the engine without some of the production-vehicle features that aren't required in an older vehicle. That means no "trouble" codes and no need for third-party tuning. Better still, the system's unique SuperMatic transmission controller is designed to work with the engine controller for a seamless, "plug and play" installation that is quick, easy and intuitive. Detailed instructions outline all the necessary steps. Chevrolet Performance has you covered with a 24-month/50,000-mile limited warranty.

PERFORMANCE

LS Engine Controller Kit

The engine control module is the brain of your Gen III/IV LS-series engine. Uniquely calibrated for installation in older vehicles and means that many features for late-model vehicles are turned off because they simply are not needed. This is a true standalone system that only requires the use of power and ground sources as well as a high pressure fuel pump and an electric cooling fan. This kit include all of the components required as well as detailed instructions.

KIT INCLUDES: Two oxygen sensors, Two oxygen sensor mounting bosses (for installation in the exhaust system), Mass airflow meter, Mass airflow meter mounting boss (for installation in the air intake system), Throttle pedal assembly (for use with the electronically operated throttle), Specific oil pressure sensor that is compatible with the harness (when needed), Complete wiring harness with fuse box and necessary cam sensor and MAP sensor jumpers, Fuel pump power module, Fuel pressure sensor, Programmed controller and Instruction sheet

PERFORMANCE

1961-72 E-Rod LS3 6.2L Crate Engine

Rated at a stout 430 horsepower and 425-ft/lbs. of torque, the E-Rod LS3 crate engine delivers excellent power & torque for your street machine. The E-Rod LS3 is designed for high-performance with longevity, reliability & emission compliance in mind. Once found the in the Corvette & Camaro, this engine will drop in and bring your car into the 21st century while being 50-state legal for any emission controlled cars.

TECHNICAL INFORMATION:
Horsepower: 430 @ 5900 rpm
Torque: 425-ft/lbs. @ 4600 rpm
Maximum rpm: 6600 rpm
Compression ratio: 10.7:1
Block: 12623967 cast-aluminum six-bolt with cross-bolted main caps
Crankshaft: 12597569 nodular iron
Connecting Rods: 12607475 powdered metal steel
Pistons: 19207287 hypereutectic aluminum
Camshaft: 12603844 hydraulic roller, .551"/.522" lift, 204/211 degrees duration @ 0.050
Cylinder heads: 12629063 aluminum L92-style port 68cc chambers
Intake valves: 2.165"
Exhaust valves: 1.590"
Recommended fuel: 92 octane
Engine control module
Exhaust manifolds
Catalytic converters
Mass airflow sensor and sensor boss
Oxygen sensors and sensor bosses
Air filter
Accelerator pedal
Evaporative emissions canister
Instruction manual

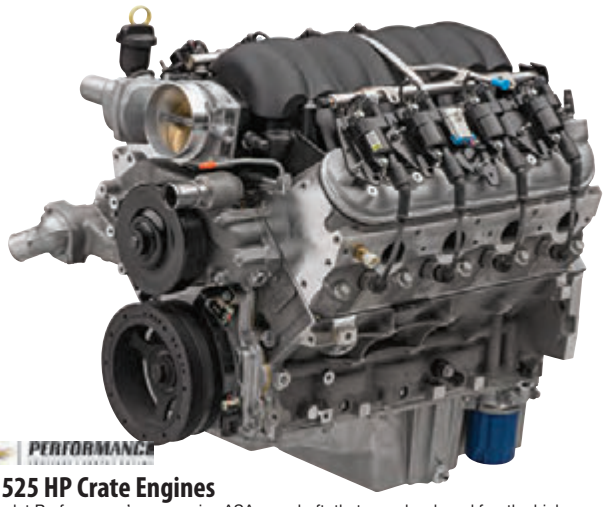
1	CH31329	w/ 17-tooth reluctor wheel transmission	19257234	each	9,599.99

NOTE: If using late model GM transmissions, please check your applications reluctor wheel size for vehicle speed sensor output.



PERFORMANCE

LS3 525 HP Crate Engines

Chevrolet Performance's aggressive ASA camshaft that was developed for the high-rpm world of circle-track racing in now available in the LS3 6.2L engine with 525 uncompromising horsepower. This makes it the most powerful naturally aspirated 6.2L street engine in the Chevrolet Performance portfolio. The ASA camshaft is a hydraulic roller with .525-inch lift on both sides, along with 226 degrees duration on the intake side and 236 degrees on the exhaust side. Coupled with a tight, 110-degree lobe separation angle, it helps the engine deliver excellent throttle response and breathe exceptionally well at high rpm, and for durability we complement the cam with higher-rate valve springs. This crate engine package features an aluminum block, cylinder heads, composite intake manifold and F-Body oil pan. Also included is the throttle body, water pump, balancer, 58 tooth reluctor wheel and ignition coils, wires and spark plugs.Engine controller kit required P/N CH33208 is sold separately (includes throttle pedal to match its electronically controlled throttle body).

GM Part Number: 19419866 - REPLACING 19370413 19301360 19369338, Compression ratio: 10.7:1
Engine Type: LS-Series Gen IV Small-Block V-8
Horsepower: 525 hp @ 6,300 rpm
Torque: 489 lb.-ft. @ 4,400 rpm
Maximum recommended rpm: 6600 rpm
Displacement (cu in): 376 cu in (6.2L)
Bore x Stroke (in): 4.065 x 3.622 (103.25 x 92mm)
Block (P/N 12623967): Cast aluminum with 6-bolt, cross-bolted main caps, Rocker Arm Ratio: 1.7:1
Oil Pan (P/N 19212593): Cast-aluminum
Crankshaft (P/N 12597569): Nodular iron
Connecting Rods (P/N 12607475): Powdered metal
Pistons (P/N 19207287): Hypereutectic aluminum
Camshaft Type (P/N 88958770): Hydraulic roller
Valve Lift (in): 0.525 intake / 0.525 exhaust
Camshaft Duration @0.050 in 226°intake/236° exhaust
Cylinder Heads (P/N 12629063): Aluminum L92-style port; as cast with 68cc chambers
Valve Size (in): 2.165 intake / 1.590 exhaust
Rocker Arms 12669995 Investment cast, roll trunnion
Rocker Arms 12669993 Investment cast, roll trunnion
Recommended Fuel: Premium pump
Reluctor Wheel: 58x, Balanced: Internal

PERFORMANCE

6.2L LS376/480HP Crate Engine

Chevrolet Performance Hot Cammed 6.2L LS3 takes affordable performance to a new level. GM Performance engineers took a production LS3 6.2L (376 cubic inches) and swapped the stock camshaft for the racing-inspired LS Hot Cam (P/N 88958753), which delivered a stunning 495 horsepower and 473 lb.-ft. of torque. That's nearly 14 percent more power and torque from a simple camshaft change. The key to the power boost is the Hot Cam's 0.525-inch lift on both the intake and exhaust sides, along with 219-degree/228-degree duration specs. That's less lift on the intake side than the stock LS3 cam, but considerably more duration, allowing the valves to stay open longer to draw in more air from the rectangular-port L92-style heads. This crate engine package includes the intake manifold, F-Body oil pan, throttle body and fuel rail, along with the ignition system. Use it with the LS376/480 controller kit P/N CH33203, which includes a special pedal for use with the engine's electronically controlled throttle. Chevrolet Performance Crate Engines include a 24-month or 50,000-mile/80,000-kilometer limited warranty

Please refer to OPGI.COM for the most current pricing.

Lokar's Classic Crate Engines start with a brand new GM 495 horse power LS3 right out of the box. It is then painted Chevrolet orange. Lokar then begins the assembly process using your desired components until they have the perfect crate engine for your project. Once completely assembled Lokar puts the engine on their in-house run stand, load your Holley EFI ECU with a start-up tune, and run your engine to check for leaks and oil pressure. After they are satisfied that your engine will operate with no issues, they put it back in the original GM crate and ship it. Once you receive your engine it is as simple as installing it, terminating a couple of power and ground wires on the harness and putting fuel pressure to the engine.

TRI-POWER STYLE LS REPLICATES ONE OF GM'S MOST ICONIC ENGINES

BB style valve covers in your choice of finish

NEW!

LS Tri-Power Style Crate Engine

LS Classic Series Tri-Power Style crate engines are designed to give your LS the look of one of GM's most iconic big blocks, while using modern technology for ultimate performance. These crate engines start with a brand new, GM 495 horsepower "Hot Cam" LS3 right out of the box, with your choice of the engine being painted orange or left unpainted. The LS Classic Series Tri-Power Style engines are assembled with a specially modified single plane, dual carb aluminum intake manifold topped with a Tri-Power style air cleaner assembly. Includes your choice of cast, chrome or orange painted block style valve covers. These crate engines come with coils, coil harness, valley plate, Intake system w/ throttle body, valve covers, Corvette style balancer, exhaust manifolds, spark plugs, 4L60E/4L80E flexplate and Holley ECU with engine harness. Once completely assembled, Lokar puts the engine on an in-house run stand, loads the Holley EFI ECU with a start-up tune and runs the engine to check for leaks and correct oil pressure. After they are satisfied that your engine will operate with no issues, it is put back in the original GM crate and shipped directly to you or your builder.

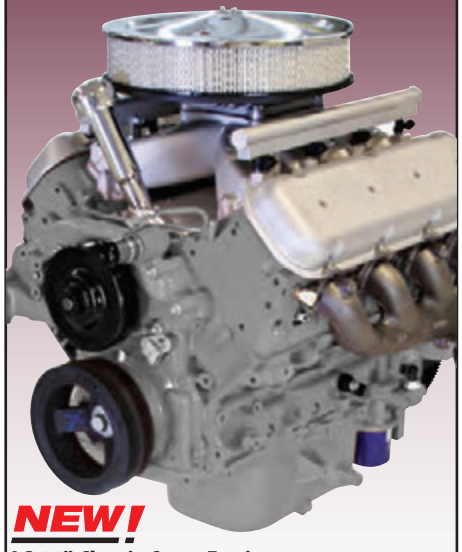
VINTAGE LOOKS WITH MODERN LS PERFORMANCE

Your choice of 409 "W", SB or BB valve covers



NEW!

LS 14" Classic Crate Engine

LS 14" Classic Series crate engines have the right combination of classic looks and modern performance to complement your classic vehicle. These crate engines start with a brand new, GM 495 horsepower "Hot Cam" LS3 right out of the box, with your choice of the engine being painted orange or left unpainted. The LS 14" Classic Series engines are assembled with a retro inspired intake kit that includes a single plane aluminum intake manifold, billet aluminum fuel rails and a 14" chrome round air cleaner. Comes with your choice of small block, big block or 409 Chevy style valve covers. These crate engines come with coils, coil harness, valley plate, Intake system w/ throttle body, valve covers, Corvette style balancer, exhaust manifolds, spark plugs, 4L60E/4L80E flexplate and Holley ECU with engine harness. Once completely assembled, Lokar puts the engine on an in-house run stand, loads the Holley EFI ECU with a start-up tune and runs the engine to check for leaks and correct oil pressure. After they are satisfied that your engine will operate with no issues, it is put back in the original GM crate and shipped directly to you or your builder.

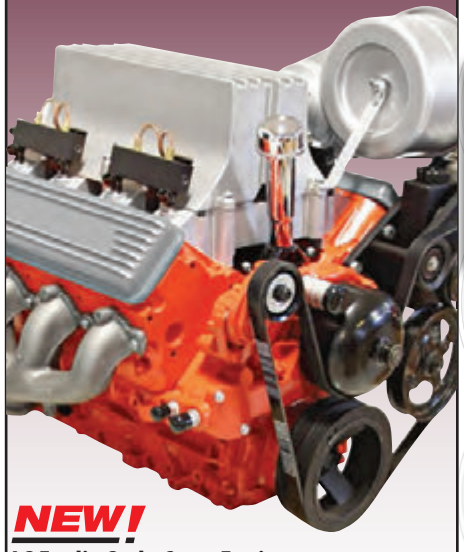
THE RIGHT STYLE TO MATCH YOUR SIXTIES MUSCLE CAR

Classic looks with modern reliability



NEW!

LS Fuelie Style Crate Engine

LS Classic Series Fuelie Style crate engines are designed to give your LS the look of GM's iconic original mechanical fuel injection system while using modern technology for ultimate performance. These crate engines start with a brand new, GM 495 horsepower "Hot Cam" LS3 right out of the box, with your choice of the engine being painted orange or left unpainted. The LS Classic Fuelie Series engines are assembled with a cast aluminum, two-piece manifold in a 1957, 1962 or 1963 configuration. Also features finned, cast aluminum small small block style valve covers. These crate engines come with coils, coil harness, valley plate, Intake system w/ throttle body, valve covers, Corvette style balancer, exhaust manifolds, spark plugs, 4L60E/4L80E flexplate and Holley ECU with engine harness. Once completely assembled, Lokar puts the engine on an in-house run stand, loads the Holley EFI ECU with a start-up tune and runs the engine to check for leaks and correct oil pressure. After they are satisfied that your engine will operate with no issues, it is put back in the original GM crate and shipped directly to you or your builder.

1961-77 Power Package Top-End Kit

Experimenting with different top-end engine components can be a daunting task. It can be very challenging getting the right combination of parts together often costing you precious time and money. The performance specialists at Edelbrock have now put together these money-saving and timesaving kits and have done an excellent job at it! This combination designed for 400-500 cubic inch Oldsmobile big-block engines gives you everything you need to make a respectable 450 horsepower. All is included in one simple kit: cylinder heads, camshaft, lifters, bolts, gaskets, and intake manifold. Simply add your choice of carburetor and rocker arms and you are ready to hit the streets!

NOTE1: Aftermarket 7/16" stud rocker arms and 3/8" hardened pushrods required.

Performer RPM Oldsmobile Aluminum Heads

Designed for high-performance emission-controlled 1965-72 Olds 400, 425 and 455 CID engines. Features include improved 77cc combustion chamber design that increases the quench area for a more efficient burn increased horsepower and torque. Complete heads are assembled with stainless steel 2.072" intake valves and 1.680" exhaust valves, hardened ductile iron valve seats and phosphor bronze guides. The valvetrain is upgraded from the factory pedestal-mount system to a 7/16" screw-in stud and 3/8" pushrod-slot guideplate for increased valvetrain stability. High-velocity ports feature 188cc intake runners and 106cc raised-floor exhaust runners for increased flow and power. Aftermarket rocker arms and hardened pushrods are required for installation. Heads will fit 350-403 Olds with Edelbrock manifold part# C207111 only.

C240094

1964-77 350-455 Head Bolts

The high-performance series of cylinder head bolts from ARP are made from 180,000 psi steel, which makes them 15% stronger than Grade 8 bolts. They also feature a special wide area flange underneath the bolt heads so you don't have to re-torque the heads and they provide maximum clamping power. The complete head bolt kits come with hardened parallel ground steel washers for steel and aluminum heads.

Durable design

High Energy Roller Rocker Arms

These High Energy Die Cast Aluminum Roller Rocker Arms for Oldsmobile V8 350-455 applications are perfect for street and moderate race use. They use a 7/16" stud diameter and 1.6 ratio and are constructed of die cast aluminum for superior strength with light overall weight. They are an affordable option with aluminum body, needle bearing fulcrum and roller tip. The durable design increases valve lift while withstanding the rigors of moderate race use. These rocker arms are also designed to be used with applications up to 550 lbs. of open spring pressure.

1961-77 Assembly Lube

It is very important to note that the friction coefficients of assembly lubricants vary dramatically making it difficult to consistently produce the exact amount of stress within the fastener to clamp the components together. That's why ARP has introduced this superior and consistent assembly lube. Features: Premium-grade, graphite-base with rust and corrosion inhibitors. Effective lubrication range from -30° to 750° Fahrenheit. Load range is 500,000 psi. Primary assembly lube for engine components, press fitting, gear trains and general machinery.

MADE IN THE USA

NEW! LS Fuelie Style Intake Systems

LS Classic Series Fuelie Intake Systems are designed to give your LS engine the look of GM's iconic powerplants of the 50's and 60's while using modern technology for ultimate performance. Lokar's Fuelie Style Intake Systems are based on a cast aluminum, two-piece manifold, like the originals. They are also made in the USA, and kits include billet aluminum fuel rails, all mounting hardware, and gaskets. These systems utilize GM LS3 OEM fuel injectors and GM four bolt, 92mm, drive-by-wire throttle body (not included) and are compatible with GM and aftermarket ECU's and harnesses that support both drive-by-wire and speed density tuning. Manifold kits are available to work with your choice of rectangular or cathedral port LS cylinder heads.

THE PERFECT LOOK FOR A RESTO-MOD MUSCLE CAR

Uses modern technology for ultimate performance

NEW! LS 14" Classic Intake Kit

The LS Classic Series 14" Classic Intake Kit is designed to pay respect to the classic muscle cars and trucks of the 60's and 70's while using modern technology for ultimate performance. The intake kits include a single plane aluminum intake manifold, billet aluminum fuel rails, 14" chrome round air cleaner, 4150 carb adapter plate, all mounting hardware, and gaskets. The systems utilize GM LS3 OEM fuel injectors and GM four bolt, 92mm, drive-by-wire throttle body (not included) and are compatible with GM and aftermarket ECU's and harnesses that support both drive-by-wire and speed density tuning. Manifolds are available to work with rectangular and cathedral port LS cylinder heads.

ULTIMATE RETRO MULTI-CARB LOOK FOR YOUR LS

Modern fuel injection performance

NEW! LS Tri-Power Style Intake Kit

Designed to pay tribute to the baddest big block Corvettes of the late 60's while using modern technology for ultimate performance. The intake kits are built around a modified single plane, dual carb aluminum intake manifold that utilizes dual 92mm, GM LS3, four bolt, throttle bodies and fuel injectors (not included) and accepts Lokar's Tri-Power style, chrome, triangular air cleaner. The kit also includes 4150 carb adapter plates, throttle body to air cleaner clamp assemblies, mounting fasteners, and cotton gauze air cleaner. The Tri-Power kit requires the use of Holley Dominator (or equivalent) ECU and harness that supports the dual drive-by-wire throttle bodies. Manifolds are available to work with rectangular and cathedral port LS cylinder heads.

NOTCHEAD

Custom Hardware Tools & Accessories
Doing the job right requires special tools, and these pieces from Notchead are a must-have! The custom Polishing Grip is perfect for polishing bolts and assorted small parts. The soft aluminum jaws grip the threads of your bolt firmly, but will not cause damage. This allows you to polish quickly and efficiently. The special pin-drive sockets are necessary when installing or removing your Notchead bolts. These replacements can be used with your choice of combination wrench or socket wrench.
Polishing Grip - features two collets (1/4"-3/8" and #4 screw-1/4")
Large Collet - Adjust from 1/2" to 7/16"
Nut Polishing Attachment - Includes 4 sizes of coarse and fine thread adjustments (#10, 1/4", 5/16", 3/8")
Sockets are available in several sizes depending on your bolt size.

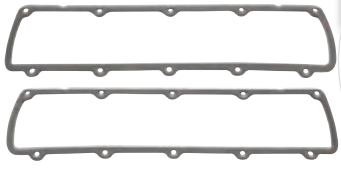
A NAME YOU TRUST
Top-quality materials



Edelbrock

1964-72 High-Performance Valve Cover Gasket
Edelbrock has painstakingly designed their gaskets to provide a perfect seal with their heads and intakes as well as most factory stock parts. All gaskets are manufactured from top-quality materials and available for a variety of applications. Valve cover gaskets are manufactured from a core reinforced composite for proper sealing integrity and an easy installation. The reinforced design provides a high radial strength to resist high vacuum or blow out conditions.

Milodon

1964-72 LS Series Oil Pan

Manufactured from heavy-duty steel, this oil pan utilizes double thick rails for added strength and superior sealing properties. The large-capacity pan provides increased oil control for maximum horsepower gains and more constant oil pressure under heavy usage.

Part#	Year	Desc.	UOM	Price
MIL1507	61-77	Pro-Touring, low profile, 6-qt.....	each	474.99

1964-77 High-Capacity Low Profile Oil Pan

The Milodon low profile pan offers increased oil capacity with maximum ground clearance. This durable pan features oil control baffles along with a 7-quart capacity (plus filter), 8" deep sump for higher rpm use. Will require the use of special pick-up, part# CT20074.

Part#	Year	Desc.	Mfg #	UOM	Price
CT20073	64-77	.....	30305	each	314.99

NOTE: Will fit 330, 350, 400 and 455 engines.

1964-77 Stock Replacement Oil Pan

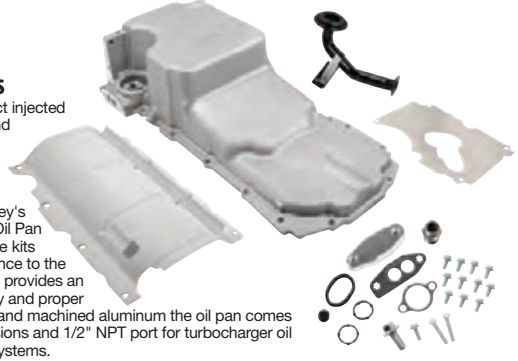
This stock replacement oil pan features an excellent fit and flat unmarred pan rails unlike import chrome pans. These pans have internal horizontal baffles for proper oil control and Milodon's distinctive solid irridited finish. Use of an oil pan pick-up is recommended, part# CT20076.

Part#	Year	Desc.	Mfg #	UOM	Price
CT20075	64-77	.....	30765	each	184.99

NOTE: Fits 330, 350, 400 and 455 engines.

Holley

GM Gen V LT Retro-Fit Oil Pans



GM's new Gen V LT direct injected engines are starting to find their way into a large variety of vehicles. They make excellent power, plus they are durable and reliable. Holley's new LT Retro-fit Engine Oil Pan is designed to help! These kits provide maximum clearance to the chassis and ground, plus provides an OEM fitment for durability and proper sealing. Made from cast and machined aluminum the oil pan comes with oil cooler port provisions and 1/2" NPT port for turbocharger oil return or PCV oil return systems.

Kit includes: Windage Tray, Sump Baffle, OE Style Pick-Up Tube, Sump Port Plug, Oil Filter Stud, Billet Oil Passage Cover, all necessary hardware.

LS Oil Pan Bolts

ARP oil pan bolts are available in black oxide-coated chrome-moly steel or ARP's own "Stainless 300" material. The bolts are rated up to 170,000 psi and the stainless versions are impervious to corrosion or extreme heat. The heads of the bolts are either 12-points or a hex head, so they can be tightened easily in small increments. Centerless ground flat washers are included to distribute the tightening load over a wider area.

PREVENTS OIL SPLASHBACK, INCREASES POWER

Milodon

1964-77 Solid Louvered Windage Trays

Milodon has manufactured a windage tray that is solid with the correct contours and has louvers that help increase oil drainback directly into the oil pan sump. Another power producing benefit is it prevents oil from splashing back-up into the rotating assembly, thereby reducing power-robbing windage. An adjustable main stud kit is required for installation (part# C240060), due to the different rotating assembly crank and rod combinations.

Part#	Desc.	UOM	Price

FREE SHIPPING ON THIS ITEM

1970-72 Authentic Reproduction OAI Air Cleaner Assembly

This super high-quality W-25 OAI air cleaner top assembly has the proper vacuum valve, air filter top, vacuum lines, flapper door, springs and valve cover spring retainers. They even come with an air filter and the assembly will work on 350 and 455 OAI-equipped engines having a four-barrel Q-jet carburetor. When converting to OAI all you have to do to seal the assembly to the hood is use your original four-barrel air cleaner base and install the valve cover spring retainers and hold-down springs. There is a difference between the 350 and 455 OAI assemblies with the 350 versions having a 3/8" taller foam hood seal. Get the factory-correct look along with horsepower and torque using this outstanding reproduction W-25 OAI air cleaner top assembly.

AGGRESSIVE STYLING

Pre-oiled cotton gauze element

CH35386

NEW! Pro-Flo Cotton Air Cleaners

This new line of air cleaner was created to perfectly match Edelbrocks popular classic aluminum finned valve covers. The included medical grade, pre-oiled cotton gauze elements are sure to increase airflow & breathability to your engine resulting in added horsepower. Available in several styles to suit your taste, these air cleaners fit any 5-1/8" carb & some for dual-quad applications where listed. Round cleaners are available with a deep flange which have knock-outs in the air cleaner base for use with Edelbrock crank case ventilation adapter. Heights of the air cleaners are measured from the gasket flange to the top of the supplied retaining nut. The filter elements are washable & re-oilable eliminating the need for purchasing replacement elements.

ALL-NEW STAMPED STEEL REPRODUCTION

Adds a period-correct look

1961-77 Nostalgia Air Cleaner Assembly

This all-new air cleaner assembly is perfect for adding a nostalgic appearance to your engine compartment. The stamped steel housing is reminiscent of the early Cadillac and Oldsmobile air cleaners from the 1950's, and features a durable EDP-coating for corrosion resistance. Each housing spans 18-1/4" wide and 4-3/4" high from carb base to wing nut, and is ready to top any modern 4-barrel carburetor with a 5-1/8" throat. The complete assembly features the housing, element, stud, AC decal, and chrome-plated "rocket" wing nut to keep everything in place.

Starter Solenoid Heat Shields

Our solenoid heat shield increases the life of your starter and is ideal for any car. The heavy-gauge stainless steel construction is designed to deflect heat and prevent hot-start problems associated with the use of headers and other aftermarket upgrades in your muscle car. The shield features mounting tabs for a hassle-free bolt-on installation.

Part#	Year	Desc.	UOM	Price
D250053	61-77	.....	each	15.99

NOTE: Not for use on some aftermarket starters with short solenoids.

Starter Heat Shield

Starters take in a lot of damaging heat that destroys the windings of the starter and solenoid. To combat this problem, Thermo-Tec created a non-conductive strap-on heat shield with a highly-reflective Mylar surface. The Starter Heat Shield will reflect over 90% of radiant heat, adding life to the starter and assuring reliable starts. The Starter Heat Shield is a universal kit that fits all starters and does include two 24" Snap-Straps for ease of installation.

FACTORY-CORRECT

Helps prevent electrical shorting problems

1961-69 Alternator Cap Spacer

This spacer fits over the "hot" lead on the back of the alternator protecting the wires from coming into direct contact with the alternator housing. All factory alternators were originally equipped with this for prevention of electrical shorting. The spacer is also equipped with the correct ridge for vehicles that originally used the plastic snap cap to cover the electrical connection.

1964-72 Desert Cooler 4-Row Radiators

These radiators are a direct bolt-in using the 4-row lower Radiator Saddles and 4-Row top plate. They offer better cooling than a standard 3-row because they have an extra row of cooling area. They also have slightly larger tanks to hold more coolant. They are designed to allow a factory fan shroud to bolt right up.

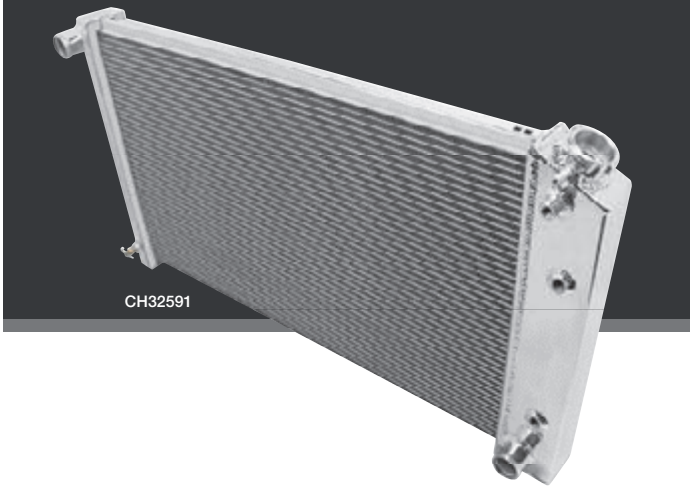
CHAMPION COOLING SYSTEMS
TWO STYLES TO CHOOSE FROM

- **Champion Series Radiators**
  Limited Lifetime Warranty
- **American Eagle Series Radiators**
  100% Aluminum Construction w/brazed core



American Eagle Series Aluminum Radiators

100% welded aluminum construction with a brazed core and no epoxy, these radiators are manufactured to install with limited or no modifications using your original mounts and fan shroud giving you the cooling system confidence you desire. The American Eagle series consist of two rows using 1" tubes capable of cooling up to 800hp and the Champion series are available in tube sizes up to 3/4" and up to four rows capable of cooling up to 1000hp. The built-in oil cooler can be utilized for automatic transmission applications, or disregarded for manual transmission cars. Each radiator includes a new cap and a T-style brass drain petcock. Radiators feature a limited lifetime warranty.

BE-COOL COOLING!
THE DIFFERENCE IS IN THE TOOLING

- **Total Cooling Module Assemblies**
  Satin or Polished - Complete Cooling
- **The Most Complete Cooling System**
  Cool Up To 700 HP

SALE! MADE IN THE USA

Super Street Power Cooling Module Assemblies

Be Cool's "Super Street Series Power Cooling Module Assemblies" can take the heat! Here's the system that can take engines rated up to 700 Dyno'd horsepower and provide efficient cooling. Each module contains a Be Cool aluminum dual 1" core crossflow performance radiator with oval fluted tubes, a dual 11" high-torque black electric puller fan set with a vented shroud, a complete set of aluminum fan mounting brackets with hardware, a diamond-cut vented coolant recovery tank, a primary fan wiring harness with a 40-amp relay and billet radiator cap. A secondary wiring harness is also included to independently control the second fan. The electric fans in this module are designed to engage at 195° and switch off when the coolant temperature reaches 175°. Your satisfaction is fully guaranteed.

THESE MODULES HAVE DUAL FANS.

1968-72 Aluminum Radiators

When you spend the money building a performance engine, the last thing you need is overheating. All of your cooling problems can be solved by installing one of our aluminum radiators. After replacing your stock radiator with this high-performance radiator, we will guarantee a minimum temperature loss of 20° or your money back. Not only will you get a decrease in temperature, but you'll get a radiator that is 40% lighter.

NOTE: These products are warranted against defects in workmanship and materials for the lifetime of ownership, non-transferable. Modifications, abuse, misuse, or unauthorized repair voids all aspects of the warranty.

DEWITTS COOLING SYSTEMS

Pro-Series Direct Fit Aluminum Radiators

DeWitts aluminum radiators are made right here in the USA and they control 100% of the manufacturing process. Why is this important? Well, this allows them to produce the finest aluminum radiators on the market! They feature factory style tanks dual 1" row core and serpentine fins. These aluminum radiators will provide 30% more cooling than the stock copper unit but will also save half of the weight compared to an original radiator. DeWitts Direct Fit aluminum radiators will fit into the stock core support and use original factory hoses. Available in a natural or Black Ice finish for automatic or manual transmissions, as well as combination units that come complete with dual 11" electric fans, a one-wire harness and temperature switch. DeWitts radiators include a limited lifetime warranty.

Milodon INC.

High Flow Thermostats

Engineered to warm the engine to a proper operating temperature without allowing it to run hot enough to lose power. The "Balanced Sleeve" design is essential for use with High Volume water pumps as it equals the pressure exerted on the thermostat so its operation is solely regulated by coolant temperature. On other thermostat designs, the increased flow generated by High Volume water pumps can actually attempt to hold the thermostat closed.

BLACK OXIDE OR STAINLESS

ARP automotive Racing products

Thermostat Housing Bolts

ARP thermostat housing bolts are available in black oxide-coated chrome-moly steel or ARP's own "Stainless 300" material. The bolts are rated up to 170,000 psi and the stainless versions are impervious to corrosion or extreme heat. The heads on the bolts feature either 12-points or a hex head, so they can be tightened easily and in small increments. The centerless ground flat washers are included to distribute the tightening load over a wider area.

1961-77 Evans Waterless Coolants

Evans Coolant and Prep Fluids are engineered specifically for use in a waterless cooling system. Evans high performance waterless coolant is for all gasoline and light duty diesel engines used in classic to modern production cars. This coolant offers unbeatable protection against corrosion, electrolysis and protection for the life of your engine. It protects up to -40° as well as a boiling point of 375°, will not vaporize which eliminates boil-over and will generate very low vapor pressures reducing stress on engine cooling systems. When converting to a waterless cooling system the Prep Fluid is designed to purge the cooling system of water-based antifreeze after draining the cooling system, and before installing new waterless coolant. Prep Fluid should be used when block drains are unavailable or cannot be removed. It is not a substitute for thoroughly draining the cooling system and related components. Prep Fluid is NOT intended to be a stand-alone operating coolant, but as a flush fluid only. Evans also offers a cooling Refractometer that is deigned to accurately test for residual water content. By determining the water content you'll be able to safely set up your cooling system with Evans Cooling products. A fast, simple optical method that requires only one drop of coolant to compare the optical reading to water content chart. Evans Refractometer is pre-calibrated for accuracy and consistency.

NOTE: All performance water pumps feature an aluminum housing and high-flow capabilities.

1971-77 High Volume Aluminum Water Pumps

All Milodon High Performance water pumps start with new, high quality steel or aluminum castings, that use large diameter shafts and heavy duty bearings. All pumps are direct factory replacements equipped with all hose connections and bosses. All Milodon Performance water pumps are protected by Milodon's 100% satisfaction guarantee. Milodon High Volume water pumps feature balanced distribution and improved efficiency, close tolerance impellers that increase coolant flow up to 30%. This increases the pressure within the block to help prevent hot spots and steam pockets, as well as, improve coolant flow through the radiator. A nonrestrictive, high flow thermostat is highly recommended to enable the Milodon High Volume water pump to work to its highest capability.

EXCELLENT UPGRADE

MADE IN THE USA

Fan Clutch Fan Blade

These 6-blade steel fans are manufactured for thermal clutch applications with a universal bolt pattern so they'll fit all years and models of A-Bodies. These top-quality fan blades are a huge improvement over the standard factory 4-blade fan and provide a significant more amount of cooling air moving through the radiator. They're available in 18" diameter to fit most applications.

Part#	Desc.	UOM	Price
CH25854	18".....	each	49.99

NOTE1: It is highly recommended that you have 1" of clearance between the fan blade and the fan shroud, and that the fan blade sits at least an inch into the shroud for maximum cooling benefits. NOTE2: Use with fan clutch CH25855 or CH25856.

HIGH-GLOSS BLACK

Intellitronix Intelligent Electronics

MADE IN THE USA

1961-77 Variable-Speed Fan Controller

Turns your electric fan on and off at your desired temperature. Fans turn on at 60-percent power and fan speed increases as the temperature rises. You can easily adjust the activation temperature between approximately 160-240 degrees Fahrenheit. This fan controller also has a fuse to protect the controller from accidental shorts or a bad fan. This allows greater control over engine temperature, which helps to reduce charging spikes and current load on the charging system. 3 LED status indicators let you know that you have wired it up properly and that everything is functioning according to plan. The fan controller comes with a 1/8" NPT thread-in temperature sensor with bushing adapter. It features variable fan speed and a 40 amp rating. It works on 12-volt systems only. The fan controller comes with a Lifetime Guarantee and is made in the USA!

MODEL SPECIFIC DESIGN IS READY FOR INSTALLATION

Available for vehicles with or without factory AC

Complete Air Conditioning Conversion Assemblies

The Gen IV is Vintage Air's most powerful and intelligent climate control system. The Gen IV uses an exclusive fully electronic microprocessor control system to eliminate cables or vacuum connections. Separate high-capacity copper parallel-flow heat coil and aluminum plate and fin cooling coils provide outstanding performance and instant temperature adjustments. This new "Sure Fit" system includes a backlit three-lever control panel that bolts in the stock dash location. Additional features include variable blower speed and a multi-outlet blend for dash, floor and defrost. Sure Fit systems are engineered specifically for each vehicle application and require minimal alterations to the vehicle for installation. We also offer the chrome covers to upgrade your assembly for your show car.

ASSEMBLY INCLUDES:

Evaporator (behind dash), Condenser/drier (mnts to radiator), Hose kit, Sanden SD 508 compressor, Compressor bracket, Hi/Lo safety switch

Heater Control Valves
Revitalize your heater with a new control valve from OPGI. Each valve is modeled after original equipment and available in either gold cadmium-plated steel or injection molded ABS plastic for corrosion resistance. Valves feature a 5/8" inlet and outlet for water flow as well as a vacuum line to control the operation of the valve itself. Factory-correct hose connections make installation a breeze. Sold per each, please specify application.

PYPES EXHAUST SYSTEMS

1964-72 14" Race Pro Exhaust Systems

Fabricated using 16 gauge, mandrel-bent stainless steel pipe to ensure maximum exhaust gas flow which can significantly boost horsepower. The stainless construction of our pipes and mufflers enables them to resist corrosion and extends the life of the system. Each kit comes with a precisely engineered X-pipe to equalize exhaust gasses prior to entering the mufflers. All kits are available with a standard X, while others are offered with the exclusive X-change which features additional outlets giving you the option to run your exhaust through mufflers, or uncap the legs for an open system. Cad plated or stainless clamps, stainless hangers and polished stainless tips are available and included in most systems. Available in natural stainless or polished T304 stainless. When it comes to flow, you just can't get anything better than the Race Pro Muffler. Features a 'straight through' path that guarantees throughput that's 99% of straight tubing! The sound is surprisingly calm considering the absence of any impedance when you look down its barrel. At idle and low rpm cruising, you will not draw much attention, but upon acceleration, bystanders lookout! The Race Pros aggressive sound is the result of applying a layer of stainless mesh around a unique internal perforated tube, accompanied by a healthy stuffing of rock wool before the unit is sealed. Highly recommended for the track where every 1/10th counts. Not recommended on lower horsepower vehicles as low end torque may suffer. Race Pro mufflers are available in 14" or the quieter 18" version.

NOTE1: Connection to exhaust manifolds will require the use of OEM-style down pipes available from OPGI for both small-block and big-block. NOTE2: Due to tooling restraints, some of the tailpipes may have a welded joint located above the rear axle. Once installed, this joint will be hidden and will not affect performance. NOTE3: Using either aftermarket headers or stock exhaust manifolds may require additional hardware.

1964-72 Violator Exhaust Systems

Fabricated using 16 gauge, mandrel-bent natural stainless steel pipe to ensure maximum exhaust gas flow which can significantly boost horsepower. The stainless construction of our pipes and mufflers enables them to resist corrosion and extends the life of the system. Each kit comes with a precisely engineered X-pipe to equalize exhaust gasses prior to entering the mufflers. All kits are available with a standard X, while others are offered with the exclusive X-change which features additional outlets giving you the option to run your exhaust through mufflers, or uncap the legs for an open system. Cad plated or stainless clamps, stainless hangers and polished stainless tips are available and included in most systems. Violator mufflers feature a 'straight through' path that gives you up to 95% flow compared to straight pipes with the sound of a chambered muffler. The sound is surprisingly tame when cruising considering the absence of any impedance when you look down its barrel. At idle and low rpm cruising, you will not draw much attention, but upon acceleration, bystanders lookout! The Violator's aggressive sound is the result of a unique internal tube with louvers acting as sound baffles.

NOTE3: Using either aftermarket headers or stock exhaust manifolds may require additional hardware.

NEW! 1964-72 Turbo Pro Exhaust System

Fabricated using 16 gauge, mandrel-bent stainless steel pipe to ensure maximum exhaust gas flow. The precisely engineered X-pipe will equalize exhaust gasses prior to entering the mufflers, the X-change system features additional outlets giving you the option to run your exhaust through mufflers, or uncap the legs for an open system, or without X-pipe systems feature two separate exhaust tubes from the crossmember back. Cad plated or stainless clamps, stainless hangers and polished stainless tips are available and included in most systems. Turbo Pro Mufflers feature flow control channels that eliminate drone, resonance, and flow turbulence while maintaining a steady flow of exhaust gasses that results in a truly quiet performance exhaust note. The flow progression of this muffler mimics the CFM of a straight pipe without the annoying drone or resonance. Expect a quiet mellow tone with a true performance sound with the Turbo Pro Muffler.

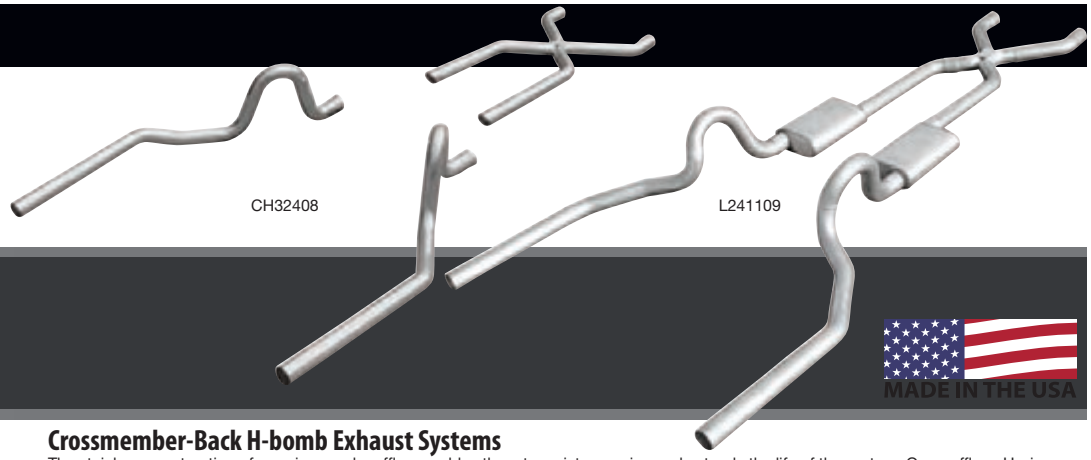
Exhaust Down Pipes

Mandrel-bent using heavy-gauge tubing for the maximum exhaust flow and a long life. The pipes are available for small-block and big-block engines and have been designed to connect the factory exhaust manifolds to one of the Pypes Exhaust kits. Sold per pair, flanges included.

	Part#	Year	Desc.	Mfg #	UOM	Price
3	C240657	68-72		DOF10S	pair	176.99



Crossmember-Back H-bomb Exhaust Systems

The stainless construction of our pipes and mufflers enables them to resist corrosion and extends the life of the system. Our mufflers, H-pipe, oem style stainless tailpipes, are also stainless constructed and precision matched to deliver the ultimate in sound and performance. Cad plated or stainless clamps and stainless hangers are included with each kit, tips sold separately. Some cutting may be required.
The Street Pro muffler is great for street/strip use and will maintain its rich sound qualities for the life of the muffler. Based on a chambered type muffler the Street Pro muffler is recommended for stock to medium modified vehicles looking for an aggressive sound but not too noticeable. Next, the Race Pro muffler provides the greatest flow out of any muffler in the Pypes line. Features a straight through design wrapped with packing to give you a great sound while still giving the performance of a straight through muffler. The sound is calm at idle and low RPM cruising, but open the throttle and the sound is unleashed! Lastly, the Violator muffler provides the most aggressive sound out of any muffler in the Pypes line. It features a 3" internal louvered tube with small sound deflector chambers to achieve the aggressive sound. The sound at idle is unique, but once the throttle is opened, the exhaust becomes incredibly loud and noticeable.

Street Pro Exhaust Kits

Designed specifically for street machines and muscle cars. Each kit comes with a precisely engineered X-pipe to equalize exhaust gasses prior to entering the mufflers. All kits are available with a standard X, while others are offered with the exclusive X-change which features additional outlets giving you the option to run your exhaust through mufflers, or uncap the legs for an open system. From the heavy-gauge mandrel bent stainless tubing to the TIG welded stainless steel mufflers, these kits are designed to last for years and provide the smooth sound you desire. Kits also include tailpipes, zinc clamps, and stainless steel hangers to aid installation. Compatible with original exhaust manifolds or aftermarket headers.

1964-72 2.5" High-Tuck Exhaust Systems

System allows for the most ground clearance of any A-body system on the market . The X-pipe pushes the mufflers up into their installation "pockets" and the tailpipe sits higher coming out of the muffler. No more bottoming out! Pypes Exhaust Systems are designed to deliver enhanced performance, provide extra punch in the passing lane and improve gas mileage. Fabricated using the highest quality materials, 16 gauge, mandrel-bent, stainless steel pipe ensures maximum exhaust gas flow, which can significantly boost horsepower. The stainless construction of our pipes and mufflers enables them to resist corrosion and extends the life of the system. Our mufflers, X-pipe, oem style tailpipes, are also stainless constructed and precision matched to deliver the ultimate in sound and performance. Cad plated or stainless clamps, stainless hangers and polished stainless tips are available and included in most systems. These systems can be installed at home without any special tools. Some cutting may be required.

1964-72 Stainless Steel Exhaust Systems

Fabricated using 16 gauge, mandrel-bent stainless steel pipe to ensure maximum exhaust gas flow which can significantly boost horsepower. The stainless construction of our pipes and mufflers enables them to resist corrosion and extends the life of the system. Each kit comes with a precisely engineered X-pipe to equalize exhaust gasses prior to entering the mufflers. All kits are available with a standard X, while others are offered with the exclusive X-change which features additional outlets giving you the option to run your exhaust through mufflers, or uncap the legs for an open system. Cad plated or stainless clamps, stainless hangers and polished stainless tips are available and included in most systems. These systems can be installed at home without any special tools. Some cutting may be required. Available in natural stainless or polished T304 Stainless.

NOTE1: Connection to exhaust manifolds will require the use of OEM-style down pipes available from OPGI for both small-block and big-block. NOTE2: Due to tooling restraints, some of the tailpipes may have a welded joint located above the rear axle. Once installed, this joint will be hidden and will not affect performance. NOTE3: Using either aftermarket headers or stock exhaust manifolds may require additional hardware.

Universal Stainless Steel X-Pipes

Universal exhaust components from Pypes manufactured in premium 16-gauge stainless steel for long lasting performance. Choose from standard X-Pipe crossovers or the X-Change crossovers which allow you to uncap the open port outlet for un-restricted exhaust flow.

NOTE: Welding is required for installation.

1964-72 3" Mandrel-Bent Pipe Kit

Mandrel-bent pipes keep the exhaust gasses moving for greater power. These are precision-bent, slip-fit pipes for A-Bodies and they come with an H-pipe crossover, but no clamps. You have to use offset inlet/outlet mufflers for the pipes to fit properly. We recommend professional installation as welding and cutting is required.

	Part#	Year	Desc.	Mfg #	UOM	Price

American Thunder Exhaust Kits

As one of the most powerful exhaust systems for A-Bodies with large displacement engines, the Flowmaster "American Thunder" system features heavy-gauge mandrel-bent tubing and Super 40-Series or Super 50-Series mufflers. The tailpipes included are two-piece and install easily. The kit also features an adjustable crossover pipe to fit a variety of applications and has all the hangers and clamps that fit in the factory locations. The 1964-67 kit exits the tailpipes behind the rear wheels pointed at the ground, while the 1968-72 and 1964-72 kits exit out the back at the bumper. Get the power and sound of performance with the Flowmaster American Thunder exhaust system.

COOL IT Thermo Tec

Exhaust Wrap

Free up horsepower and reduce underhood temperatures with Thermo Tec exhaust wrap. Manufactured to withstand continuous heat up to 2000°F to help lower intake temperatures. Thermo-Tec wrap contains no Asbestos and will not over-insulate a system when properly installed due to a proprietary coating known as Thermal Conduction Technology (TCT), which conducts heat across the wrap's surface. Exhaust wrap is available in a variety of materials to suit your specific application requirements.

Heat Barriers

MADE IN THE USA

The Aluminized Heat Barrier is made up of woven silica with a flexible aluminized finish. The highly-reflective surface of the material is capable of withstanding radiant temperatures up to 2000°F. The fabric side can handle temperatures in the range of 350-1200 degrees F. This product can be installed using standard rivets with a backup washer or weather strip adhesive. The use of clamps or straps such as Thermo-Tec's Snap Strap can be used to hold the blanket in place for manifolds or exhaust systems. This product can be cut to fit.

CH34830	40" x 50-ft.....	each	1,349.99

SUPERIOR PROTECTION

For a variety of applications

MADE IN THE USA

Kevlar Heat Barrier

The Kevlar Heat Barrier is made from Kevlar with a Mylar finish. The Barrier can withstand up to 3000° F of radiant heat and can withstand direct contact up to 800° F. The product can be installed using standard rivets with a backup washer or our Heavy-Duty Spray Adhesive. The use of clamps or straps such as Thermo-Tec's Snap Strap can be used to hold the blanket in place for applications on manifolds or exhaust systems. In applications such as a heat shield on the undercarriage above the exhaust the material should be held in place by fasteners as described above. When used as a heat shield, the barrier is installed so the bright metallic surface faces the heat source. When used to retain heat in applications such as exhaust manifolds, the barrier is installed with the fabric side facing the heat. This allows the metallic surface to act as a barrier to prevent the penetration of liquids.

MADE IN THE USA

Hi-Heat Coating

To finish off a clean and well-protected Exhaust Insulating Wrap application it is recommended to use the Hi-Heat Coating. The coating will protect the wrap from abrasion and harmful liquid spills. Extra resins and binders toughen the surface, extend the life of wrap by protecting it from friction, and seals the pores to minimize the penetration of harmful liquids. Hi-Heat Coating can handle direct and continuous heat of 2000 degrees Fahrenheit when used with ThermoTec Exhaust Insulating Products. The coating also works excellent as a paint directly on metal surfaces and can handle continuous temperatures up to 1200 degrees Fahrenheit.

Hush Power II Mufflers

The "Hush Power II" mufflers from Flowmaster have the great sound of the 1950s-style mufflers, yet support up to 400 horsepower with ease. Mufflers are manufactured using either T304 or T409 stainless steel and finished in durable black paint prior to shipping. Hush Power II utilize guided sound control for maximum flow. The internal design mimics the gas flow of a jet engine to produce optimal tones at all RPM levels. Available in your choice of 3 inlet/outlet sizes, the mufflers are only 18" long by 5-1/2" wide and 4" tall. Sold each.

MORE PERFORMANCE WITH A POWERFUL SOUND

FLOWMASTER THE EXHAUST TECHNOLOGY COMPANY

MADE IN THE USA

1964-77 Delta Flow Mufflers

Gain 10 to 15 horsepower to the rear wheels by adding these high-performance mufflers. Manufactured in the USA using the highest quality materials and the latest technology—the standard in high-performance exhaust. The "Delta Flow" mufflers have a milder tone that generates a powerful sound outside the vehicle with a lower interior resonance, while improving torque and horsepower. These extreme high-flow mufflers will give your vehicle that powerful muscle car sound that you are looking for.

FLOWMASTER THE EXHAUST TECHNOLOGY COMPANY

MADE IN THE USA

1964-77 Stainless Steel Mufflers

Flowmaster mufflers are now manufactured using heavy-gauge 409S stainless steel for the ultimate in strength and durability. Using the same attention to detail that Flowmaster gives all of their products, these mufflers are designed to produce the signature sound you desire from your muscle car exhaust. All mufflers are finished in a durable black paint and available in your choice of 40-series or Super 44-series. Mufflers feature a variety of inlet and outlet sizes and include a 10-year limited warranty.

FLOWMASTER THE EXHAUST TECHNOLOGY COMPANY

MADE IN THE USA

1964-77 Super 40-Series Mufflers

For the most aggressive, deep sounding muffler available in the Flowmaster line, the "Super 40-Series" muffler is the one. This two-chamber muffler has that classic deep tone with performance to match. It comes in 2-1/4", 2-1/2" and 3" diameter offset inlet and outlet to fit all A-Body applications. These mufflers have a case dimension of 5" tall with a 10" width. Get that muscle car sound with these Flowmaster Super 40-Series mufflers.

HOOKER

Aero Chamber Mufflers

The "Aero Chamber" muffler is designed for a throaty powerful sound and flows 23% better to produce more horsepower and torque with its aerodynamic design. Made of heavy-gauge aluminized steel with a stainless steel perforated plate to eliminate internal rust.

	Part#	Desc.	UOM	Price
4	CH24905	2-1/2" I/O.....	each	101.99

NOTE: I = inlet and O = outlet.

PYPES PERFORMANCE EXHAUST

Stainless Steel Mufflers

Pypes mufflers are some of the best sounding and best performing mufflers on the market. In order of quietest to loudest; Turbo Pro; features flow control channels that eliminate drone, resonance, and flow turbulence while maintaining a steady flow of exhaust gasses that mimics the CFM of a straight pipe. Expect a quiet mellow tone with a true performance sound. Race Pro; provides the greatest flow out of any muffler in the Pypes line. The Race Pro features a straight through design wrapped with packing to give you a great sound with minimal airflow resistance. The sound is calm at idle and low RPM cruising, but open the throttle and the sound is unleashed! Street Pro; a great street/strip muffler that will maintain its rich sound qualities for the life of the muffler. The chambered type Street Pro muffler is recommended for stock to medium modified vehicles looking for an aggressive, but not too noticeable sound. Violator; provides the most aggressive sound out of any muffler in the Pypes line. It features a 3" internal louvered tube with small sound deflector chambers to achieve the aggressive sound. The sound at idle is unique, but once the throttle is opened, the exhaust becomes incredibly loud and noticeable.

black widow TUNED PERFORMANCE EXHAUST

Performance Mufflers

Black Widow performance mufflers feature a unique internal hourglass design to provide straight through airflow. The design combines an ideal balance of exhaust velocity and exhaust volume with acoustic sound wave deflection to create a distinctive sound unlike any other muffler on the market today. Mufflers feature a fully-welded outer casing manufactured in durable 14-gauge 430 stainless steel and feature a brushed finish as well as an embossed Black Widow logo on one side. Mufflers are bi-directional and can be mounted upside down or backwards without affecting flow or sound. All mufflers are manufactured in the USA and are backed by a lifetime warranty.

Neighborhater - The loudest and least restrictive of the Black Widow line. These mufflers feature a 6" x 5" diameter round body. Available for 2-1/2", 3", or 3-1/2" pipe diameters.

Widowmaker - Almost identical to the Neighborhater, but with a 10" x 5" diameter body offering a slightly quieter sound without restricting airflow. Available for 2-1/2", 3", or 3-1/2" pipe diameters.

Angry Housewife - The loudest of the oval Venom Series mufflers, the Angry Housewife features a 6" x 9" x 4" body. Great flow without the drone.

Race Venom - The second loudest of the oval shaped mufflers from Black Widow. Features a 9" x 9" x 4" body. All Venom series mufflers are available in several sizes and inlet/outlet configurations.

Venom 250 - Nearly identical to the Race Venom, but with a 14" x 9" x 4" body. Slightly quieter with a longer body, while still possessing great airflow qualities.

Venom 300 - A match to the Venom 250 mufflers, but with an 18" x 9" x 4" body. The quietest of the Black Widow line, but still with great airflow qualities thanks to the internal hourglass design in all Black Widow mufflers.

	Part#	Year	Desc.	UOM	Price
3	BW01225	61-72	.....	each	119.99

NOTE: Inlet and Outlet configurations are a reference for when logo on muffler is face up. Muffler can be installed backwards and/or upside down without affecting airflow or sound.

Competition Headers

Competition headers are made for the stock or mildly modified engine. Made of heavy-gauge material, they're approximately 30% heavier than the "Super Competition" headers, but weld easier and are slightly more durable. Available in heat-resistant black paint or metallic ceramic thermal barrier coating. Sold per pair and includes hardware and gaskets. Reducers sold separately.

WILL NOT FIT CUTLASS SUPREME, NO STANDARD TRANSMISSION COLUMN SHIFT
CTL9109/10 – '65-72 (400-455) Auto 1-3/4" x 27" (3" collector) - Gasket: CTL9113 - Reducer: C980183

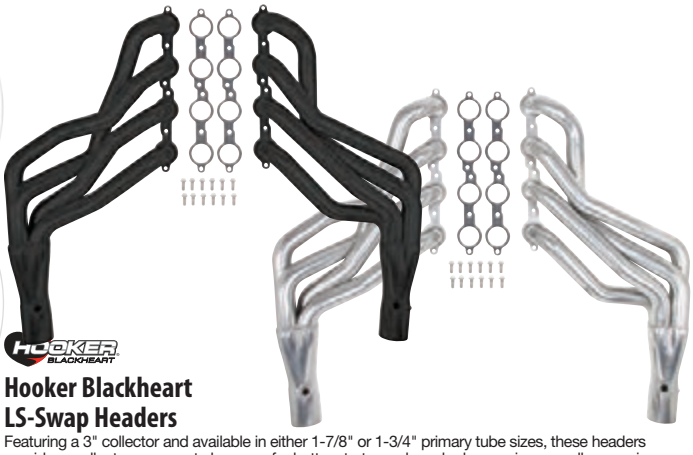
PROVIDE EXCELLENT COMPONENT AND GROUND CLEARANCE



Hooker Blackheart LS-Swap Headers

Featuring a 3" collector and available in either 1-7/8" or 1-3/4" primary tube sizes, these headers provide excellent component clearance for better starter and spark plug service as well as maximum ground clearance. O2 bungs are also located in the header collector to provide an optimized location for wideband O2 sensor operation and reliability. These LS swap headers are compatible with all GM automatic and Tremec T56 or T56 Magnum transmissions. All hardware is included and they are available in painted black, silver ceramic coated and Darkside black ceramic coated finishes.

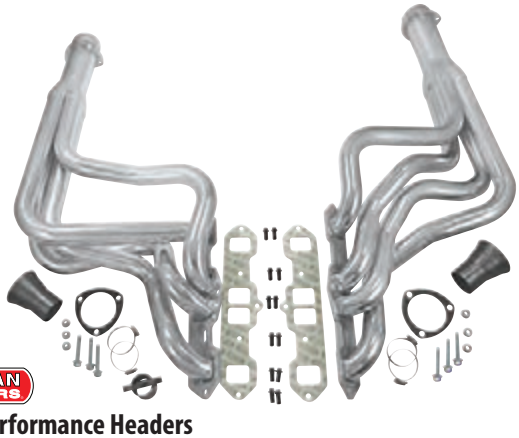
QUALITY PRODUCTS AT A FAIR PRICE

Available in a variety of styles



High-Performance Headers

Original style headers are manufactured using heavy-gauge steel tubing and feature 1/4"-thick flanges at the head and collector. Headers are available in a standard black or Hedman's HTC coating—a ceramic-metallic formula that protects the headers from extreme temperatures and harsh road elements. Hedman's "Elite" series headers are the top-of-the-line. Constructed with heavy 3/8" flanges and heavy-gauge tubing, these headers are built to withstand even the toughest conditions. All Elite series headers also feature Hedman's HTC coating for additional protection and good looks.

APPLICATION FOOTNOTES:
– Without smog injection or injection heads.
– Includes part necessary to retain emission devices. (50 state).
– Because of the engine location, will not fit Cutlass Supreme or "S" series car.

DESIGNED SPECIFICALLY FOR LS CONVERSIONS

Several finishes to choose from

HEDMAN HEDDERS

MADE IN THE USA

Long-Tube LS Swap Headers

Premium quality headers are now available from Hedman to help you complete your LS Swap. These long-tube headers are designed specifically for A-body models and are offered in a variety of primary tube diameters. Built from mild steel and handcrafted in the USA, these headers come complete with gaskets, small head header bolts, and exhaust collector adapters for attaching the headers to a 2-1/2" exhaust system. Choose from Hedman's HTC polished silver ceramic-coated, Black-Maxx satin black ceramic-coated, or uncoated "raw" finishes. As with all Hedman Hedders, these headers are backed by a limited lifetime warranty, and the coating is covered for a full 5 years.

BLOCKS RADIANT HEAT

Hassle-free installation

1961-72 Header Jacket Sets

The new quick-wrap high-velocity Exhaust Jackets are an innovative way to insulate and block radiant heat. The jackets cover the tubes vertically allowing for a consistent fit. The fit allows the exhaust system to expand as it comes up to operating temperatures without restrictions and provides air space for added insulation. This product uses Thermal Conduction Technology (TCT), developed by Thermo-Tec, and can be applied with the headers in the vehicle. Can be installed with the headers mounted.

Oldsmobile High-Performance Exhaust Manifolds

Increased performance and improved exhaust flow are a result of countless hours of testing and modifying the design of W-30/455 manifolds for small-block use. Manifolds feature a divided center port design as well as a large 2-1/4" outlet on each side. The smooth passenger's side casting eliminates the need to plug the crossover pipe boss.

Selecta-Speed Windshield Wiper Kits
With the installation of these new windshield wiper motors from Detroit Speed, rain will no longer be a problem to see the road clearly. These kits provide you with the performance and convenience of a late model wiper system in a package that easily installs in your vehicle. The wiper motor uses a low-profile design that features seven-speeds with 5 delays, low speed and high speed, rotary switch with a billet knob, adapter plate and wiring harness. All of this still gives plenty of clearance to the valve covers and brake booster. Several options are available for you to select the perfect option for your particular application.

Harmonic Balancer Puller

This puller is designed to remove balancers, vibration dampers, pulleys and gears with tapped holes. The four slots in the yoke allow use of this tool in either two-hole or three-hole applications. The removable floating swivel prevents damage to shaft ends. Included are the necessary size screws with washers; three 3/8"-24 x 2", three 5/16"-18 x 2", two 3/8"-16 x 4", three M8 x 1.25 x 80 mm. Forged from alloy steel and packaged in a plastic pouch.

NOTCHEAD

Custom Hardware Tools & Accessories

Doing the job right requires special tools, and these pieces from Notchead are a must-have! The custom Polishing Grip is perfect for polishing bolts and assorted small parts. The soft aluminum jaws grip the threads of your bolt firmly, but will not cause damage. This allows you to polish quickly and efficiently. The special pin-drive sockets are necessary when installing or removing your Notchead bolts. These replacements can be used with your choice of combination wrench or socket wrench.

Polishing Grip - features two collets (1/4"-3/8" and #4 screw-1/4")

Large Collet - Adjust from 1/2" to 7/16"

Nut Polishing Attachment - Includes 4 sizes of coarse and fine thread adjustments (#10, 1/4", 5/16", 3/8")

Sockets are available in several sizes depending on your bolt size.

INDOOR/OUTDOOR APPLICATIONS - FOUR STYLES TO CHOOSE FROM

3-Layer Premium Car Cover

The ultimate vehicle cover fabric—it's extremely soft and combines barrier protection w/needed breathability to release any condensation or trapped moisture at a competitive price. 3-layer premium material is ideal for both outdoor & indoor applications. Folds neatly for compact space-saving storage. Includes antenna grommet, cable, lock & storage bag. Tan material.

OUR BEST CAR COVER! Indoor/outdoor use.
Not waterproof. Does not include mirror pockets.

Part#	Year	Desc.	UOM	Price
G210001	64-67		each	119.99
G210002	68-72		each	119.99

NOTE: Pockets for door mirrors are not included.

Cotton Flannel Car Cover

Protect your expensive paint job with this cotton flannel-lined car cover. Flannel will not wear away the edges of your paint like conventional car covers can. These covers absorb moisture, not repel it. Includes cable, lock and storage bag. Tan material.

Part#	Year	Desc.	UOM	Price
G230002	64-67		each	246.99
G230003	68-72		each	246.99

NOTE1: Not waterproof. NOTE2: Covers do not include mirror pockets or antenna holes.

4-Layer Plus Car Cover

4-Layer Plus is the favorite among car collectors because of its super-soft underside nap, which protects even the most delicate surface. Covers are longwearing, breathable, mildew and rot-resistant. Includes antenna grommet, cable, lock and storage bag. Gray material. Machine washable.

OUR BEST INDOOR COVER!

Part#	Year	Desc.	UOM	Price
G726L01	64-67		each	134.99
G727L02	68-72		each	134.99

NOTE: Not waterproof. Pockets for door mirrors are not included.

4-Layer Car Cover

Four layers thick with a very soft inner layer, our 4-layer cover offers the best combination of water-resistance and breathability in a medium-priced fabric. Absorbs impacts, has high resistance to tears, and punctures. Includes antenna grommet, cable, lock and storage bag. Gray material.

Made for indoor/outdoor use.

Part#	Year	Desc.	UOM	Price
GCH726L	64-67		each	129.99
GCH727L	68-72		each	129.99

NOTE: Not waterproof. Pockets for door mirrors are not included.

Car Cover Lock Kit

Includes seven-foot vinyl-coated steel cable with loops in the ends and a brass lock with two keys. Steel cable locks the car from underneath and connects through the bottom sides of the cover via scratchproof grommets. Kit includes instruction sheet and grommets.

Part#	Year	Desc.	UOM	Price
CCL2561	64-77		each	6.99

Car Cover Storage Bag

Protect your car cover when not in use. This durable, sturdy storage bag is designed for use with all of the custom car covers that we offer.

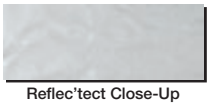
COVERCRAFT SINCE 1965

Watershield Close-Up

Formed Fitted Close-Up



Reflec'tect Close-Up

Flannel Close-Up

NEW! WeatherShield HD Car Covers

Developed primarily for intense sun environments and long term storage. Not only provides UV opacity, it repels water and is still breathable to allow moisture and heat to escape. The base material for WeatherShield HD is woven using solution dyed UV resistant polyester fibers. Not only is the fabric solution dyed, the 300 denier construction is 40% heavier than regular car covers and the heavier denier thread provides double the tear and tensile strength. Fabric is then finished with the patented EPIC by Nextec encapsulation process. Using computer controlled proprietary processes Nextec forces specially formulated polymers inside the fabric to bond to each individual thread. These special polymers have amazing elasticity to block moisture and dirt.

MOTHERS® MOTHER'S WASH AND WAX

Polishes•Waxes•Cleaners

THERE'S NO SHINE LIKE MOTHER'S

California Gold Showtime

Whether you want to clear a layer of dust or prepare for the judges, use "Showtime Instant Detailer." Its unique formula will clean off fingerprints, smudges and dust, as well as hide minor imperfections and spider-webbing. Showtime is designed with color enhancers and shine fortifiers, ready whenever you need your ride to look freshly detailed.

Part#	Desc.	UOM	Price
CH23850	16-oz.....	each	8.99
CH35196	24-oz.....	each	11.99

California Gold Pure Brazilian Carnauba Wax

Contains carnauba wax and just enough modern chemistry to easily spread it, remove the light haze & enjoy the most spectacular shine you will ever experience. No cleaners, abrasives or fillers.

Part#	Desc.	UOM	Price
MP05550	paste, 12-oz.....	each	23.99
MP05750	liquid, 16-oz.....	each	14.99

California Gold Pure Polish

Strong polishes and cleaners are carefully blended to allow you to restore the natural beauty and brilliance of your paint. It prepares the paint for a final waxing by removing oxidation, dirt, stains and old wax.

Part#	Desc.	UOM	Price
MP07100	16-oz.....	each	8.99

California Gold Scratch Remover

There are areas of your paint's finish that see more abuse than others: on the edge of doors and the trunk lid, around the door handles, keyholes, at the hood latch, etc. What you need is a scratch remover. Mothers "Scratch Remover" works on any sort of paint, any sort of finish, to help restore high-mileage paint and remove surface scratches. This is a true polish—be sure to chase it with the standard regiment of waxing to properly seal and protect.

Part#	Desc.	UOM	Price
CH23851	.....	each	9.99

California Gold Brazilian Carnauba Cleaner Wax

This high-tech wax/cleaner contains Brazilian carnauba wax for a spectacular shine and state-of-the-art chemical film polymers to lock in protection. The best of modern technology and time-honored carnauba wax ensures your complete satisfaction. Detergent-proof.

Part#	Desc.	UOM	Price
MP05500	paste, 12-oz.....	each	16.99

California Gold Waterless Wash & Wax

When washing your car with a hose is not an option, turn to Mothers "California Gold Waterless Wash & Wax". The ultra-slick formula dissolves and encapsulates dirt and grime allowing it to be safely wiped away just as they would with the suds of a traditional car wash. Safe for any exterior vehicle surface, just spray, wipe and buff your way to a beautifully washed and waxed finish.

Part#	Desc.	UOM	Price
CH31303	24-oz.....	each	11.99

Back-To-Black

As your ride's exterior ages, rubber, plastic and vinyl exterior hardware of all colors will dry, crack, flake and deteriorate. This oxidation can be stopped and reversed with Mothers "Back-to-Black", our favorite auto-care concoction. This trim treatment is great for all sorts of exterior hardware in all colors-bumpers, molding, louvers, window trim, vents, seals, skirts, door handles, wiper arms—anything that's plastic, rubber or vinyl. Apply "Back-to-Black" to sunburnt plastic, rubber and vinyl to revive the factory-new sheen, then re-treat that exterior hardware regularly. Choose from the 12-oz. wipe-on formula, or the one step spray on 10-oz. aerosol can.

Part#	Desc.	UOM	Price
CH23863	12-oz.....	each	9.99
CH31301	10-oz.....	each	10.99

NOTE: Aerosol item must be shipped ground.

California Gold Micro-Polishing Glaze

Fills and hide scratches, swirl marks and spider webbing. Clear coats blacks, reds, candies and all paint types or colors will get that "show car" wet look shine. Use by hand or with a buffer. California Gold will not streak or smear.

Part#	Desc.	UOM	Price
MP08100	16-oz.....	each	10.99

Mag & Aluminum Polish

The original mag wheel polish. Cleans, polishes & protects mags, chrome valve covers, manifolds, aluminum parts, alloy parts & accessories.

Protectant

Preserves and protects for 30 days. Constructed to recondition & maintain the original condition & appearance of dashboards, vinyl, bumpers, trim, tires and more. Ozone and smog-resisting, UV-shielding penetrate—a preservation agent that works on just about any uncoated plastic or rubber

Part#	Desc.	UOM	Price
MP05301	16-oz.....	each	11.99

Leather Cleaner

The ultimate leather cleaner. High-traffic leather interiors, convertibles with leather and essentially every other leather should be bathed regularly—it's a natural skin and needs care. The chemists at Mothers created "Leather Cleaner," a pH-balanced formula that safely lifts impregnated dirt, grime and stains from your precious leather interior. Meanwhile, when you use our Leather Cleaner you're preparing that material for Mothers "Leather Conditioner," which will ensure a long, supple life.

Part#	Desc.	UOM	Price
CH23856	8-oz.....	each	9.99

Leather Conditioner

Mothers "Leather Conditioner" will preserve your smooth leather. You've cleaned it, rubbed out stains, spills and the dirt. You don't want to leave that freshly cleansed skin open to new indiscretion. Seal it with Mothers Leather—it's formulated with lanolin and neat's foot oil to preserve the natural oils lost with age. It leaves a protective barrier that helps seal out the detrimental effects of the sun, time and abuse.

Part#	Desc.	UOM	Price
CH23857	8-oz.....	each	10.99

All-In-One Leather Care

Dissolves and lifts away dirt and debris from deep within your leather while premium grade conditioners rejuvenate and replenish the natural oils lost to heat and sunlight over time. When applied regularly, your finished leather will be left non-greasy and with a new-leather sheen.

Part#	Desc.	UOM	Price
CH31302	12-oz.....	each	9.99

Plastic Polish

This is a true polish—you can buff out hairline scratches, smudges, flaws and little nicks as well as clean away yellowing and stains from your plastic convertible window. Mothers Plastic Polish doesn't stop there! It protects your plastics from the sun, smog, water stains and airborne contaminants with a tough layer of polymers. For those tough jobs, try it with our PowerBall.

Part#	Desc.	UOM	Price
CH23862	8-oz.....	each	7.99

California Gold Clay Bar System

Created to remove the particulate debris and contaminants that washing and polishing can't, this exclusive "Clay Bar System" will remove embedded grains of metal, tree sap, airborne environmental deposits and paint overspray. Better yet, our clay bar isn't hazardous to your paint—it's just firm enough to pick up the bad stuff without being too aggressive. Use Mothers "Clay Bar" to get rid of paint fouling grime and pave the way for a complete waxing.

NEW! Triple Action Foam Wash

Mothers Triple Action Foam Wash is a powerhouse, suds-inspired shampoo, delivering unmatched lubricity and scratch protection thanks to its penetrating polymer surfactant foam blend that safely dissolves, lifts and suspends dulling contaminants. This versatile formula increases in strength—and foam—based on your needs, yet remains safe and effective on every exterior surface. Whether you're looking for a quick, all-purpose super-sudsing shampoo, or an insane foam concentrate to use in your favorite foam cannon or gun, you'll be left with a perfectly clean, streak-free shine. And best of all, it won't strip waxes, sealants or ceramic coatings, regardless of strength because of its dilution-optimized pH balanced and environmentally friendly formula.

Part#	Desc.	UOM	Price
CH35201	16-oz	each	6.99

NEW! Ultimate Hybrid Ceramic Detailer & Bead Booster

Mothers Ultimate Hybrid™ Ceramic Detailer & Bead Booster is the effortless way back to that "just coated" super-hydrophobic, liquidy-gloss appearance! Featuring a balanced blend of advanced science and traditional car care, this formula seamlessly unites the trusted and time-tested natural protection of carnauba wax with the cutting-edge nano-quartz ceramic technology of today. Ultimate Hybrid™ Ceramic Detailer is a true instant detailer, effortlessly clearing away dust, fingerprints and smudges, while simultaneously enhancing the protective, hydrophobic beading characteristics of any finish. It can be used over your existing ceramic coating, sealant or wax, or even as a stand-alone bead booster on uncoated vehicles. Just spray on and wipe off, it's that easy!

Part#	Desc.	UOM	Price
CH35205	24-oz	each	13.99

NEW! Ultimate Hybrid Ceramic Spray Wax

Mothers Ultimate Hybrid™ Ceramic Spray Wax combines the simplicity of a spray wax with the benefits of a ceramic spray coating. Featuring a balanced blend of advanced science and traditional car care, this formula seamlessly unites the trusted and time-tested natural protection of carnauba wax with the cutting-edge nano-quartz ceramic technology of today. From greasy fingerprints and smudges to road grime and dust, Ultimate Hybrid™ Ceramic Spray Wax's ultra-slick formula lubricates while it cleans, leaving you with a scratch-free, SiO2 protected, liquidy-gloss appearance that repels water and contaminants with ease. Use as a stand-alone product, or as a booster over your existing ceramic coating, sealant or wax. Apply in layers for increased depth, durability and protection. Just spray on and wipe off, it's that easy!

Part#	Desc.	UOM	Price
CH35203	24-oz	each	14.99

NEW! Ultimate Hybrid 1-Step Ceramic Clay & Coat Kit

Mothers Ultimate Hybrid™ 1-Step Ceramic Clay & Coat is an all-in-one surface prep and preservation system. Featuring a balanced blend of advanced science and traditional car care, this combination seamlessly unites trusted and time-tested methods and the natural protection of carnauba wax, with the cutting-edge nano-quartz ceramic technology of today. Regardless of where you live, your car's finish is exposed to a variety of potentially damaging contaminants. Paint overspray, water spots, fresh tree sap, rail dust, bird droppings, light oxidation and brake dust may seem harmless, but left alone, these particles can cause molecular breakdown of your paint, leaving the finish dull and vulnerable to further deterioration. Ultimate Hybrid™ 1-Step Ceramic Clay & Coat will stop this damage, restore brilliance, and leave a "just coated" super-hydrophobic, liquidy-gloss appearance to your car's paint, chrome, glass, and smooth plastics. Clay & Coat in 1-Step. It's that easy!

Part#	Desc.	UOM	Price
CH35204		each	29.99

NEW! Ultimate Hybrid Ceramic Wax

Mothers Ultimate Hybrid™ Ceramic Wax isn't your father's car wax. Featuring a balanced blend of advanced science and traditional car care, this formula seamlessly unites the trusted and time-tested natural protection of #1 yellow carnauba wax with the cutting-edge nano-quartz ceramic technology of today. Ultra-fine polishes remove minor imperfections and oxidation, promoting proper adhesion and paving the way for a long lasting, Si02 fortified shine that repels water and contaminants with ease. Keeping with conventional methods, our Ultimate Hybrid™ Ceramic Wax eliminates learning curves and application curve balls, allowing you to wax on and wax off as you always have. It's that easy!

Gray Cast-Iron Aerosol Paint

This paint is the original color, cast-iron gray used on all steering boxes, leaf springs, coil springs, rear ends & other small applications.

Part#	Desc.	UOM	Price
P202	12-oz.....	each	11.99

Rally Wheel Aerosol Paint

VHT Wheel Paint provides a great finish and real protection for all standard and custom wheels. Everyday wheels take a beating both on and off the road. Salt, sand, brake dust and rocks severely damage the appearance and protection of the wheel surface. This unique product resists chipping, cracking and fading, while protecting the wheel surface from oxidation, and is available in five popular colors, plus clear coat.

Colors Available: Aluminum, argent silver, gloss black, gloss clear, matte gold flake, graphite, matte clear, satin black

Part#	Desc.	UOM	Price
D601211	11-oz.....	each	16.99

High-Heat Cast Gray Coating

Excellent for the exhaust manifold (1200° Fahrenheit) and other high-heat applications.

P203	12-oz.....	each	11.99

Rubberized Undercoat

Provides protection against rust, corrosion, moisture, heat and cold. Reduces road noise. Flexible, without any asbestos fibers. Can be painted any color.

Part#	Desc.	UOM	Price
CH23666	18-oz.....	each	18.99

Wrinkle Plus Paint

VHT "Wrinkle Plus" coating adds a deep rich texture for a great custom look. This specially formulated coating withstands temperatures to 350° Fahrenheit, resists color fading, grease, degreasers and severe weather conditions providing a tough protective layer that will not rust, corrode, chip or crack.

Part#	Desc.	UOM	Price
CH27274	black, 11-oz.....	each	16.99

High Temperature Plastic Paint

VHT high-temperature plastic paint is formulated to withstand temperatures up to 200 degrees F. The aerosol paint adheres directly to automotive-grade plastics without the need for sanding or a plastic adhesion promoter. It's ideal for painting high-heat applications such as engine covers and components, as well as interior or exterior plastics.

Part#	Desc.	UOM	Price
CH33376	11-oz.....	each	16.99

Dupli-Color Rubberized Undercoat

Several styles to choose from. All rubberized undercoats are paintable and provide ideal protection for gash tanks, wheel wells, weld joints, doors and various other components. The high-build formula features a special high-output delivery nozzle.

FlameProof High-Heat Paint

FlameProof coating from VHT will renew and extend the life of any surface exposed to extremely high-temperatures. The unique coating, which is widely used in both the automotive and aerospace industries, features a silicon ceramic base and dries to a matte finish. With the ability to withstand temperatures of 2000° Fahrenheit, FlameProof is perfect for headers or exhaust systems, while cast-iron parts can benefit from a "Nu-Cast FlameProof" coating. Available in cast iron, flat aluminum, flat black, flat blue, flat gray, flat orange, flat red, flat silver, flat white primer, or satin clear coat.

Part#	Desc.	UOM	Price
CH27275	11-oz.....	each	17.99

High-Temperature Engine & Drivetrain Paint

Superior heat and chemical resistance and durability are what put VHT engine enamels at the forefront of paint technology. The unique blend of urethane resins creates a tough, long-lasting finish that is perfect for engines and all of the surrounding components. Choose from a factory color or VHT "NU Cast" engine enamels for a cast-iron or aluminum appearance. Available in Chevy orange, Chevy red/orange, gloss black, gloss clear, GM blue, light gray primer, Nu-Cast aluminum, Nu-Cast iron, Pontiac blue, or satin black.

Part#	Desc.	UOM	Price
CH27265	11 oz.....	each	15.99

Brake Caliper & Drum Paint

VHT Caliper Paint has been specifically designed for the custom detailing of brake components. It is heat resistant to 900°F (482°C) intermittent and will not chip, crack, fade or rust even under extremes of operation or road and weather conditions. It is easy to apply, dries quickly and is remarkably resistant. Careful preparation is essential.

Colors Available: Aluminum, blue, gloss black, gloss clear, gold, orange, red, satin black

Part#	Desc.	UOM	Price

POR-15 PAINT PRODUCTS AND ACCESSORIES

RUST PREVENTIVE COATING - FUEL TANK SEALERS - METAL-PREP - ENGINE PAINT

Rust Preventive Coating

Stop rust permanently with POR-15. Unlike ordinary paints, POR-15 is designed to be coated right onto rusty surfaces leaving a beautiful, rock-hard finish that won't crack, chip or peel. Eliminate stone chips while you're at it. POR-15 is so tough that some folks describe it as, "Powder coat in a can". Furthermore, POR-15 is very flexible and can withstand twisting and bending without cracking. Use POR-15 on anything you want to protect permanently from rust, stone chips or other common paint failures. Sold each.

COLORS AVAILABLE:
Black, clear, gray, silver or semi-gloss black.

Six Pack Of Rust Preventive Paint

Get maximum convenience and efficiency with a POR-15 six pack. Package contains six 4-oz. cans so you'll only open small amounts as you need them with no waste. Each can covers 12 square feet. Available in black only.

Part#	Desc.	UOM	Price
CH245	.....	each	64.99

POR 15 Fuel Tank Sealer

"U.S. Standard Fuel Tank Sealer" was formulated and developed due to a demand for a high-tech sealer impervious to all fuels, including the Stage II fuels that have higher alcohol content. It has superior strength and fuel resistance and does not contain Methyl Ethyl Ketone, a highly flammable and deadly carcinogen.

Part#	Desc.	UOM	Price
C220198	1-pint.....	each	29.99
C220199	1-quart.....	each	51.99

Cleaner Degreaser

"Cleaner Degreaser" degreases in one application without leaving residues, noxious fumes or flammable solvents. No other cleaner works as fast or as well. It makes petroleum-based cleaners almost obsolete because Cleaner Degreaser diluted with water three, four, five and even ten times its volume will remain even more potent than other cleaners. "Cleaner Degreaser" eliminates grease, oil, mildew, algae, musty odors, soap films and wax. Before applying any rust preventative paint or coating, you must remove any oily film or residue.

APPLICATIONS: Engines, fuel tanks, frames, floor pans, suspension components, transmissions, rubber, nylon, vinyl, grease traps, etc.

Part#	Desc.	UOM	Price
C220217	1-quart.....	each	15.99
C220216	1-gallon.....	each	29.99

Metal Prep

"Metal Prep" provides the best adhesion to any surface, including aluminum and shiny polished metal surfaces. The simple one-step process gently etches metal, creating an ideal anchor pattern for coatings such as POR-15, while simultaneously leaving a zinc phosphate film to promote chemical bonding of paint and steel. After thoroughly degreasing your work piece, apply environmentally safe "Metal Prep" to both neutralize any rust and etch clean bare metal. This will allow better adhesion of POR-15 or any other paint or coating. "Metal Prep" is not caustic, corrosive, toxic or flammable.

APPLICATIONS: Removes surface rust in minutes, ensures perfect paint adhesion, coats metal with zinc phosphate, provides perfect base for all paints, gives better welding conductivity without harmful residues and is reusable.

Part#	Desc.	UOM	Price
C220219	32-oz.....	each	21.99
C220220	1-gallon.....	each	41.99

AP120 Metal Prep

Now achieve the ultimate clear finish on brightly polished metal. Designed exclusively for use with the super-tough, super-clear "Glisten PC" coating. "AP120" eliminates impurities and films that may be present, especially on chrome or polished aluminum finishes. Get the toughest, most beautiful clear coat available with "AP120" and "Glisten PC."

Part#	Desc.	UOM	Price
C220107	20-oz.....	each	12.99

NOTE: Not intended for use inside of the vehicle.

Fuel Tank Repair Kit

"Fuel Tank Repair Kit" is more than just pouring in a quart of sealer and sloshing it around. If gum, varnish, sludge or fuel is inside, they must be removed first. Our "Fuel Tank Sealer," like all other sealers, will not work in a contaminated tank. Find out what the pros already know and get this "Fuel Tank Repair Kit" with everything you need to do the job right.

FEATURES: "Cleaner Degreaser" to remove gum, sludge and varnish. "Metal Prep" to remove rust and prepare tank for sealer. "Fuel Tank Sealer" to permanently seal tank. Detailed instructions included.

Part#	Desc.	UOM	Price
C220241	.....	each	99.99

Super Starter Kit

You'll get a 4-oz. can of POR-15 (enough to cover 12 sq. ft.), a 1/2-pint of "Cleaner Degreaser" a 1/2-pint of "Metal Prep" two wooden handle paint brushes and a pair of special high-dexterity surgical latex gloves. Available in black only.

Part#	Desc.	UOM	Price
C2257	.....	each	27.99

Brake Caliper Paint Kit

Make your calipers shine with this do-it-yourself paint kit from POR-15. Available in black or silver, this kit will add a beautiful appearance to your brake calipers. Complete kits include all of the necessary cleaners and paints to add new life to old calipers.

COLORS AVAILABLE: Black, red or silver

Part#	Desc.	UOM	Price

Power Mesh Reinforcing Fabric

It's perfect for repairing holes in steel, fiberglass, wood or even many plastics. Use it to bridge holes in floors, trunk pans or even quarter panels. It's unbeatable when combined with POR-15 and POR "Epoxy Putty."

Part#	Desc.	UOM	Price
C220202	1 square yard....	each	11.99

Epoxy Putty

FEATURES:
Mixes like clay, hardens like steel, easy-to-use, cures in water, no measuring or weighing, stays in place and doesn't slump or sag, great insulator, malleable consistency, fill in anywhere, can be sanded, drilled, machined, sawed and painted

Part#	Desc.	UOM	Price
C220203	1-lb.....	each	38.99

Self-Etching Primer

The primer gently etches the glossy surface providing an excellent bond with the paint of your choice. "Self-Etching Primer" is not a high-build primer and is designed to work specifically with POR-15, but will work on bare metal also.

Part#	Desc.	UOM	Price
L240311	15-oz.....	each	36.99

NOTE: This aerosol item must be shipped ground. No Overnight, 2-Day or 3-Day shipping.

POR-Patch

"POR-Patch" is quite literally POR-15 in a tube. Like POR-15 it dries as hard as a rock, remains flexible and once dry, it is totally impervious to fuels and solvents. It's so tough it may actually add strength to weakened metal. It won't absorb moisture and swell like conventional body fillers. Try it, it's incredible. Use it to permanently seal seams, patch holes in steel, wood or plastic. Fix holes in fuel tanks.

Frame Coater Kit

The KBS Frame Coater Kit contains everything you need to clean, prep, & apply two coats of RustSeal on up to a 50 square foot area. This 3-STEP SYSTEM is the most effective rust and corrosion prevention system available today. RustSeal chemically bonds to bare metal forming a permanent, moisture resistant finish that is flexible yet won't crack, chip, or peel. Because RustSeal is moisture-cured, this superior coating is made even stronger by continued exposure to moisture. RustSeal is also highly resistant to some of the most aggressive chemicals such as acids, alkalis, salts, abrasive materials, fertilizers, coal dusts, solvents, oils, and other refined petroleum products. Each Frame Coater Kit includes: 1 Quart - KBS Klean, 1 Quart – RustBlast, 1 Quart – RustSeal, black nitrile gloves, two brushes, stir stick, complete & detailed Instructions. A variety of topcoat colors are available.

BlackTop Chassis Paint

BlackTop is a permanent, moisture-cured, UV stable coating primarily used for topcoating surfaces previously sealed with RustSeal or any other paint/primer application. BlackTop is a high performance protective coating specifically formulated to withstand dulling and fading caused by prolonged sunlight exposure. BlackTop may be used alone as a resilient coating but it will not offer the ultimate rust protection unless it is used in combination with RustSeal. For the best stop rust & ultraviolet protection, first apply RustSeal to permanently seal the surface and then topcoat with BlackTop for an incredibly tough and professional looking finish. Available in Gloss Black, OEM Satin Black & Flat Black. Like RustSeal, BlackTop dries to a rock hard yet flexible coating that can be readily applied to chassis, coil springs and light weight panels. BlackTop also has high heat resistance and can be applied to almost all automotive applications except exhaust systems. BlackTop is now available in a convenient Aerosol Spray Can! Satisfaction guaranteed!

Cavity Coater Rust Preventative

Cavity Coater is the Perfect Solution for hard to reach areas that are prone to rusting! Cavity Coater is a single step, super-penetrating corrosion inhibiting coating designed for long term protection on all metal surfaces. Cavity Coater provides a self-healing film which renders over 4000+ hours salt spray protection...over 4 times the protection of conventional cavity waxes. Use Cavity Coater with a KBS Cavity Wand to give long lasting protection for those hard to reach enclosed cavities such as rocker panels, boxed frames, inside doors & fenders, deck lids, tailgates and more. Available in a variety of sizes for use with your own spray equipment or brushes as well as in a convenient aerosol with or without a spray wand. Spray wand also sold separately.

Diamond Finish Clear Coat

DiamondFinish is a durable and tough water clear coat that can be applied direct-to-metal or over other coatings. The high-gloss coating remains permanently flexible and is able to perform in the toughest environments without yellowing, cracking or peeling. Featuring permanent high solids (over 60%) and low VOC's, this clear is a moisture cured urethane that does not require additives. The advanced coating technology offers durability, flexibility, corrosion and chemical resistance. The self-leveling clear can be applied with a brush without leaving any brush marks, a roller or a conventional spray gun. DiamondFinish ClearCoat will cure without heat or UV lights in temperatures from 50° to 86° Fahrenheit. The clear is able to withstand the harshest of chemicals including fuels, solvents, battery acid, brake fluid, Ethanol, Methanol, MEK, Hydrochloric Acid, Fertilizers, and Acetone. Because of its chemical resistance, graffiti will not stick and can be removed simply with a solvent soaked rag. Great for high temperature automotive applications including the use on cylinder heads, engine blocks, brake components and even inlet manifolds, without yellowing up to 300° Fahrenheit. Available in several conventional sizes as well as in an easy to use aerosol.

NOTE: Reduce using KBS #1 Thinner only. Do not reduce with lacquer thinner.

Dry Air Spray Gun Filter

Add a final layer of protection when spraying your finishes with this dry air filter. Each disposable filter will absorb up to one (1) fluid ounce of moisture and insure a perfectly dry system from start to finish every time. It absorbs oil aerosols, condensed moisture, and contaminants as small as 0.01 microns. It attaches directly to the air inlet of your spray gun and, as air passes between the filter's compressed layers, particles and moisture are trapped. This incredible filtration is accomplished at a true 30 CFM to the spray gun, with minimal pressure drop at the optimum flow rate. Users report reduced paint defects, resulting in increased productivity with the ultimate final finishes.

KB10000	61-73	.....	each	10.99

Paint Saver

KBS Paint Saver is a proven paint preserver that allows user-friendly long term storing of leftover paints in the original can. Paint Saver keeps paints, coatings, and clear coats from skinning over in the can saving you money by allowing you to use the entire can of paint. This environmentally safe vehicle allows for storage of paints in their original cans for an extended storage period.

KBS Patch UV-Activated Repair System

KBS Patch is an easy-to-use fiberglass-reinforced polyester patch that is cured by sunlight or UV-light to create long-lasting repairs. Perfect for making watertight, durable repairs on engine parts, decking, fenders, gas cans, drain pipes, water tanks, PVC pipes, plastics, Plexiglas, fiberglass, metal, wood, concrete and more. KBS Patch is waterproof and will not rust or rot. The patch requires no mixing, and once cured, it can be drilled, tapped, sanded and painted. Patch kits are available in several sizes and we also offer a UV flashlight that contains 51 Ultraviolet LED lights for curing your patch when sunlight is not available.

SIZES AVAILABLE: 3" x 6", 6" x 9", 9" x 12"

Rubberized Undercoating

KBS UnderCoat is a superior rubberized paintable undercoating that provides protection in wheel wells, gas tanks, frames, and floor pans. The coating produces a very tough, yet flexible film with excellent adhesion, and helps prevent road salt from eating away at your car's metal and fiberglass while offering excellent adhesion to metal or painted surfaces. KBS UnderCoat also provides sound deadening by reducing road noise and vibration. Note: Not for use on surfaces that will come in direct contact with heat or high temperatures such as mufflers or exhaust components.

TRUNK & FLOORPAN REPAIR KIT - HIGH TEMPERATURE PAINTS - PRIMERS - MADE IN THE USA

Strip Paint Remover

KBS Strip is a heavy-duty paint, stain & varnish remover developed for use on wood, metal, masonry surfaces and the inside of tanks. KBS Strip is a penetrating semi-gel formula that clings to vertical surfaces and removes even the toughest finishes easily. The spray bottle applicator promotes even sealing coverage & deep penetrating power for removing stubborn layers of finishes even in hard to reach places! KBS Strip features an evaporation sealant which drastically lowers the amount of odor. KBS Strip can be easily washed off with water or solvent without leaving a residue.

System Sampler Kit Rust Preventative

RustSeal chemically bonds to rusted steel to form a rock-hard, non-porous coating that won't crack chip, or peel. It works by isolating metal from moisture. Without moisture present, steel can't rust. This non-porous, flexible coating is incredibly tough and extremely resistant to abrasion and impact. Each System Sampler Kit includes 8oz - KBS Klean, 8oz RustBlast, 8oz RustSeal (any color), black nitrile gloves, two brushes, stir stick, complete & detailed instructions.

COLORS AVAILABLE: cat yellow, galvanized steel, gloss black, grey, guardian green, off-white, oxide red, safety blue, satin black, silver

NOTE: Reduce using KBS #1 Thinner only. Do not reduce with lacquer thinner.

XTC High Temperature Zinc Primer

XTC Silicone Zinc Primer prevents corrosion of metal surfaces exposed to high heat, high humidity, condensation and salt air. The primer has similar properties to galvanizing as it locks itself to bare metal surfaces leaving a perfect primed surface for top coating. Primer can be finished in the topcoat of your choice, or it can be used as a standalone finish. Available in gray only, the XTC primer withstands temps in excess of 1200°F (648°C), and is free of fluorocarbons, lead, and chromates.

XTC High Temperature Paints

XTC is a high temperature/ heat resistant coating formulated specifically to protect metal surfaces operating at temperatures from 500° F to 1500° F. With proper preparation, XTC provides outstanding adhesion, film integrity, weathering, and thermal shock-resistance throughout this entire temperature range, and is guaranteed not to burn off! XTC is ideal for exterior applications because it resists rust when primed with XTC Primer. Available in a variety of colors and sizes to suit your needs.

LS ENGINE BOOKS

RESTORATION KITS - FISHER BODY

How To Supercharge And Turbocharge GM LS-Series Engines

GM LS-series engines are some of the most powerful, versatile, and popular V-8 engines ever produced. They deliver exceptional torque and abundant horsepower, are in ample supply, and have a massive range of aftermarket parts available. One of the most common ways to produce more horsepower is through forced air induction-supercharging or turbocharging. Right-sized superchargers and turbochargers and relatively easy tuning have grown to make supercharging or turbocharging an LS-powered vehicle a comparatively simple yet highly effective method of generating a dramatic increase in power. In this revised edition of How to Supercharge & Turbocharge GM LS-Series Engines, supercharger and turbocharger design and operation are covered in detail, so the reader has a solid understanding of each system and can select the best system for his or her budget, engine, and application. The attributes of Roots-type and centrifugal-type superchargers as well as turbochargers are extensively discussed to establish a solid base of knowledge. Benefits and drawbacks of each system as well as the impact of systems on the vehicle are explained. Also covered in detail are the installation challenges, necessary tools, and the time required to do the job. Once the system has been installed, the book covers tuning, maintenance, and how to avoid detonation so the engine stays healthy. Cathedral, square, and D-shaped port design heads are explained in terms of performance, as well as strength and reliability of the rotating assembly, block, and other components. This in-depth book explains how to adjust the electronic management system to accommodate a supercharger or turbocharger. How to Supercharge and Turbocharge GM LS-Series Engines is the only book on the market specifically dedicated to forced air induction for LS-Series engines. It provides exceptional guidance on the wide range of systems and kits available for arguably the most popular modern V-8 on the market today. Author: Barry Kluczyk. Paperback, 144 pages, 413 color photos.

Swap LS Engines Into Chevelles and GM A-Bodies: 1964-72

Make swapping a GM LS Engine into your 1964-1972 Chevelle or other GM A-Body as smooth as possible by learning the essential procedures, solutions to common problems, and time-saving techniques. Jefferson Bryant, author of LS Swaps: How To Swap GM LS Engines into Almost Anything, has performed many LS swaps throughout his career and has transplanted the LS into several A-Body cars. In this comprehensive guide, he provides detailed step-by-step instructions for installing an LS powerplant into a Chevelle, Buick GS, Oldsmobile Cutlass, and Pontiac GTO. To successfully install an LS engine, you need to select or fabricate motor mounts and adapter plates to mount the engine to the chassis. Also, you need to integrate the electronic engine controls and wiring harness to the A-Body car. If you run a fuel-injection system, a new tank or high-pressure fuel pump, fuel lines, and related equipment must be installed. Bryant covers all of these crucial steps and much more. In addition, he performs a new LT swap into an A-Body car. The GM LS engine has revolutionized the muscle car and the high-performance V-8 market. It has become a favorite engine to swap into classic cars because it offers a superior combination of horsepower, torque, and responsiveness in a compact package. As such, these modern pushrod V-8 engines are installed in vintage GM muscle cars with relative ease, and that includes Chevelles and other popular GM A-Body cars. In fact, General Motors manufactured about 500,000 Chevelles and A-Body cars between 1968 and 1970 alone. Swapping an LS engine into an A-Body is made much easier with a comprehensive guidebook such as this, whether you plan on doing it yourself or decide to have a shop do it for you. A huge and thriving aftermarket provides a wide range of suspension, brake, steering, chassis, and other parts that produce functional improvements. Before you tackle your LS Swap project, arm yourself with this vital information to guide you through the process. 144 pages, 419 color photos. Paperback.

How To Swap GM LS-Series Engines Into Almost Anything

"How to Swap GM LS-Series Engines into Almost Anything" shows you how to fit these powerhouse engines into a variety of muscle cars, hot rods and more. The book includes a historical review, complete specs and detailed information so you can select and fit the best LS engine for your vehicle. This 8-1/2" x 11" softbound guide features a section on mounting kits, explaining how to install these engines into a variety of cars using readily available motor mount kits, universal engine mounts or fabricated mounts. In addition, the book shows you how to perform necessary oil pan modifications and adapt accessory drivers as well as choose the most suitable fuel pump, exhaust system, wiring harness and electronic control module. Taking it a step further, author Jefferson Bryant has also included tips and tricks on selecting the best reprogramming equipment and software for a vehicle and its application as well as a complete listing of compatible transmissions. More than 370 color photos are also included to help guide you through the process of swapping your new modern power plant.

PAINT AND BODY BOOKS

MEDIA BLASTING - METAL PREP

How To Paint Your Car

How to Paint Your Car reveals the techniques, tricks, and technology behind automotive painting through 400 color photos, clear captions, detailed text, and step-by-step how-to sequences. You'll learn the latest information about paint chemistry, waterborne paints, spray guns, body fillers, surface prep, site prep, as well as respirators and other safety gear that every automotive painter must know. With step-by-step detail, you'll learn how to properly prepare your car for paint work, including minor bodywork, surface preparation, rust removal, masking, priming and final coating. How to Paint Your Car also includes information about custom touches and effects as well as how to care for your paint after application, including information on buffing compounds, waxes, and other care products. Everything you need to know to feel comfortable and confident in undertaking your own paint project, whether a touch-up job or a complete respray, is covered in How to Paint Your Car. Dennis W. Parks has written several best-selling how-to books for the Motorbooks Workshop series, including How to Paint Your Car, How to Build a Cheap Hot Rod, Hot Rod Body and Chassis Builder's Guide, and The Complete Guide to Auto Body Repair. Parks' personal projects currently include a complete buildup of a 1955 Chevy pickup truck. He lives in Cedar Hill, Missouri. 192 pages, 400 color photos and 20 diagrams. Paperback. 10-5/8"x8-1/4".

Patina: How To Create And Preserve

There was a time when a heavily weathered collector car or truck was considered a bit of an eyesore. In fact, if you brought one of these vehicles to a car show more than likely you would receive grief for showing a car with faded paint and surface rust. But not anymore. The era of patina on vehicles has been fully embraced, and rightfully so. Author Kevin Tetz of Paintucation delivers the first book ever on the many variables involved with patina. With the step-by-step instruction, Kevin guides you through creating patina from existing paint, preserving *already there* patina, and painting patina (steel, plastic, glass). Each process is unique and requires its own set of skills, procedures, and tools. Currently, the genre is ripe with creation. With tens of millions of potential projects to consider, finding the right car or truck to patina shouldn't be a problem. And now you will have the perfect book to guide you through the patina process. 176 pages, 599 color photos. Paperback.

BODYWORK BOOKS

SHEET METAL SHAPING

Weld Like A Pro: Beginning to Advanced Techniques

Author Jerry Uttrachi, past president of the American Welding Society, reveals advanced welding techniques and the use of aluminum, titanium, magnesium, stainless steel, and other specialty materials. Over 400 color photos and charts detail the most popular automotive projects including welding an electric fuel pump into an aluminum fuel tank, repairing chrome-moly tubular control arms, and welding in floor pans. This 144 page soft-cover book covers the use of TIG, oxyacetylene, arc, and wire-feed welders and will be helpful to everyone from beginners to veterans.

Performance Welding Handbook

Welding demonstrates the newest fabricating techniques and covers the latest in welding equipment. This complete guide written by NASA welding consultant Richard Finch helps a fabricator select the proper equipment, prepare jigs, and effectively weld 4130 steel, stainless steel, aluminum, and magnesium. It also covers plasma cutting, the technique used extensively on Monster Garage that has revolutionized metal working. Author Richard Finch is an expert welder and the author of several past books on welding for everything from farms to high-performance NASCAR race cars. Second Edition.

Sheet Metal Shaping: Tools, Skills & Projects

Barr demystifies this seemingly black art with information on tools and basic skills and 14 customizable projects, fully illustrated with step-by-step color photography. First, you'll learn how to assemble your ideal toolkit, as well as how to build a power hammer and an English wheel. In the process, Barr will help you make informed choices based on available space and budget. Once you're all set up, he addresses the concepts of shape and form. The projects are presented in a way that you can easily apply them to their own vehicles, whatever they may be. Barr also takes the time to show how the projects can be accomplished with different available tools. As you go, you'll gain the skills and confidence for tackling the increasingly complex cases presented. Work your way up to building a fender utilizing the wheeling machine you built earlier; then move on to building a Model T speedster body and an Indy car, and later a challenging '34 Plymouth fender. The book even includes common "goofs" and how to avoid and, if necessary, correct them. 240 pages. 400 color & B & W photos. Paperback. 10-5/8"x8-1/4".

Automotive Bodywork And Rust Repair

This book teaches you how to select the proper tools for the job and common sense approaches to the task ahead of you. Get valuable tips and techniques for preparing and cleaning sheet metal and repair patch fabrication. Learn about different gas and electric welding options as well as metal forming, fitting and smoothing. Also shown are procedures for cutting metal and final finishing, including filling and sanding, the secrets of lead filling, making panels fit properly and more. This 8-1/2" x 11" softbound book features 160 pages packed with more than 450 color photos making it a valuable and comprehensive resource guide.

Classic California License Plates

Nothing embodies cool, classic car spirit than the California "Black & Yellow" Plates of the mid-to-late 1960's. These plates are cherished by car buyers everywhere as the plates are synonymous with rust-free and original classic cars in all makes and models. These are a must-have for every garage and Man Cave no matter what state you live in. Were you or a loved one born in 1968? Were you married in 1965? Was you first car a 1967? Does your 1966 car wish it was in California versus the frigid North? All great reasons to buy one. These are real stamped (replica) aluminum license plates with raised numbers and letters. Do not confuse these with flat, economy vanity plates that are simply silkscreened.

HOW TO ORDER:

Online Orders

Shop for our complete line of parts and accessories any time at opgi.com. You'll also find our current sale specials, new product introductions, technical articles and our entertaining blogs. Our site uses SSL encryption technology for a fully secure shopping experience.

Phone Orders

Call us toll-free at 1-800-243-8355 from anywhere in the U.S. or Canada. Our customer service representatives are here to take your order and assist you with any questions you may have regarding your car's restoration.

Call Center & Showroom Hours: Mon - Fri 8:00am – 4:30pm PT
Sat 10:00am – 3:00pm PT

Closed on Sundays and the following U.S. Federal holidays:

Monday, May 30, 2022 – Memorial Day
Monday, July 4, 2022 – Independence Day
Monday, September 5, 2022 - Labor Day
Thursday, November 24, 2022 – Thanksgiving
Sunday, December 25, 2022 – Christmas Day
Sunday, January 1, 2023 – New Year's Day

International Orders

From outside the U.S. and Canada, dial the international access code then 1-562-594-1000.

METHODS OF PAYMENT:

Credit Cards / Debit Cards

We accept Visa, MasterCard, American Express and Discover credit cards as well as Visa and MasterCard debit cards. When placing your order either online or over the phone, please include your name as it appears on the card, the entire card number, the date of expiration, and the security code located on the back of your Visa, MasterCard or Discover. The security code appears on the front of American Express cards. Please note, we must be able to verify the shipping address as the credit card holder's. Minimum credit card purchase is $20.00.

PayPal

We accept PayPal for all online orders that are shipped FedEx Ground within the continental U.S.

Affirm

Affirm payment subject to credit check and approval. Down payment may be required. Affirm is only available on orders over $400. Affirm loans are made by Cross River Bank, a New Jersey State Chartered Commercial Bank, Member FDIC.

See https://www.affirm.com/help/ for details.

Money Orders & Cashier's Checks

Money Orders, Cashier's Checks and certified checks are accepted. Please be advised that for mailed or faxed orders, we hold these types of checks until funds are cleared by our bank.

Personal Checks / Business Checks (EFT)

To use a personal or business check on pre-paid orders, the name, address and check number must be pre-printed on the check. We can only accept first party checks. Original Parts Group, Inc. processes all checks using electronic fund transfers (EFT), which converts funds electronically to our bank.

All transactions are governed by NACHA Operating Rules. (National Automated Clearing House Association.)

Collect On Delivery Policy (C.O.D.)

Your C.O.D. order must be shipped to a residential or business street address. Sorry, we cannot ship C.O.D. to a Post Office box or APO-FPO. Someone must be present during normal business hours to accept the C.O.D. package. If no one is there to accept the order, we will be obligated to pay FedEx Ground for the freight charges – both ways. We will no longer be able to accept your C.O.D. orders until we are reimbursed for the freight charges and a 20% restocking fee. We only accept C.O.D. orders by phone, so please call us at 800-243-8355 when you're ready to place your order. C.O.D. orders do not qualify for free freight. Original Parts Group, Inc. accepts C.O.D. orders up to $500.00 only. A FedEx Ground C.O.D. collection charge of $49.95 per box will be added to all C.O.D. shipments.

SHIPPING:

Ground Shipments Within The Continental U.S.

Most of our merchandise is shipped throughout North America via FedEx Ground. Our standard ground delivery rates are calculated during your checkout based on the size, weight, and shipping zone of your order. We use multiple shipping partners in an effort to provide cost effective shipping services.

Here are estimated transit times for FedEx Ground from the time your order leaves OPGI. These rates are current at time of printing. These are shipping times only and do not include the time to process your order.

Estimated transit times from the time your order leaves OPGI. Times may vary.

Free Shipping Over $299

FREE SHIPPING ON ALL ORDERS OVER $299

We offer free standard ground shipping on orders over $299 after any and all discounts have been applied. Free standard ground shipping applies to orders within the continental United States only. Alaska, Hawaii, Puerto Rico, Canada, and international orders are not eligible for this offer. Some items may be excluded from free shipping due to size and/or weight restrictions, and may incur additional fees. Collect on Delivery (C.O.D.) orders are excluded from free shipping offers.

Additional Handling Surcharge

Any package that measures over 48" in length, and/or 30" in width, is subject to an additional handling surcharge of $15.95 per package. Unusually shaped packages such as cylinders or drums are also subject to this charge, as are unusual exterior packaging materials such as plastic or cloth.

Items That Require Truck Freight Delivery

Products that require truck freight delivery are items too large to be shipped via FedEx Ground. These are items such as fenders, hoods, etc. All truck freight orders must be prepaid. Rates begin at $120.00 and vary based on weight. Please contact our customer service department for accurate freight charges or visit our website at opgi.com. Freight carriers and charges are subject to change.

Drop Ship

All drop-shipped orders must be prepaid. Rates vary depending upon weight.

SHIPPING OPTIONS:

Free Shipping Offer:

Orders that qualify for Free Shipping are shipped via our choice of carriers and typically deliver in 2-10 business days.

FedEx Standard Overnight

Next-business-day delivery by 4:30pm to US businesses and by 8pm to residences.

FedEx Express Saver

Delivery on the third business day Monday - Friday. Packages arrive at businesses by 4:30pm and residences by 8pm.

FedEx Ground Home Delivery

In the contiguous US, delivery takes 1-5 days. Shipping to Alaska and Hawaii is 3-7 days. Deliveries are made every day of the week.

USPS Priority Mail

Delivery typically within 2-5 business days.

UPS Ground

Delivery within 1-5 business days, including Saturday.

UPS 3 Day Select

Delivery by the end of the third business day, including Saturday.

UPS Next Day Air

Guaranteed delivery by 10:30am, 12pm, or the end of the day, depending on the destination, with delivery by 12pm or 1:30pm on Saturdays.

International Shipping Options

We use FedEx International Priority, FedEx International Economy, and USPS Priority Mail.

GENERAL INFORMATION:

Prices

The prices in this catalog were current at the time of printing, and supersede all prices in any previous OPGI publication. OPGI reserves the right to change prices without notice. Availability of all parts and accessories in this catalog are subject to change without notice. OPGI reserves the right to discontinue products and services without notice.

Back Orders

Many items in our comprehensive inventory move quickly, and rarely are we out of stock on any items for any length of time. Typically, products that are out of stock at the time you place your original order are back in stock within 10 days or less. OPGI's sophisticated back order tracking system automatically processes any items due to you the moment they become available. Back order items normally take as little as a few days to receive, but can sometimes take longer. For an estimated time of arrival, please call our customer service department at 1-800-243-8355.

Sales Tax Information

Orders from outside California are exempt from California State Sales Tax at the time of this printing except for residents of: Colorado, Georgia, Iowa, Idaho, Illinois, Indiana, Massachusetts, Michigan, Minnesota, North Carolina, New Jersey, Nevada, New York, Texas and Wisconsin. California residents are required to pay sales tax on all orders. Due to unforeseen changes in the California Sales Tax and Federal Interstate Tax System, rates are subject to change. The current California State/Region Sales Tax at the time of this printing is 8.75%.

Merchandise Return Policy

If you are unsatisfied with a product or purchase and would like a refund or store credit please visit us at opgi.com/help/return-policy to submit your return through our online returns process. We accept returns or exchanges within 45 days from the date of purchase. All merchandise we offer is guaranteed against defects in workmanship and materials for 45 days from the date you received it. Liability of OPGI is limited to the replacement of defective parts. Returns may be subject to a 20% restocking fee. Each returned product must be in its original, unused condition. Merchandise that has been painted or altered is non-returnable. Returns may be subject to shipping charges. Original GM products and all Branded performance products (example Edelbrock, Holley, Wilwood) must be in their original packaging.

The following products are not returnable under any circumstances:

- Instruction and informative books or manuals
- Special orders
- Items requiring Truck Freight delivery
- Wiring harnesses
- All electrical parts
- Engines and moving internal engine parts
- Interior components that have been installed incorrectly

Please note exchanges cannot be processed online. If you would like to exchange an item, please contact our customer service team at 1-800-243-8355 for further assistance.

Incomplete Orders

Upon receiving your order, be sure to check the contents of your delivery to ensure all parts were received. If you are missing any items, first check your invoice to be sure the parts were not back ordered. If a shortage has occurred, please contact our customer service department within 3 days of receipt of shipment to ensure a prompt replacement.

Damage Claims

Please inspect the merchandise in the presence of the carrier at the time of the delivery. It is the responsibility of the delivering service (FedEx Ground, etc.) to deliver the merchandise in good condition. In the unlikely event that you receive a package that has been opened or damaged, it is imperative that the driver documents this on their delivery sheet. Please report any and all damaged goods in shipments within 3 days of receipt. OPGI cannot be held responsible for damaged or missing parts without documentation on the delivery sheet and without contacting the delivering company directly.

Please promptly call OPGI customer service so we may assist you with Damage Claims.

COMPLIANCE WARNINGS:

Prop 65 Compliance Statement

Products in this catalog can expose you to chemicals including but not limited to lead, sulfur, nickel, chromium, vanadium, titanium, polyvinyl chloride and/or 4,4'-methylenebis (2-chloroaniline) which are known to the state of California to cause cancer or birth defects or other reproductive harm.

For more information, visit www.P65Warnings.ca.gov

Emissions Regulations

Emissions-related parts are regulated under our nation's clean air laws and are primarily enforced by two government agencies: the U.S. Environmental Protection Agency (EPA) and the California Air Resources Board (CARB).

Please visit www.opgi.com/help/emission-regulations for more details.

1 This product is covered under a CARB EO and is legal for sale and use in all 50 states. Please see opgi.com for EO numbers.

Products that have completed the CARB EO process belong in this category. EPA recognizes the CARB EO as a reasonable basis demonstration, therefore products can be considered legal by both CARB and EPA.

Aftermarket Parts that may require an EO Number:
Air Cleaners, Cams, Carburetors, Catalytic Converters, Coils & Ignition Wires, Computer Chips, Electronic Ignitions, Distributors, Fuel Injection, Fuel Tanks, Headers, Intake Manifolds, Internal Engine Parts, Replacement Engines

2 This product has met EPA's reasonable basis requirements and is legal for sale and use within the jurisdiction of the federal EPA.

This category includes products that have demonstrated a reasonable basis emissions compliance either through engineering evaluation or testing, but do NOT have a CARB EO.

There are a few reasons that a product might including (but not limited to):

- Testing has been completed and paperwork submitted to CARB but the EO has not yet been issued.
- The product meets the reasonable basis standard but may not meet CARB's criteria for an EO.
- The Manufacturer has performed testing but has decided not to pursue a CARB EO.

3 This product is not legal for street use on an emissions-controlled vehicle. It may be used on dedicated competition or pre-pollution-controlled vehicles only.

Some products can never be legal for use on pollution-controlled vehicles (both for use on the road and off-road), but they do have a legitimate use on racing vehicles and vehicles that predate emissions regulations. Pre-certification means 1965 and older domestic vehicles in California, 1968 imports in California and both domestic and imports under EPA jurisdiction.

4 This product does not require an EO in California. By nature of its design, it is legal for sale and use in all 50 states. Replacement parts included.

This category includes products that have little or no impact on emissions, such as drop-in air filters or exhaust components downstream of the last emissions component (such as the catalytic converter, DPF or exhaust gas sensors). Also included are devices that plug into the OBD port to monitor information, but do not alter the vehicle's electronics.

MORE WAYS TO SAVE WITH OPGI

FREQUENT BUYER REWARDS

Your loyalty just paid off!

As a way of thanking you, our loyal customers, we have a Frequent Buyer Rewards Program which lets you earn points for every dollar you spend on parts.

Here's how it works:

- **Earn 1 point for every $1 spent on parts. See chart for reward tiers.**
- **Points can be redeemed on parts, accessories and gift cards only.**
- **Points have no cash value.**
- **Points expire within one year of first purchase.**
- **Points are available to use upon shipment of each order.**

How to use your points:

- **Call 1-800-243-8355 and ask a customer representative about using your points, or visit our Showroom when you're ready to place an order.**
- **At this time, Frequent Buyer Points are not currently redeemable online.**

250 POINTS	FREE OPGI T-SHIRT
500 POINTS	$10 FREE PARTS
750 POINTS	$35 FREE PARTS
1500 POINTS	$90 FREE PARTS
3000 POINTS	$195 FREE PARTS
5000 POINTS	$420 FREE PARTS
8000 POINTS	$850 FREE PARTS
12000 POINTS	$1400 FREE PARTS

**Size of order unlimited to qualify. Valid for U.S. ground shipping only. Excludes oversized and Truck Freight items.*

Terms & Conditions

Original Parts Group, Inc. reserves the right to cancel, modify or restrict the Frequent Buyer Rewards Program at any time without notice. Points are not transferrable. Accounts cannot be combined. Any abuse of the program or failure to follow the terms and conditions may cause a revocation of Frequent Buyer Points. In the event of refunds, checks returned for insufficient funds or disputed credit card charges, points will be deducted from your account at a rate equal to those accrued in the original transaction. Any Frequent Buyer Rewards accounts that have no purchases for a period longer than one year will be considered inactive and all points accumulated on that account will be terminated. Points are not awarded for shipping charges. Other restrictions may apply.

VOLUME DISCOUNTS ON RESTORATION PARTS

We offer Volume Discounts on restoration parts orders over $499. To qualify for a Volume Discount your order must exceed $499 to receive a 5% discount or $999 to receive a 10% discount. This offer cannot be combined with other discounts or promotions. All parts must be ordered at one time, on one invoice. All accepted payment types qualify for the discounts with the exception of Collect on Delivery (C.O.D.). All products on the OPGI website or in catalogs listed as "On Sale", "Discounted Kit", "No Further Discount Available" as well as "High Performance" and "Aftermarket" items, are not eligible for Volume Discounts. All discounts are applied at the time of payment, or at checkout for online orders. Volume Discounts qualify for Free Shipping per our Free Shipping Policies, please reference the Free Shipping policy for details. Orders must consist wholly of restoration parts, some exclusions apply. Other restrictions may apply.

NEED AN INTERIOR KIT, BUT NOT EVERYTHING IN THE KIT?

Mix and match, or even delete items, and still enjoy the great kit savings!

Here's an example:

Let's say you want a Stage III Interior Kit, but don't need everything that comes with it, need a different color combination than what's offered, or would like a few other items not offered in the kit. We'll let you mix and match as you see fit, plus you'll still get the full kit discount.

- **Change out items and retain the kit discount on the remaining products, for example, get premium Essex Carpet instead of the standard 80/20.**
- **Delete items off the kit that you don't need, or add items to a kit. We'll still honor the discount on the remaining items.**
- **Once you've decided what you need, give us a call and we'll assist you.**

This Kit Swap is a special service that we have implemented to serve you. To take advantage of Kit Swap Savings, the final Kit components you buy must retain a portion of the original kit price. Call for details.

PRICE MATCH GUARANTEE

Original Parts Group, Inc. will match any competitor's current advertised price for an identical product. Simply provide us with a copy of the competitor's current advertised price from a catalog, ad, or website and we will match it. Price matching is available at the time your order is placed and is available for in-stock merchandise only. Price matching will be determined by a competitor's most current retail published price and is limited to OPGI competitors within the restoration parts industry.

Competitors' sale pricing, inventory reductions, close outs, special promotional offers, etc. may be exempt from this program. This program is subject to the terms and conditions of OPGI's current policies. Engines and all performance parts are exempt from the Price Matching policy. Price matching supersedes all other promotional offers and current OPGI, "On Sale" pricing at time of comparison. (Guarantee cannot be combined with any other OPGI "Sale" offer). If OPGI matches a price from a competitor, additional discounts on that product or products may not apply. Important: If the standard retail price of an OPGI product is higher than the competitor's price and an applied discount reduces the price below the competitor's pricing, then the "now" discounted or sale pricing will apply. OPGI reserves the right to change or revoke this offer at any time without notice.

CUSTOMER SATISFACTION GUARANTEE

If you are unsatisfied with a product or purchase and would like a refund or store credit please visit us at opgi.com/help/return-policy to submit your return through our online returns process. We accept returns or exchanges within 45 days from the date of purchase. Please note exchanges cannot be processed online. If you would like to exchange an item, please contact our customer service team at 1-800-243-8355 for further assistance.

Please see "Merchandise Return Policy" for complete details.

OPEN 24/7 OPGI.COM

SAFE, SECURE AND INFORMATIVE.
SHOP WITH EASE FROM YOUR MOBILE OR DESKTOP.

SHOP ONLINE ANYTIME

Visit opgi.com where you will find everything you see in our catalog as well as useful information to help with your restoration project. Check out our tech articles, installation tips and videos, and in-depth product reviews.

You can visit and order from your computer, tablet, or smartphone anytime!

CUSTOM EXPERIENCE

When you visit opgi.com, you can select your specific car model and year and be served with a comprehensive listing of parts and accessories for your car. Each time you visit our website, you'll see products and content that are relevant to your car and shopping needs.

MANAGE YOUR ACCOUNT

Your online account will store information about your specific car so we can ensure you get the right parts every time. You can also track your orders and review your order history, and create a "Wish List" of parts for future orders.

FULLY SECURE

Our website uses SSL encryption technology for a fully secure shopping experience.

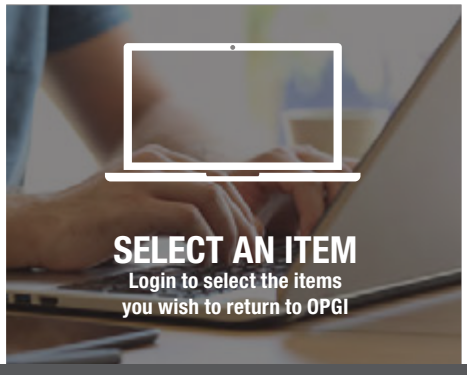
RATINGS & REVIEWS

Learn what others are saying about the products we offer and provide your own assessment of parts you've purchased from OPGI.

FREE CATALOGS

You can also order additional free full color catalogs at opgi.com. Our 2022 catalogs are packed with thousands of restoration and performance parts for your GM classic.

RETURNS ARE AS EASY AS 1... 2... 3...



SELECT AN ITEM
